PREFACE

The Unesco series « Science policy studies and documents » forms part of a programme initiated by the General Conference of Unesco at its eleventh session in 1960, which aims at making available factual information concerning the science and technology policies of various Member States of the Organization as well as technical studies of interest to policy-makers and managers.

The *country studies* are carried out by the government authorities responsible for policy-making in the field of science and technology in the Member States concerned.

The selection of the countries in which studies on the national science and technology policy are undertaken is made in accordance with the following criteria : the originality of the methods used in the planning and execution of such policy, the extent of the practical experience acquired, and the level of economic and social development attained. The geographical coverage of the studies published in the series is also taken into account.

The *technical studies* cover planning of science and technology policy, organization and administration of scientific and technological research, and other questions relating to science and technology policy.

This same series also includes *reports of international meetings* on science and technology policy convened by Unesco.

As a general rule, the country studies are published in one language only, either English, French or Spanish, whereas some of the technical studies and the reports of meetings are published in several official languages of the Organisation.

Pursuant to Resolution 2/4.2/1 adopted by the General Conference of Unesco at its twentieth session, a survey was launched with the purpose of identifying research projects, studies and courses relevant to science and technology policy currently under way or offered in the Member States.

The present Directory contains the results of that survey which was conducted from September 1979 to March 1981. Unesco's main objective in publishing these results is to improve the sharing of knowledge and experience at national, regional and world-wide level, among research workers, teachers and institutions who work in the field of science and technology policies. It is hoped that improvement of cross-cultural communication in this area will enhance international cooperation in all disciplines relevant to science and technology policy.

INTRODUCTION

A. Historical background

The growing impact of scientific and technological activities on modern societies, and the magnitude of the resources involved, have attracted increased attention over the years in governmental institutions, academic circles and production enterprises. Simultaneously, the number of courses and research projects devoted to the elaboration, execution, monitoring and assessment of science and technology policies has grown in step with the rising demand.

In the early seventies, Unesco had already published a directory of 340 research and teaching units working in the area of science policy throughout the European and North American region¹. The rapid development of teaching and research on policy-making and management in the field of science and technology made it necessary to update Unesco's previous survey and to extend its geographical scope to all Member States of the Organisation.

B. Outline of the field

The subject scope of science and technology policy as delineated by Unesco has gradually evolved out of the theory and practice of its Member States. This is best evidenced by the Country Monographs published by Unesco, and also by the proceedings and working documents of the manifold ministerial conferences and government expert meetings convened by the Organisation in this field. The basic tenets of the Unesco approach derive from the United Nations ideals of peace, justice and security among all peoples, and from the widespread desire of modern societies to strive toward endogenous and self-reliant development based inter alia on science and technology.

For the purpose of this survey, the field of science and technology policy was broken down into twelve subject categories which are fully compatible with those used in the framework of the SPINES Programme². Hence the major focus of research projects, studies and courses relevant to the present survey has

been classified under one of the following subject categories :

01. Theory, philosophy and systematization of science and technology.
02. History of science and technology.
03. Sociology and ethics of science and technology, science and society.
04. Creativity and psycho-sociology of scientific researchers.
05. Economics of science and technology (i.e. planning, management and financing methods).
06. Analysis and assessment of scientific and technological potential (i.e. personnel, funds, information, institutions, equipment and facilities).
07. Theories and practices of national science and technology policy-making ; national legislation in science and technology.
08. Science and technology forecasting and assessment.
09. Transfer, diffusion and implantation of technologies.
10. Organisation and management of scientific and technological activities at the institutional or performer's level.
11. International cooperation, policy and legislation in science and technology.
12. Societal analysis and assessment of the content and results of scientific and technological plans, programmes and projects.

C. Field procedures and organisation of the survey

The questionnaire :

A standard survey questionnaire was used to collect the data. It was sent by mail to institutions located in all Member States of Unesco in either English, French, Spanish or Russian, according to the language used by the respective countries in their official correspondence with Unesco.

Mailing list for the questionnaire :

In order to draw up the list of institutions likely to carry out research and/or teaching activities in the field relevant to the subject scope of the survey, the Unesco Secretariat scanned various periodicals dealing with science and technology policies as well as numerous directories among which particular mention should be made of :

1. Europa Publication Limited. *The World of Learning 1978-79*, 29th edition, London, 1978. 2038 p.

1. See Unesco « *Science policy research and teaching units/Unités de recherche et d'enseignement en politique scientifique* », (Paris, 1971) 380 p. (N° 28 of the series « Science policy studies and documents »).

2. The Unesco SPINES Programme (Science and Technology Policy Information Exchange Programme) which is being carried out by Unesco, and under the aegis of which this survey was undertaken, aims at facilitating the management of bibliographic and factual data required for science and technology policy, at national level and the exchange of these data at international level. The subject categories covered by these data are described in detail in document Unesco/NS/ROU/409 rev. 2, dated June 1978.

2. Heitowit, E. ; Epstein, J. ; Steinberg, G. *Science, Technology and Society : A Guide to the Field*, Ithaca, New York, Cornell University, Program on Science, Technology and Society, 1978. 577 p.

3. Unesco. *Science policy research and teaching units/Unités de recherche et d'enseignement en politique scientifique*, Paris, 1971. 380 p. (Unesco series : « Science policy studies and documents »).

Consultation of Unesco National Commissions in the Member States contributed also to the drawing up of the questionnaire mailing list.

Data Collection :

The first mailing of the questionnaire took place in September 1979 and was followed by 4 reminders at regular intervals, the last of which was sent out in August 1980. The completed questionnaires received by the Secretariat were checked for accuracy and relevance of the replies. Some respondents reported research projects or courses in various fields of the basic and applied sciences, such as for example, chemistry, physics, mathematics, geology, etc. ; these replies have been eliminated since they did not fall within the scope of the survey, as defined in the questionnaire. Furthermore all the responses received by the Secretariat after 31 March 1981, when the typesetting and photocomposition of the directory had been completed, could not be taken into account. They will however be included in the computerized data-base underlying the present Directory, which Unesco intends to update at regular intervals.

Computerization of the data :

The data which were collected by Unesco originate from the completed questionnaires received by the Secretariat. For the computerization of the results of the survey, and hence for the creation of its data base, the Secretariat made use of ISIS*, a computer software for the storage, processing and rapid retrieval of alphanumeric information. The original version of ISIS was developed in 1964 by the International Labour Office (ILO). Unesco, for its part, has developed a new Operating System version (OS) of ISIS to run on large scale computers, and has become its sole distributor.

The present directory is part of Unesco's computerized data base in the field of science and technology policy, whose contents will be made available upon request also in the form of magnetic tapes, to the National Commissions for Unesco in the Member States. Furthermore, it is envisaged to update the data base periodically and to gradually extend its coverage to governmental and parliamentary bodies active in the field of science and technology policy.

Limitation and updating of the survey :

Users of this Directory should be aware of the fact that it does not claim to be exhaustive. No mail survey can be considered as being free from important omissions. As one might expect, some potential respondents did not receive the questionnaire and others did not reply or their replies were lost in the mail ; not to speak of replies which did not reach the Secretariat in time for their inclusion in the Directory.

* ISIS stands for « Integrated Set of Information Systems ».

Recipients of the present publication are therefore kindly requested to inform the Unesco Secretariat³ of any shortcomings, errors or omissions they may come across while perusing it. The Secretariat will update its data base accordingly and incorporate the missing information in a subsequent edition of the Directory.

D. Brief content analysis

1117 units pertaining to 84 Member States of Unesco and reporting more than 2970 research projects/studies or courses, are listed in the present Directory. About 890 of these units (i.e. 80 %) conduct research projects/studies, and 675 of them (i.e. 60 %) offer courses in the field of science and technology policy. 450 units (i.e. 40 %) have at the same time research projects/studies as well as courses.

The number of persons responsible for research projects/studies and courses reaches 5184. About 3583 of them (i.e. 69 %) deal with research projects or studies and the remaining 1601 (i.e. 31 %) with courses. Furthermore the names of 1060 heads of units are also indicated in the Directory.

