6.c. Description of the organization's activities:

Not to exceed 750 words

In the spring of 2003 when the Ministry of Culture started its program of safeguarding cultural heritage, Mr. Lu Yongxiang, Chairman of the Society and president of Chinese Academy of Sciences, wrote to Mr. Sun Jiazheng, Minister of Ministry of Culture, expressing his full support to and intention of active participation in the work. Ever since then, sound cooperation has been sustained between the Society and the Department of Intangible Cultural Heritages and Chinese Intangible Cultural Heritage Conservation Center under Ministry of Culture, participating in various protection work. In 2005, Mr. Liao Yugun, vice chairman of the Society and head of the Institute for the history of Natural Science, Chinese Academy of Sciences, was invited to compile the exemplar application for Anhui Ink Stick as member of the editorial board for this special edition. Directors of the Traditional Craftsmanship Research Society (a branch of the Society). Hua Jueming, Zhu Peichu, Yang Yongshan, Li Mianlu, Feng Lisheng, Fan Jialu, Yangyuan, are invited commissioners of the Expert Committee on safeguarding Chinese intangible cultural heritages, who worked together with Professor Zhou Jiahua in presiding over the approval of the first and second batches of Chinese national-level List of Intangbile Cultural Heritage in Need of Urgent Safeguarding.

In the meantime, many experts of the Society went to every part of China for profound and close investigations into the history and current situation of traditional craftsmanship, assisting communities and craftsmen in formulating protecting plans, collecting, sorting out data and objects, establishing files and urging local governments to provide financial support, especially to protect and support financially the successors of traditional craftsmanship. In the summer of 2008, as part of the supervision and guidance work on the safeguarding of intangible cultural heritages initiated by the Ministry of Culture, Mr. Zhu Peichu, Feng Lisheng, Yang Yuan and others were sent respectively to provinces such as Shaanxi, Henan, Jiangsu and etc to supervise and direct the conservation of heritages included in the list of Chinese national-level intangible cultural heritages.

Supported by the Society and the Institute for the History of Natural Sciences, work has been done on interviews and compilation. For example, the Chinese Craftsmanship series of 14 categories launched in the summer of 2007, has been put into print successively; and the Chinese Crafts and Artisan Masters series, a life documentary of Chinese celebrated Crafts started in the spring of 2008, is expected to have five volumes completed by the end of 2008, and included in the series are the life stories of Chinese Crafts and Artisan Masters such as Zhang Tonglu (master of cloisonné), Wu Yuanxin (master of blue calico), Li Changhong (master of violet pottery) and etc.

Over the past years, many scholars from the Society have taken part in the compilation of a History of Chinese Science and Technology series (30 volumes in all, 22 published) and a Complete Collection of Chinese Arts and Crafts series (20 volumes in all, 14 published). Its members have been present at international forums and academic symposiums held in Beijing, Suzhou, Chengdu, Dali, and elsewhere, publishing nearly one hundred theses. All this has played a vital part in the excavation, research, identification and conservation of intangible cultural heritages.

All the above facts attest to the capacity, expertise and experience in protecting traditional craftsmanship, astronomy, mathematics, and other folk wisdoms of the Society, a first-class society of celebrated Chinese scholars with many years of practical experience behind.

7. Its experiences cooperating with communities, groups and intangible cultural heritage practitioners:

Not to exceed 350 words

Since establishment, Chinese Society of the history of Science and Technology (hereafter, referred to as the Society) values the collaboration with the communities, organizations, and personnel working in the field of intangible cultural heritage. The Society has established and maintained a good, stable, and long-term cooperative relations with practitioners in the trades of "the scholars' four treasures (writing brushes, ink-sticks, papers, and ink-stones), "traditional mechanic investigation, traditional handcrafts and artistry such as pottery, porcelain, cloisonné, metal processing, traditional food processing. Invited by the trade associations, the organizations aimed at protecting and preserving traditional craftsmanship, and the directors of the cultural department at the regional and local governments, the Society has conducted numerous field studies and interviews to address the issues of preserving and continuing traditional handcraftsmanship: moreover, the associate also made suggestions based on academic research. Commissioned by Chinese Association of Science and Technology, the Society undertook the task of investigation and protection of China's intangible cultural heritages (the traditional handcrafts part) in 2007, and formed the academic research report-A research on the Measures for Protection and Sustainable Development of Chinese Traditional Handcrafts - for the reference by relevant communities, groups and practitioners.

In addition to the cooperation at the Society level, many members of the Society who possess of profound academic backgrounds in the traditional handcrafts are engaged in the intangible cultural heritage industry, and carry out such work as research, protection, education and propaganda in respective fields.
