
TRANSBOUNDARY WATER GOVERNANCE AND CLIMATE CHANGE ADAPTATION: INTERNATIONAL LAW, POLICY GUIDELINES AND BEST PRACTICE APPLICATION

WATER
and
CLIMATE DAY

**UNESCO Booth
COP21 Le Bourget
2 December 2015**

Water is central to climate change adaptation. This publication explores the role of governance and identifies best practice examples of effective policy guidelines. *"Transboundary water governance and climate change adaptation: International law, policy guidelines and best practice application"* ascertains the contribution that international law can make towards addressing the needed flexibility to meet new demands and face new uncertainties regarding climate change adaptation, particularly in a transboundary river basin context.