More than 63 % of the units listed in the Directory state they can provide office space, technical equipment and other necessary support services to visiting researchers. More than 70 % of the units have a library or specialised collection of books or periodicals in the field of science and technology policy at their disposal, and a slightly lower percentage, i.e. 65 %, have computerized data processing facilities such as remote terminals, video screen, printers, etc. available to their staff. 58 % of the units have access to in-house staff and facilities for issuing books and/or journals.

The greater share of research activities as compared to teaching activities is confirmed by the number of research projects/studies which is 1606 and that of courses which amounts to 1368.

As far as the subject matter of the research projects/studies is concerned, it was found out that :

— 13,9 % of the research projects/studies, i.e. 223, have subject category Nr. 2 « History of science and technology » as their major focus,

— 13,6 % of the research projects/studies, i.e. 218, have subject category Nr. 9 « Transfer, diffusion and implantation of technologies » as their major focus,

— 12,6 % of the research projects/studies, i.e. 202, have subject category Nr. 7 « Theories and practices of national science and technology policy-making and national legislation in science and technology policy » as their major focus.

As far as the courses are concerned, one can see that :

— 27,9 % of the courses, i.e. 381, indicate subject category Nr. 2 « History of science and technology » as their major focus,

3. Correspondence should be addressed to :

The Director,
Division of Science and Technology Policies
UNESCO
7, place de Fontenoy
75700 PARIS
France

— 16,1 % of the courses, i.e. 220, indicate subject category Nr. 1 « Theory, philosophy and systematization of science and technology » as their major focus,

— 15,4 % of the courses, i.e. 211, indicate subject category Nr. 3 « Sociology and ethics of science and technology and science and society » as their major focus.

It is also worth noting that subject category Nr. 4 « Creativity and psychosociology of scientific researchers » is the one least dealt with by the research projects/studies, namely by only 31 i.e. 1,9 % of them and that subject category Nr. 6 « Analysis and assessment of scientific and technological potential » is the one least dealt with by the courses, namely by only 14, i.e. 1 % of the courses.

The geographical distribution of the units should also be mentioned here, for it reflects very significantly the level of development in the field of science and technology policy in the different regions of the world. Whereas the European and North American region accounts for 74,4 % of the units listed (i.e. 831) the African region represents only 1,6 % of the units i.e. 18. The number of units pertaining to the Arab States amounts to 20 (1,8 %), that of the Latin American and Caribbean Region to 96 (8,6 %) and finally that of the Asian region to 152 (13,6 %).

Finally, it is worth mentioning that about 1080 periodicals publishing material in the field of science and technology policy and about 640 publishers issuing other publications than periodicals in the same field are listed in the present Directory.

ORGANISATION AND USE OF THE DIRECTORY

The Directory consists of two parts, a MAIN ENTRY section and a section for INDEXES.

MAIN ENTRY SECTION

In the MAIN ENTRY section, entries are assigned a sequential reference number and appear within a country alphabetically by the name of the parent organisation in the original language.

The name of the country appears in English, French and Spanish before the first entry for a given country and in the upper corner of each page of the Directory ; the countries being arranged in the English alphabetical order.

Wherever applicable the name of the unit, i.e. the administrative entity in which relevant research projects, studies and/or courses are being conducted, appears in the original language under the name of the parent organisation. The translation of the names of those parent organisations and/or units appearing in other languages than English, French or Spanish is given where available in one of these languages, after an oblique line following the corresponding name in the original language. Where appropriate, the acronym of the name of the parent organisation and/or that of the unit is also given in parenthesis under the corresponding full name.

The structure of data elements for the rest of the entry is composed of 7 zones. It is explained below with the help of a typical entry :

<p>0060 UNIVERSITY OF WOLLONGONG</p> <p>Department of History and Philosophy of Science</p> <p>① a. P.O. Box 1144 Wollongong, New South Wales - 2517 b. (042) 297311 c. Uniofwol d. 29022</p> <p>② JOHNSTON, Ron</p> <p>③ ① ② ③ ④ ⑤ ⑥ ⑦ .</p> <p>④ a. Australian Science Policy : the State of, University Research. 1978-1982 b. Johnston, R. c. 06/10,05,03:3</p> <p>⑤ a. Science and Society. 1975/∞/078h/W/AC/\$:0/☐ b. Forge, J. c. 03/02,01,07:4</p> <p>⑥ Research Policy (United Kingdom) Search (Australia) Social Studies of Science (United Kingdom)</p> <p>⑦ Australian Government Publishing Service (Australia) Croom Helm (United Kingdom) Sijthoff and Noordhoff (Netherlands)</p>
--

- ① a. : Address ;
- b. : Telephone number, preceded where available by the telephone code of the town in parenthesis,
- c. : Telegraphic address,
- d. : Telex number.
- ② : Name and first name of the Head of the unit.
- ③ : Facilities and activities of the unit. See codification key for zone ③ (page XI).
- ④ : Research projects/studies of the unit. See codification key for zone ④ (page XI).
- ⑤ : Courses of the unit. See codification key for zone ⑤ (page XII).
- ⑥ : Name of the periodical having published material produced by the unit ; followed by, in parenthesis, the name of the country where the periodical is published.
- ⑦ : Name of the publisher having issued publications (other than periodicals) prepared by the unit ; followed by, in parenthesis, the name of the originating country of the publisher.

Codification key for zone ③ : Facilities and activities of the unit

- ① = Library or specialized collection of book and/or periodicals in the field of science and technology policy is readily available to the staff members of the unit.
- ② = Unit has access to in-house staff and facilities for issuing publications (books and/or journals).
- ③ = Computerized data processing facilities such as remote terminals, video screens, printers are available to the staff members of the unit.
- ④ = Unit can provide office space, technical equipment and/or other necessary support services to visiting researchers.
- ⑤ = Unit has held conferences, seminars, symposia and/or other scientific meetings within the past two years.
- ⑥ = Unit conducts research projects/studies in the field of science and technology policy.
- ⑦ = Unit offers courses in the field of science and technology policy.

Note : Should any of the above mentioned facilities and/or activities be not available, the corresponding codification key number will be absent.

Codification key for zone ④ : Research projects/studies conducted by the unit

Zone ④ of a typical entry :

<p>④ a. Australian Science Policy : the State of University Research. 1978-1982 b. Johnston, R. c. 06/10,05,03 : 3</p>
--

④ a. : Title of the research project/study in English, French or Spanish, followed where available by the year of beginning and the year of completion of the research project/study. In the case of permanent ongoing research projects/studies, the year of completion is replaced by two dashes (--) e.g. 1978--. Where the year of beginning is unknown, but the year of completion is stated, the latter is preceded by two dashes (--) e.g. --1983.

b. : Name of the project/study *Leader* followed where appropriate, after an oblique line (/) by the names of up to five other project officers.

c. : Number of the subject category (see page VIII for the complete list) constituting the major focus of the research project/study followed where appropriate, after an oblique line (/) by the numbers of up to three other subject categories which, in order of priority, are also covered by the research project/study. This information is followed where available, after a punctuation mark of a colon (:) by a number 1 to 4 indicating the extent to which *information* relevant to the subject matter of the project/study and produced outside the country in which the unit is located, is available to the unit.

The rating scale is :

- 1 : Practically no information available ;
- 2 : Little information available ;
- 3 : Moderate amount of information available ;
- 4 : Detailed information available.

Codification key for zone ⑤ : Courses offered by the unit

Zone ⑤ of a typical entry :

- ⑤ a. Science and Society.
1975/∞/078h/∞/▲C/\$: 0/☞
b. Forge, J.
c. 03/02,01,07 : 4

⑤ a. : Title of the course in English, French or Spanish. Under the title of the course a set of 7 data elements, each separated by an oblique line (/), gives where available the following information on the course :

- Year in which the course was first given
- Periodicity of the course :
∞ = Not periodical
∞ = Periodical
- Duration of the course in hours (h)
- Level of the course :
☞ = No academic status
∞ = Graduate level
∞ = Postgraduate level

— Time of the holding of the course :

- ▲☞ = Day-time course
- ▲☞☞ = Day-time summer course
- ▲C = Evening course
- ▲ = Occasional (or ad hoc) course 2 weeks minimum

— Course fees (\$) : 0 = No fee requested
1 = Fee requested

— Course certificate :

- ☞ = Course is not
 - ☞ = Course is
- { part of a curriculum
leading to a diploma,
degree or certificate.

b. : Names of up to 3 lecturers responsible for the course.

c. : Number of the subject category (see page VIII for the complete list) constituting the major focus of the course, followed where appropriate, after an oblique line (/) by the numbers of up to three other subject categories which, in order of priority, are also covered by the course. This information is followed where available and after a punctuation mark of a colon (:) by a number 1 to 4 indicating the extent to which *information* relevant to the subject matter of the course and produced outside the country in which the unit is located, is available to the unit.

The rating scale is :

- 1 : Practically no information available ;
- 2 : Little information available ;
- 3 : Moderate amount of information available ;
- 4 : Detailed information available.

INDEXES SECTION

The INDEXES section is composed of 8 lists. The entries in this section are arranged alphabetically and as far as the first 6 lists are concerned, also by country. All the entries are followed by the reference number of the main entry section.

1. List of the parent organizations and their units.
2. List of the heads of the units.
3. List of paren organizations arranged by major focus (12 foci) of their research projects/studies.
4. List of paren organizations arranged by major focus (12 foci) of their courses.
5. List of units offering facilities for visiting researchers.
6. List of units having a specialised library or specialised collection of books and/or periodicals in science and technology policy.
7. List of periodicals publishing material in the field of science and technology policy.
8. List of publishers issuing other publications than periodicals in the field of science and technology policy.

PRÉFACE

La collection « Etudes et documents de politique scientifique » de l'Unesco s'inscrit dans le cadre d'un programme lancé par la Conférence générale de l'Unesco à sa onzième session, en 1960, et dont le but est d'offrir une information concrète concernant les politiques scientifiques et technologiques des différents Etats membres de l'Organisation ainsi que des études techniques présentant un intérêt pour les décideurs et les gestionnaires.

Les *études nationales* sont menées à bien par les autorités responsables de la politique scientifique et technologique dans les Etats membres considérés.

Le choix des pays où sont effectuées des études de la politique scientifique et technologique nationale se fait en fonction des critères suivants : l'originalité des méthodes de planification et d'exécution de cette politique, la mesure de l'expérience pratique acquise en la matière et le niveau de développement économique et social atteint par le pays. Le champ géographique couvert par les études publiées dans la collection est également pris en considération.

Les *études techniques* portent sur la planification de la politique scientifique et technologique, l'organisation et l'administration de la recherche scientifique et technologique ainsi que sur d'autres questions touchant à cette politique.

Dans la même collection paraissent aussi les *rapports de réunions internationales* sur la politique scientifique et technologique convoquées par l'Unesco.

En règle générale, les études nationales sont publiées dans une seule langue, en anglais, français ou espagnol, tandis que certaines des études techniques et des rapports de réunions paraissent en plusieurs des langues officielles de l'Organisation.

Comme suite à la résolution 2/4.2/1 adoptée par la Conférence générale de l'Unesco à sa vingtième session, une enquête a été entreprise en vue de recenser les projets de recherche, études et cours existant dans les Etats membres dans le domaine des politiques scientifiques et technologiques.

Le présent Répertoire contient les résultats de cette enquête, qui a été effectuée de septembre 1979 à fin mars 1981. En publiant cet ouvrage, l'Unesco a surtout cherché à faciliter l'échange aux niveaux national, régional et mondial des connaissances et des données d'expérience entre chercheurs, enseignants et institutions œuvrant dans le domaine des politiques scientifiques et technologiques. On escompte que l'amélioration de la communication interculturelle dans ce domaine renforcera la coopération internationale dans toutes les disciplines touchant à la politique scientifique et technologique.

INTRODUCTION

A. Historique

L'incidence grandissante au fil des années de l'activité scientifique et technologique sur la société moderne et l'importance des ressources qui sont affectées à ces activités ont retenu de plus en plus l'attention des organismes publics, des milieux universitaires et des entreprises productives. Dans le même temps, on a assisté à une augmentation du nombre des cours et des projets de recherche consacrés à l'élaboration, à la mise en œuvre, au contrôle et à l'évaluation des politiques scientifiques et technologiques.

Au début des années 70, l'Unesco avait déjà publié un répertoire de 340 unités de recherche et d'enseignement œuvrant dans le domaine des politiques scientifiques en Europe et en Amérique du Nord¹. Le rapide essor de l'enseignement et de la recherche sur la politique et la gestion dans le domaine de la science et de la technologie a rendu nécessaire la mise à jour de cette première enquête et l'élargissement de son champ géographique à tous les Etats membres de l'Organisation.

B. Domaine couvert par l'enquête

Le domaine de la politique scientifique et technologique tel que l'Unesco en a tracé le cadre s'est peu à peu dégagé des approches théoriques et pratiques adoptées par les Etats membres, que mettent parfaitement en évidence les monographies nationales publiées par l'Unesco ainsi que les actes et les documents de travail des multiples conférences ministérielles et réunions d'experts gouvernementaux convoquées par l'Organisation sur ce thème. Les principes fondamentaux de la démarche de l'Unesco procèdent des idéaux de paix, de justice et de sécurité entre tous les peuples prônés par les Nations Unies, et de la volonté de toutes les sociétés modernes d'œuvrer en faveur d'un développement endogène et auto-suffisant fondé inter alia sur la science et la technologie.

Aux fins de la présente enquête, le domaine de la politique scientifique et technologique a été subdivisé en 12 sous-domaines qui sont tout à fait compatibles avec ceux qui sont utilisés dans le cadre du Programme SPINES². Les projets de recherche, les étu-

des et les cours ont donc été classés selon leur thème principal dans l'un ou l'autre sous-domaines suivants :

01. Théorie, philosophie et systématisation de la science et de la technologie.
02. Histoire de la science et de la technologie.
03. Sociologie et éthique de la science et de la technologie, science et société.
04. Créativité et psychosociologie des chercheurs scientifiques.
05. Economie de la science et de la technologie (i.e. méthodes de planification, de gestion et de financement).
06. Analyse et évaluation du potentiel scientifique et technologique (i.e. personnel, fonds, information, institutions, équipements et installations).
07. Théories et pratiques des politiques scientifiques et technologiques nationales, législation nationale relative à la science et à la technologie.
08. Prévision scientifique et technologique.
09. Transfert, diffusion et implantation des technologies.
10. Organisation et management des activités scientifiques et technologiques au niveau de l'institution ou des exécutants.
11. Coopération, législation et politiques internationales dans le domaine de la science et de la technologie.
12. Analyse et évaluation d'ordre sociétal du contenu et des résultats généraux des plans, programmes et projets concernant la science et la technologie.

C. Méthodologie et organisation de l'enquête

Le questionnaire :

Un questionnaire d'enquête a servi d'instrument de collecte normalisée des données. Il a été envoyé par la poste à des institutions situées dans tous les Etats membres de l'Unesco — en anglais, espagnol, français ou russe — selon que l'une ou l'autre de ces langues est utilisée par le pays considéré pour la correspondance officielle avec l'Unesco.

Liste des destinataires :

Pour dresser la liste des institutions susceptibles de poursuivre des activités de recherche et/ou d'enseignement dans le domaine considéré, le Secrétariat de l'Unesco a passé en revue divers périodiques traitant des politiques scientifiques et technologiques de même que de nombreux répertoires, parmi lesquels il convient de citer en particulier les trois suivants :

1. Europa Publication Limited. *The World of Learning 1978-79*, 29^{ème} édition, Londres, 1978. 2038 p.

1. Voir Unesco « *Science policy research and teaching units/Unités de recherche et d'enseignement en politique scientifique* (Paris, 1971) 380 p. N° 28 de la collection « Etudes et documents de politique scientifique ».

2. Le Programme SPINES (Programme d'échange d'information pour la politique scientifique et technologique) que l'Unesco conduit et sous l'égide duquel la présente enquête a été entreprise, a pour objectif de faciliter la gestion au niveau national et l'échange au niveau international, des données bibliographiques et factuelles requises pour la politique scientifique et technologique. Les domaines couverts par ces données sont décrits de façon détaillée dans le document Unesco/NS/ROU/409 rev. 2, daté de juin 1978.

2. Heitowit, E. ; Epstein, J. ; Steinberg, G. *Science, Technology and Society : A Guide to the Field*, Ithaca, New York, Cornell University, Program on Science, Technology and Society, 1978. 577 p.

3. Unesco, *Science policy research and teaching units/Unités de recherche et d'enseignement en politique scientifique*, Paris, 1971. 380 p.

(Collection de l'Unesco « Etudes et documents de politique scientifique ».

Les commissions nationales de l'Unesco dans les Etats membres ont également été consultées pour établir la liste susmentionnée.

Collecte des données :

Le premier envoi du questionnaire a été effectué en septembre 1979 ; il a été suivi de quatre rappels adressés à intervalles réguliers, dont le dernier en août 1980. Le Secrétariat a procédé à la vérification de l'exactitude et de la pertinence des renseignements fournis dans les questionnaires complétés qui lui ont été renvoyés. Certaines réponses qui faisaient état de recherche ou de cours dans divers domaines des sciences fondamentales et appliquées (chimie, physique, mathématiques, géologie, etc.) ont été éliminées parce qu'elles n'entraient pas dans le cadre de l'enquête, tel que défini dans le questionnaire.

Par ailleurs, toutes les réponses reçues par le Secrétariat après le 31 mars 81, date de la mise sous presse du répertoire, n'ont pu être prises en considération. Elles seront toutefois incorporées à la base de données informatisée dont est issue le présent Répertoire et que l'Unesco entend mettre à jour à intervalles réguliers.

Traitement informatique des données :

Les données recueillies par l'Unesco proviennent des questionnaires remplis qui ont été reçus par le Secrétariat. Pour le traitement informatique des résultats de l'enquête, et par conséquent pour la création de sa base de données, le Secrétariat a utilisé l'ISIS*, un logiciel informatique pour le stockage, le traitement et l'extraction rapide d'informations alphanumériques. La version originale d'ISIS a été mise au point en 1964 par le Bureau International du Travail (BIT). L'Unesco, de son côté, a élaboré une nouvelle version OS (système d'exploitation) d'ISIS adaptée aux grands ordinateurs, et elle en est devenue le seul distributeur.

Le présent répertoire fait partie de la base de données automatisée de l'Unesco dans le domaine des politiques scientifiques et technologiques, dont le contenu sera également, sous forme de bandes magnétiques, mis à la disposition des commissions nationales pour l'Unesco dans les Etats membres intéressés. Par ailleurs, on envisage de mettre à jour cette base de données de façon périodique et d'en élargir progressivement le champ aux organismes gouvernementaux et groupes parlementaires œuvrant dans le domaine des politiques scientifiques et technologiques.

Limitation et mise à jour de l'enquête :

Les utilisateurs ne doivent pas ignorer que le présent répertoire ne prétend pas être exhaustif. Il n'est

* ISIS signifie « Ensemble intégré de systèmes d'information » (« Integrated Set of Information Systems »).

pas d'enquête par correspondance qui ne soit entachée d'importantes omissions. Comme on doit s'y attendre, certains destinataires potentiels n'ont pas reçu le questionnaire, et d'autres n'y ont pas répondu ou leur réponse a été égarée par la poste, sans parler des réponses qui ne sont pas parvenues au Secrétariat dans les délais voulus pour qu'elles figurent dans le répertoire. Les destinataires du répertoire sont par conséquent invités à bien vouloir indiquer au Secrétariat de l'Unesco³ toute insuffisance, erreur ou omission qu'ils pourraient y relever. Le Secrétariat mettra à jour en conséquence sa base de données et incorporera les informations manquantes dans une prochaine édition du Répertoire.

D. Brève analyse des résultats de l'enquête

Le présent répertoire recense 1 117 unités de 84 Etats membres de l'Unesco, qui ont déclaré plus de 2 970 projets de recherche/études ou cours. Quelque 890 d'entre elles (80 %) conduisent des projets de recherche/études, et 675 (60 %) offrent des cours dans le domaine des politiques scientifiques et technologiques. 450 unités (40 %) se consacrent à des projets de recherche/études en même temps qu'elles organisent des cours.

Le nombre de personnes responsables de projets de recherche, d'études et de cours atteint le chiffre de 5 184. Quelque 3 583 d'entre elles (69 %) s'occupent de projets de recherche ou d'études et les 1 601 restantes (31 %) de cours. D'autre part, le répertoire énumère également quelque 1 060 noms de directeurs d'unités.

Plus de 63 % des unités répertoriées déclarent être en mesure de fournir des bureaux, des équipements techniques et autres services de soutien nécessaires à des chercheurs invités. Plus de 70 % disposent d'une bibliothèque ou d'une collection spécialisée d'ouvrages ou de périodiques dans le domaine des politiques scientifiques et technologiques, et un pourcentage légèrement inférieur (65 %) possèdent des installations de traitement automatique des données tels que terminaux périphériques, terminaux à écran, imprimantes, etc. Par ailleurs, 58 % peuvent utiliser leur personnel et installations propres pour faire paraître des livres et/ou revues.

La prépondérance de la recherche sur l'enseignement est confirmée par le nombre de projets de recherche/études, qui est de 1 606 alors que celui des cours est de 1 368.

En ce qui concerne le thème principal des projets de recherche/études, on remarque que :

- 13,9 % de ceux-ci, soit 223, relèvent du sous-domaine n° 2 « Histoire de la science et de la technologie »,
- 13,6 % de ceux-ci, soit 218, relèvent du sous-domaine n° 9 « Transfert, diffusion et implantation de technologies »,

3. Toute correspondance devra être envoyée à l'adresse suivante :

Directeur
Division des politiques scientifiques et technologiques
UNESCO
7, place de Fontenoy
75700 Paris
France.

— 12,6 % de ceux-ci, soit 202, relèvent du sous-domaine n° 7 « Théorie et pratiques des politiques scientifiques et technologiques nationales, législation nationale relative à la science et à la technologie ».

En ce qui concerne les cours, on peut noter que :

— 27,9 % de ceux-ci, soit 381, ont pour thème principal le sous-domaine n° 2, « Histoire de la science et de la technologie »,

— 16,1 % de ceux-ci, soit 220, ont pour thème principal le sous-domaine n° 1, « Théorie, philosophie et systématisation de la science et de la technologie »,

— 15,4 % de ceux-ci, soit 211, ont pour thème principal le sous-domaine n° 3, « Sociologie et éthique de la science et de la technologie, science et société ».

Par ailleurs, il est intéressant d'observer que le sous-domaine n° 4 « Créativité et psychosociologie des chercheurs scientifiques » est celui qui fait l'objet du plus petit nombre des projets de recherche/études,

à savoir 31, soit 1,9 % de ceux-ci, et le sous-domaine n° 6 « Analyse et évaluation du potentiel scientifique et technologique » est celui qui fait l'objet du plus petit nombre de cours à savoir 14, soit 1 % des cours.

Il convient également de s'intéresser à la répartition géographique des unités, qui traduit très fidèlement le degré de développement des différentes régions du monde dans le domaine des politiques scientifiques et technologiques. Tandis que la région d'Europe et d'Amérique du Nord regroupe 74,4 % des unités répertoriées (soit 831), ce pourcentage n'est que de 1,6 (soit 18 unités) pour la région d'Afrique. Le nombre des unités est de 20 pour les Etats Arabes (1,8 %) de 96 pour l'Amérique Latine et les Caraïbes (8,6 %) et de 152 pour l'Asie (13,6 %).

Enfin, il faut signaler que le Répertoire énumère également quelque 1 080 périodiques consacrés à la politique scientifique et technologique et environ 640 éditeurs qui publient dans le même domaine des ouvrages autres que des périodiques.

ORGANISATION ET UTILISATION DU RÉPERTOIRE

Le Répertoire comprend deux parties : la partie principale pour les FICHES DESCRIPTIVES et la partie des INDEX DE RÉFÉRENCE.

LES FICHES DESCRIPTIVES

Les fiches descriptives reçoivent un numéro de référence séquentiel et sont classées dans le pays concerné par ordre alphabétique des noms des organisations mères dans la langue originale.

Le nom du pays figure en anglais, français et espagnol avant la première fiche descriptive relevant du pays, et dans le coin supérieur de chaque page du Répertoire ; les pays étant classés dans l'ordre alphabétique anglais.

Quand il y a lieu, le nom de l'unité, c'est-à-dire l'entité administrative qui est le siège de recherche, d'études et/ou de cours, apparaît dans la langue originale sous le nom de l'organisation mère. La traduction des noms des organisations mères et/ou des unités qui apparaissent dans une autre langue qu'anglaise, française ou espagnole, est donné, lorsqu'elle est disponible, dans une de ces langues après le nom dans la langue originale. De plus, le cas échéant, le sigle du nom de l'organisation mère et/ou celui de l'unité figure entre parenthèses sous le nom complet concerné.

Les autres renseignements figurant dans chaque fiche descriptive sont structurés en 7 rubriques. La structure adoptée est décrite ci-dessous à l'aide d'une fiche descriptive caractéristique.

0060 UNIVERSITY OF WOLLONGONG

Department of History and Philosophy of Science

① a. P.O. Box 1144

Wollongong, New South Wales - 2517

b. (042) 297311

c. Uniofwol

d. 29022

② JOHNSTON, Ron

③ ① ② ③ ④ ⑤ ⑥ ⑦ .

④ a. Australian Science Policy : the State of,
University Research. 1978-1982

b. Johnston, R.

⑤ a. Science and Society.

1975/∞/078h⁹U/▲C/\$:0/☞

b. Forge, J.

c. 03/02,01,07:4

⑥ Research Policy (United Kingdom)
Search (Australia)

Social Studies of Science (United Kingdom)

⑦ Australian Government Publishing Service
(Australia)

Croom Helm (United Kingdom)

Sijthoff and Noordhoff (Netherlands)

- ① a. : Adresse.
b. : Numéro de téléphone, précédé s'il y a lieu de l'indicatif téléphonique de la ville entre parenthèses.
c. : Adresse télégraphique.
d. : Numéro de télex.
- ② : Nom et prénom du directeur de l'unité.
- ③ : Installations et activités de l'unité. Voir code de la rubrique ③ (page XVII).
- ④ : Projets de recherche/études de l'unité. Voir code de la rubrique ④ (page XVIII).
- ⑤ : Cours de l'unité. Voir code de la rubrique ⑤ (page XVIII).
- ⑥ : Titre du périodique où sont parus les documents produits par l'unité, suivi, entre parenthèses, du nom du pays de publication du périodique.
- ⑦ : Nom de l'éditeur ayant publié des ouvrages (autres que des périodiques) réalisés par l'unité, suivi, entre parenthèses, du nom du pays d'origine de l'éditeur.

Code de la rubrique ③ : Installations et activités de l'unité

- ① = Bibliothèque ou collection spécialisée d'ouvrages et/ou de périodiques dans le domaine des politiques scientifiques et technologiques facilement accessible aux membres du personnel de l'unité.
- ② = L'unité peut utiliser le personnel et les installations de l'organisation pour faire paraître des publications (livres et/ou revues).
- ③ = Le personnel de l'unité a à sa disposition des installations de traitement automatique des données, tels que terminaux périphériques, terminaux à écran, imprimantes, etc.
- ④ = L'unité est en mesure de fournir des bureaux, des équipements et des installations techniques et/ou d'autres services de soutien nécessaires à des chercheurs invités.
- ⑤ = L'unité a organisé des conférences, des séminaires, des colloques et/ou d'autres réunions scientifiques au cours des deux dernières années.
- ⑥ = L'unité réalise des projets de recherche/études dans le domaine des politiques scientifiques et technologiques.
- ⑦ = L'unité offre des cours dans le domaine des politiques scientifiques et technologiques.

Note : lorsque l'un quelconque de ces installations et/ou activités n'existe pas, on omet le numéro de code correspondant.

Code de la rubrique ④ : Projets de recherche/études menés par l'unité

Rubrique ④ d'une fiche descriptive caractéristique :

- ④ a. Australian Science Policy : the State of University Research, 1978-1982
b. Johnston, R.
c. 06/10, 05, 03:3

④ a. : Titre du projet de recherche/étude en anglais, espagnol ou français suivi, lorsqu'elles sont connues, de l'année du début et de l'année d'achèvement du projet de recherche/étude. Dans le cas de projets de recherche/études permanents, l'année d'achèvement est remplacée par deux tirets (--), exemple : 1978--. Si l'année du début n'est pas connue, mais que l'année d'achèvement est indiquée, cette dernière est précédée de deux tirets (--), exemple : --1983.

b. : Nom du responsable du projet/étude, suivi, le cas échéant, après une barre oblique (/) du nom d'au plus cinq autres personnes chargées de la recherche.

c. : Numéro du sous-domaine (voir page XIV la liste complète) constituant le thème principal du projet de recherche/étude, suivi, s'il y a lieu, après une barre oblique (/) des numéros d'au plus trois autres sous-domaines dans l'ordre de priorité, également couverts par l'activité en question. On trouve ensuite, le cas échéant, après un signe de ponctuation de deux points (:) un numéro de 1 à 4 indiquant dans quelle mesure l'unité dispose d'informations pertinentes pour le projet de recherche et/ou étude et produites à l'extérieur du pays où se trouve l'unité.

L'échelle d'appréciation est la suivante :

- 1 : pratiquement aucune information accessible ;
- 2 : peu d'informations accessibles ;
- 3 : quantité modérée d'informations accessibles ;
- 4 : informations détaillées accessibles.

Code de la rubrique ⑤ : Cours offerts par l'unité

Rubrique ⑤ d'une fiche descriptive caractéristique :

- ⑤ a. Science and Society
1975/∞/078h/∞/A/C/\$:0/☐
b. Forge, J.
c. 03/02, 01, 07:4

⑤ a. : Titre du cours en anglais, espagnol ou français. Sous le titre du cours, une série de 7 éléments, séparés chacun par une barre oblique (/), donne les renseignements suivants :

- Année où le cours a été donné pour la première fois
- Périodicité du cours :
 - ∞ = non périodique
 - ∞ = périodique
- Durée du cours en heures (h)
- Niveau du cours :
 - A = niveau non universitaire
 - U = niveau universitaire
 - U = niveau universitaire supérieur

— Type du cours :

☐☐ = cours dispensé dans la journée

☐☐☐ = cours d'été dispensé dans la journée

☐C = cours du soir

☐ = cours occasionnel (ou ad hoc) d'une durée minimum de 2 semaines

— Droits à acquitter (\$) : 0 = gratuit

1 = payant

— Nature du cours :

☐ = le cours ne fait pas

☐ = le cours fait

{ partie d'un programme d'études sanctionné par un diplôme, un grade ou un certificat.

b. : Noms d'au plus trois personnes chargées du cours.

c. : Numéro du sous-domaine (voir page XIV la liste complète) constituant le thème principal du cours, suivi, s'il y a lieu, après une barre oblique (/) des numéros d'au plus trois autres sous-domaines dans l'ordre de priorité, également couverts par le cours. On trouve ensuite, le cas échéant, après un signe de ponctuation de deux points (:) un numéro de 1 à 4 indiquant dans quelle mesure l'unité dispose d'informations pertinentes pour le thème des cours, et produites à l'extérieur du pays où se trouve l'unité.

L'échelle d'appréciation est la suivante :

- 1 : pratiquement aucune information accessible ;
- 2 : peu d'informations accessibles ;
- 3 : quantité modérée d'informations accessibles ;
- 4 : informations détaillées accessibles.

LES INDEX DE RÉFÉRENCE

Cette partie comprend 8 listes. Les entrées dans toutes les listes sont rangées dans l'ordre alphabétique, et dans les 6 premières listes également par pays. Toutes les entrées sont suivies des fiches descriptives contenues dans la partie principale du Répertoire.

1. Liste des organisations mères et de leurs unités.
2. Liste des directeurs des unités.
3. Liste des organisations mères classées selon le thème principal (12 thèmes principaux) de leurs projets de recherche/études.
4. Liste des organisations mères classées selon le thème principal (12 thèmes principaux) de leurs cours.
5. Liste des unités disposant d'installations utilisables par des chercheurs invités.
6. Liste des unités disposant d'une bibliothèque ou d'une collection spécialisée d'ouvrages et/ou de périodiques dans le domaine des politiques scientifiques et technologiques.
7. Liste des périodiques où paraissent des articles touchant à la politique scientifique et technologique.
8. Liste des éditeurs publiant des publications autres que des périodiques dans le domaine des politiques scientifiques et technologiques.

PREFACIO

La serie de la Unesco « Estudios y Documentos de Política Científica » forma parte de un programa iniciado por la Conferencia General de la Unesco en su 11a. reunión de 1960, cuya finalidad consiste en proporcionar información concreta relativa a las políticas científicas y tecnológicas en diversos Estados Miembros de la Organización, así como estudios técnicos de interés para los responsables de las políticas y los administradores.

Los *estudios por países* son realizados por las autoridades gubernamentales encargadas de establecer la política en materia de ciencia y tecnología en los Estados Miembros interesados.

Los países en los que se llevan a cabo estudios sobre la política nacional científica y tecnológica se seleccionan en función de los siguientes criterios : la originalidad de los métodos empleados en la planificación y ejecución de dicha política, el alcance de la experiencia práctica adquirida, y el nivel de desarrollo económico y social logrado. También se tiene en cuenta el alcance geográfico de los estudios publicados en la colección.

Los *estudios técnicos* abarcan la planificación de la política científica y tecnológica, la organización y administración de la investigación en esa materia, así como otras cuestiones relacionadas con la política de ciencia y tecnología.

En la misma serie también se publican *informes de reuniones internacionales* en materia de política científica y tecnológica organizadas por la Unesco.

Por lo general los estudios por países se publican en una sola lengua, francés, inglés o español, mientras que algunos estudios e informes técnicos de reuniones se publican en varias de las lenguas oficiales de la Organización.

De conformidad con la Resolución 2/4.2/1 aprobada por la Conferencia General de la Unesco en su 20a. reunión, se organizó una encuesta con objeto de conocer los proyectos de investigación, estudios y cursos relacionados con la política científica y tecnológica, existentes o previstos en los Estados Miembros.

El presente Repertorio contiene los resultados de esa encuesta que se llevó a cabo entre septiembre de 1979 y marzo de 1981. Al publicar esta obra, la Unesco ha buscado sobre todo facilitar el intercambio a nivel nacional, regional y mundial de los conocimientos y resultados de experiencias entre investigadores, profesores e instituciones que trabajan en el campo de las políticas científicas y tecnológicas. Cabe esperar que la mejora de la comunicación intercultural en este campo intensificará la cooperación internacional en todas las disciplinas relacionadas con la política científica y tecnológica.

INTRODUCCION

A. Antecedentes históricos

El impacto creciente de las actividades científicas y tecnológicas en las sociedades modernas, y la magnitud de los recursos en juego, han motivado con el correr de los años un interés cada vez mayor por parte de las instituciones oficiales, los medios académicos y las empresas productivas. Al mismo tiempo, la cantidad de cursos y de proyectos de investigación consagrados a la preparación, ejecución, supervisión y evaluación de las políticas de ciencia y tecnología ha aumentado al mismo ritmo que la demanda creciente.

Al comienzo de los años 70 la Unesco ya había publicado un repertorio de 340 unidades de investigación y formación activas en el campo de la política científica en la región de Europa y América del Norte¹. Debido al rápido desarrollo de la enseñanza y la investigación en materia de elaboración de políticas y gestión de la ciencia y tecnología, fue necesario actualizar la encuesta anterior de la Unesco e incluir a todos los Estados Miembros de la Organización.

B. Descripción del campo temático

El campo temático de las políticas científicas y tecnológicas definido por la Unesco evolucionó gradualmente como resultado de la teoría y práctica vigentes en sus Estados Miembros. Ello queda claramente demostrado en las monografías por países publicadas por la Unesco, así como en las actas y documentos de trabajo de numerosas reuniones de expertos gubernamentales y conferencias ministeriales en la materia convocadas por la Organización. Los principios en los que se sustenta el enfoque de la Unesco se desprenden de los ideales de las Naciones Unidas sobre la paz, la justicia y la seguridad en todos los pueblos, así como de la aspiración común de las sociedades modernas de encaminarse hacia un desarrollo endógeno y autónomo basado inter alia en la ciencia y la tecnología.

A efectos de esta encuesta, el campo temático correspondiente a la política de ciencia y tecnología se desglosó en doce categorías de temas perfectamente compatibles con las empleadas para el sistema SPINES² propuesto. Por tanto, los temas centrales de

los proyectos de investigación, estudios y cursos que interesan a la presente encuesta han sido clasificados bajo una de las categorías temáticas siguientes :

01. Teoría, filosofía y sistematización de la ciencia y la tecnología.
02. Historia de la ciencia y la tecnología.
03. Sociología y ética de la ciencia y la tecnología ; la ciencia y la sociedad.
04. Creatividad y psicología de los investigadores científicos.
05. Economía de la ciencia y de la tecnología (métodos de planificación, de gestión y de financiamiento).
06. Análisis y evaluación del potencial científico y tecnológico (recursos humanos, financieros, de información e institucionales ; equipo e instalaciones).
07. Teoría y práctica de las políticas nacionales de ciencia y tecnología ; legislación nacional en materia de ciencia y tecnología.
08. Previsión científica y tecnológica.
09. Transferencia, difusión e implementación de tecnologías.
10. Organización y gestión de las actividades científicas y tecnológicas a nivel de la institución o del ejecutor.
11. Cooperación, legislación y política internacionales en la esfera de la ciencia y la tecnología.
12. Análisis y evaluación, del punto de vista de la sociedad, del contenido general y de los resultados de planes, programas y proyectos relativos a ciencia y tecnología.

C. Procedimientos en el terreno y organización de la encuesta

Cuestionario :

Para reunir los datos se utilizó un cuestionario tipo. Se envió por correo a instituciones en todos los Estados Miembros de la Unesco, en español, francés, inglés o ruso, según la lengua utilizada por el país interesado en su correspondencia oficial con la Unesco.

Lista de destinatarios del cuestionario :

Para establecer la lista de las instituciones que pudieran realizar investigaciones y/o desarrollar actividades de formación en la materia de la que se ocupa la encuesta, la Secretaría de la Unesco examinó varias publicaciones periódicas relacionadas con las políticas de ciencia y tecnología, así como diversas guías entre las que cabe mencionar particularmente :

1. Europa Publications Limited. *The World of Learning 1978-79*, 29th edition, London, 1978. 2 038 p.

1. Véase « *Science policy research and teaching units/Unités de recherche et enseignement en politique scientifique* », Paris, 1971, 380 p. (Nº 28 de la serie « Estudios y Documentos de Política Científica »).

2. El Programa SPINES (Sistema de intercambio de informaciones sobre las políticas científicas y tecnológicas) que conduce la Unesco, bajo la égida del cual esta encuesta ha sido llevada a cabo, tiene por finalidad la de facilitar la gestión a nivel nacional y el intercambio a nivel internacional de datos bibliográficos y concretos que son necesarios para una política científica y tecnológica. Los campos cubiertos por estos datos son descritos de manera detallada en el documento Unesco/NS/ROU/409 rev 2, fechado en junio de 1978.

2. Heitowitz, E. ; Epstein, J. ; Steinberg, G. *Science, Technology and Society : A Guide to the Field*, Ithaca, New York, Cornell University, Program on Science, Technology and Society, 1978. 577 p.

3. Unesco. *Science policy research and teaching units/Unités de recherche et d'enseignement en politique scientifique*, Paris, 1971. 380 p. (Estudios y Documentos de Política Científica).

La consulta a las Comisiones Nacionales de la Unesco en los Estados Miembros también contribuyó a preparar la lista de destinatarios del cuestionario.

Colecta de datos :

El cuestionario se envió por primera vez en septiembre de 1979 ; a intervalos regulares se enviaron cuatro notas recordatorias, la última en agosto de 1980. Se verificó la exactitud y la pertinencia de las respuestas de los cuestionarios completados que recibió la Secretaría. En algunas respuestas se notificaban proyectos de investigación o cursos en diversos campos de las ciencias básicas y aplicadas, tales como química, física, matemáticas, geología, etc. ; se eliminaron esas respuestas porque trascendían el marco de la encuesta, según lo definía el propio cuestionario. Además, fue imposible tener en cuenta todas las respuestas recibidas por la Secretaría después del 31 de marzo de 1981, cuando se había terminado la composición tipográfica y la fotocomposición del Repertorio. Sin embargo, serán incorporadas al tratamiento automático de datos en el que se apoya el presente Repertorio, que la Unesco se propone actualizar regularmente.

Tratamiento automatizado de datos :

Los datos recogidos por la Unesco proceden de los cuestionarios rellenos que recibió la Secretaría. Para procesar en computadora los resultados de la encuesta, y establecer de esa manera su banco de datos, la Secretaría recurrió al ISIS*, sistema rápido de programación para almacenamiento, tratamiento y recuperación de información alfanumérica. La versión original del ISIS fue establecida en 1964 por la Oficina Internacional del Trabajo (OIT). Por su parte, la Unesco creó una nueva versión OS (Sistema de Operación) del ISIS, que utiliza computadoras a gran escala, de la cual es el único distribuidor.

El presente Repertorio forma parte del Banco de Datos Automatizado de la Unesco en materia de política científica y tecnológica, a la que las Comisiones Nacionales de la Unesco en los Estados Miembros pueden solicitar información, también en forma de cintas magnéticas. Además se prevé la actualización periódica del banco de datos y la extensión progresiva de su alcance a los órganos gubernamentales y parlamentarios que intervienen en las políticas científicas y tecnológicas.

Limitaciones y actualización de la encuesta :

Los usuarios de este Repertorio deberían tener presente que no pretende ser exhaustivo. Ninguna

*ISIS. « Integrated Set of Information Systems » (« Juego integrado de sistemas de información »).

encuesta realizada por correo puede estar exenta de omisiones importantes, como era de esperar. Algunos destinatarios potenciales no recibieron el cuestionario, otros no respondieron o sus respuestas se extraviaron, a lo cual se suman las respuestas que no llegaron a tiempo a la Secretaría para su inclusión en el Repertorio. Por consiguiente, quienes reciban la presente publicación están cordialmente invitados a informar a la Secretaría de la Unesco³ acerca de carencias, errores u omisiones que pudieran encontrar al consultarla. La Secretaría actualizará su banco de datos en consecuencia, e incorporará la información que falta en una edición posterior del Repertorio.

D. Breve análisis del resultado de la encuesta

Figuran en el presente Repertorio 1 117 unidades de 84 Estados Miembros de la Unesco que informan acerca de más de 2 970 proyectos de investigación o estudios o cursos. Aproximadamente 890 de esas unidades (80 %) realizan proyectos de investigación o estudios, y 675 (60 %) imparten cursos en materia de política científica y tecnológica. 450 unidades (40 %) realizan proyectos de investigación o estudios y organizan cursos.

La cantidad de personas responsables de proyectos de investigación, estudios y cursos es de 5 184. Aproximadamente 3 583 (69 %) se ocupan de proyectos de investigación o de estudios y los 1 601 restante (31 %) de cursos. Por otra parte, el Repertorio indica igualmente los nombres de aproximadamente 1 060 directores de unidad.

Más del 63 % de las unidades enumeradas en el Repertorio señalan que pueden proporcionar despachos, equipos técnicos y otros servicios subsidiarios a investigadores visitantes. Más del 70 % de las unidades poseen una biblioteca o una colección de libros o publicaciones periódicas especializadas en materia de política científica y tecnológica a su disposición, y en un porcentaje algo menor, el 65 %, tienen medios para el tratamiento automatizado de datos, tales como terminales a distancia, pantallas de video, impresoras, etc., a la disposición de su personal. El 58 % de las unidades tienen personal y medios propios para publicar libros y/o revistas.

La mayor proporción de actividades de investigación en comparación con las actividades docentes se observa en el número de proyectos de investigación o estudios (1 606) y el correspondiente a los cursos (1 368).

En lo que concierne a la categoría de los proyectos de investigación o estudios, podemos destacar que :

— 13,9 % de ellos, o sea 223, pertenecen a la categoría temática nº 2, « Historia de la ciencia y la tecnología ».

— 13,6 % de ellos, o sea 218, pertenecen a la categoría temática nº 9, « Transferencia, difusión e implementación de tecnologías ».

3. La correspondencia debe dirigirse a :

Señor Director
División de Políticas Científicas y Tecnológicas
UNESCO
7, Place de Fontenoy
75700 Paris
Francia

— 12,6 % de ellos, o sea 202, pertenecen a la categoría temática n° 7, « Teoría y práctica de las políticas nacionales de ciencia y tecnología ; legislación nacional en materia de ciencia y tecnología ».

En lo que concierne a los cursos, podemos notar que :

— 27,9 % de ellos, o sea 381, tienen por enfoque principal la categoría temática n° 2, « Historia de la ciencia y la tecnología »,

— 16,1 % de ellos, o sea 220, tienen por enfoque principal la categoría temática n° 1, « Teoría, filosofía y sistematización de la ciencia y la tecnología ».

— 15,4 % de ellos, o sea 211, tienen por enfoque principal la categoría temática n° 3, « Sociología y ética de la ciencia y la tecnología ; la ciencia y la sociedad ».

Es igualmente importante hacer resaltar que la categoría temática n° 4, « Creatividad y psicología de los investigadores científicos », es aquella que menos ha sido tratada por los proyectos de investiga-

ción o estudios, o sea sólo 31 (1,9 %). Además, la categoría temática n° 6, « Análisis y evaluación del potencial científico y tecnológico », es la que menos ha sido tratada por los cursos, o sea sólo 14 (1 %).

También cabe señalar aquí la distribución geográfica de las unidades puesto que refleja de manera muy significativa el nivel de desarrollo en materia de políticas científicas y tecnológicas en las distintas regiones del mundo. Si bien 74,4 % de las unidades enumeradas, es decir 831, pertenecen a la región de Europa y América del Norte, a la región africana sólo pertenecen el 1,6 %, o sea 18 unidades. A los Estados Arabes corresponden 20 unidades (1,8 %), a la región de América Latina y el Caribe 96 (8,6 %), y 152 a la región de Asia (13,6 %).

Por último, cabe señalar que en el presente Repertorio se enumeran unas 1 080 publicaciones periódicas que contienen material relativo a las políticas científicas y tecnológicas, y aproximadamente 640 editoriales que publican otro tipo de publicaciones en la materia.

ORGANIZACION Y UTILIZACION DEL REPERTORIO

El Repertorio consta de dos partes, la sección de Asientos Principales y la sección de Indices de Referencia.

SECCION DE ASIENTOS PRINCIPALES

En la sección de ASIENTOS PRINCIPALES, los asientos tienen un número secuencial de referencia y figuran en orden alfabético bajo el nombre de la organización matriz en la lengua original del país de que se trata.

El nombre del país figura en inglés, francés y español, antes del primer asiento para un país determinado, en la esquina superior derecha de cada página del Repertorio ; los países figuran siguiendo el orden alfabético inglés.

Cuando procede, el nombre de la unidad, es decir la entidad administrativa en la que se llevan a cabo los proyectos de investigación, estudios y/o cursos, aparece en la lengua original bajo el nombre de la organización matriz. La traducción del nombre de la organización matriz y/o las unidades que aparece en otra lengua que el inglés, francés o español, figura, cuando ella es disponible, en una de esas lenguas, después del nombre en la lengua original. Cuando corresponde, figura entre paréntesis, debajo del nombre completo, la sigla del nombre de la organización matriz, y/o la unidad.

Las otras informaciones figuran en cada asiento estructuradas en siete rúbricas. La estructura tipo de dicho asiento figura a continuación :

0060 UNIVERSITY OF WOLLONGONG

Department of History and Philosophy of Science

- ① a. P.O. Box 1144
Wollongong, New South Wales - 2517
- b. (042) 297311
- c. Uniofwol

- ⑥ Research Policy (United Kingdom)
Search (Australia)
Social Studies of Science (United Kingdom)
- ⑦ Australian Government Publishing Service
(Australia)
Croom Helm (United Kingdom)
Sijthoff and Noordhoff (Netherlands)

- ① a. : Dirección.
- b. : Número de teléfono, precedido entre paréntesis cuando corresponde, del código telefónico de la ciudad ;
- c. : Dirección telegráfica ;
- d. : Número de telex.
- ② : Nombre y apellido del Jefe de la Unidad.
- ③ : Servicios y actividades de la unidad. Véase la clave de codificación para la rúbrica ③ (página XXIII).
- ④ : Proyectos de investigación o estudios de la unidad. Véase la clave de codificación para la rúbrica ④ (página XXIV).
- ⑤ : Cursos de la unidad. Véase la clave de codificación para la rúbrica ⑤ (página XXIV).
- ⑥ : Nombre de la publicación periódica donde se haya publicado el material producido por la unidad ; entre paréntesis figura el nombre del país en donde se publica la misma.
- ⑦ : Nombre de la editorial de otras publicaciones (no periódicas) preparadas por la unidad, seguido, entre paréntesis, del nombre del país de origen de la editorial.

Clave de codificación para la rúbrica ③ : Servicios y actividades de la unidad

- ① = Biblioteca o colección especializada de libros y/o publicaciones periódicas relativos a las políticas científicas y tecnológicas al alcance de los miembros del personal de la unidad.
- ② = La unidad cuenta con servicios y personal propios para producir publicaciones (libros y/o revistas).
- ③ = Existen servicios computarizados de procesamiento de datos, tales como terminales a distancia, pantallas video, impresoras, etc., a disposición del personal de la unidad.
- ④ = La unidad puede proporcionar oficinas, equipo técnico y/u otros servicios de apoyo necesarios a los investigadores invitados.
- ⑤ = La unidad ha celebrado conferencias, seminarios, simposios y/u otras reuniones científicas en los dos últimos años.
- ⑥ = La unidad realiza proyectos de investigación o estudios en el campo de las políticas científicas y tecnológicas.
- ⑦ = La unidad imparte cursos en el campo de las políticas científicas y tecnológicas.

Nota : Si uno de los servicios y/o actividades mencionados arriba no se encuentran disponibles, no figurará el número de la clave de codificación correspondiente.

Clave de codificación para la rúbrica ④ : Proyectos de investigación o estudios realizados por la unidad

Rúbrica ④ de un asiento tipo :

④ a. Australian Science Policy : the State of University Research. 1978-1982
 b. Johnston, R.
 c. 06/10, 05, 03:3

④ a. : Título del proyecto de investigación o estudio, en inglés, francés o español, seguido, cuando se dispone de él, del año de comienzo y del año de finalización del proyecto de investigación o estudio. Cuando se trata de proyectos de investigación o estudios permanentes, el año de finalización se reemplaza por dos guiones (--), por ejemplo, 1978--. Cuando se desconoce el año de comienzo, pero figura el año de finalización, este último va precedido de dos guiones, por ejemplo, --1983.

b. : Nombre del *Director* del proyecto/estudio, seguido, cuando procede, después de una línea oblicua (/), de los nombres de otros cinco encargados del proyecto como máximo.

c. : Nombre de la categoría temática (consúltese la página XX con la lista completa) que constituye el enfoque principal del proyecto de investigación o estudio, seguido, cuando procede, después de una línea oblicua (/), de los números de otras tres categorías temáticas como máximo que, en orden de prioridad, también abarque el proyecto de investigación o estudio. A continuación figura, después del signo (:), un número de 1 a 4 que indica en qué medida la unidad tiene acceso a la *información* correspondiente al tema del proyecto de investigación o estudio, producida fuera del país en el que está situada la unidad.

La escala es la siguiente :

- 1 : Prácticamente ninguna información disponible ;
- 2 : Poca información disponible ;
- 3 : Una cantidad moderada de información disponible ;
- 4 : Abundante información disponible.

Clave de codificación para la rúbrica ⑤ : Cursos impartidos por la unidad

Rúbrica ⑤ de un asiento tipo :

⑤ a. Science and Society
 1975/∞/078h^U/AC/\$:0/☞
 b. Forge, J.
 c. 03/02, 01, 07:4

⑤ a. : Título del curso en inglés, francés o español. Bajo el título del curso, una serie de 7 elementos de datos, separados entre sí por líneas oblicuas (/), proporciona las siguientes informaciones disponibles sobre el curso :

— El año en que se impartió por primera vez el curso.

— Periodicidad del curso :

- ∅ = no periódico
- ∞ = periódico

— Duración del curso en horas (h).

— Nivel del curso :

- ∅ = sin jerarquía académica
- U = nivel de grado universitario
- U = nivel de postgrado

— Horario en que se imparte el curso :

- ☞ = curso diurno
- ☞☞ = curso diurno de verano
- ☞C = curso nocturno
- ☞ = curso breve o especial (o ad hoc), de dos semanas como mínimo

— Derechos de matrícula (\$) :

- 0 = no se exigen derechos de matrícula
- 1 = se exigen derechos de matrícula

— Título correspondiente al curso :

- ☞ = el curso no forma parte del programa de estudios
- ☞ = el curso conducente a un diploma, título o certificado.

b. : Nombre de tres profesores, como máximo, encargados del curso.

c. : Nombre de la categoría temática (consúltese la página XX, con la lista completa) que constituye el enfoque principal del curso, seguido cuando corresponde, después de una línea oblicua (/), de los números de otras tres categorías temáticas como máximo, que en orden de prioridad estén también relacionadas con el curso. A continuación figura, después del signo (:), un número de 1 a 4 que indica en qué medida la unidad tiene acceso a la *información* correspondiente al tema del curso, producida fuera del país en el que está situada la unidad.

La escala es la siguiente :

- 1 : Prácticamente ninguna información disponible ;
- 2 : Poca información disponible ;
- 3 : Una cantidad moderada de información disponible ;
- 4 : Abundante información disponible.

SECCION DE INDICES DE REFERENCIA

La sección de INDICES DE REFERENCIA se compone de 8 listas. En esta sección los asientos están dispuestos en orden alfabético, y las 6 primeras listas también lo están por países. Después de cada asiento figura el número de referencia de la sección de asientos principales.

1. Lista de las organizaciones matrices y sus unidades.
2. Lista de los jefes de las unidades.
3. Lista de organizaciones matrices dispuestas según el enfoque principal (12 enfoques principales) en sus proyectos de investigación o estudios.

4. Lista de organizaciones matrices dispuestas según el enfoque principal (12 enfoques principales) de los cursos.
 5. Lista de las unidades que ponen facilidades de trabajo a la disposición de investigadores invitados.
 6. Lista de unidades que poseen una biblioteca especializada o una colección especializada de libros y/o publicaciones periódicas en el campo de las políticas científicas y tecnológicas.
7. Lista de publicaciones periódicas donde aparece material relativo a la política científica y tecnológica.
 8. Lista de editoriales que producen otras publicaciones, no periódicas, en el campo de las políticas científicas y tecnológicas.
