P R E F A C E

The Unesco series "Science policy studies and documents" was established in 1963 as part of the Organization's "Programme of information on science policy of Member States" for the years 1963-1964, authorized by Resolution No. 2.312 of the General Conference at its 12th session (1962). The first issue in the series was published in 1965.

The series is intended for science and technology policy-makers and policy analysts in government administration, research organizations, and academic circles as well as for development planners and researchers interested in issues of scientific and technological development.

The series comprises three broad types of documents: country studies, technical documents and reports of international meetings. The **country studies**, which are carried out by national authorities responsible for policy-making in science and technology, contain policy statements and descriptive information on national priorities, organization and resources for science and technology. The **technical documents** cover a range of topics, from

methods of policy analysis and organizational analysis to manuals on planning techniques and directories of institutions. The **reports of international meetings** contain the proceedings and decisions of policy forums convened by Unesco on priorities for cooperation in science and technology, as well as allied documentation covering regional analyses and reviews of scientific and technological development.

The present technical document forms part of clearing-house activities carried out within the framework of the Organization's science and technology policy programme. The publication updates information included in the directory published in 1981 and entitled : "World directory of research projects, studies and courses in science and technology policy" (No. 49 in the series). It is hoped that this updated directory will help improve communications among research specialists with similar interests, as well as between policy-makers and policy researchers, thereby contributing to the development of networks for training and research in studies of science and technology policies.

INTRODUCTION

A. Historical background

-Over the years, scientific and technological activities have attracted increased attention from the political, business and economic communities, from government administration and from academic circles because of their growing impact on modern societies and the magnitude of the resources devoted to them. Research activity aimed at studying the various facets of this evolution has grown concurrently and multi-disciplinary groups have gradually evolved to develop analytical instruments and techniques that could provide some theoretical basis for the formulation of policies in science and technology. Along with this research activity, teaching and training activity also underwent a similar expansion.

Unesco conducted its first survey of research and teaching units in the field of science and technology policy in the late sixties, and published a directory covering some 340 units located in Europe and North America (No. 28 in the series, Paris 1971). The interest shown in this type of information, and the continued expansion of research groups led Unesco to conduct a new survey with an international coverage in the late seventies. This resulted in an international directory containing information on some 1100 units (No. 49 in the series, Paris 1981).

B. Outline of the field

The field of science and technology policy, as a subject of investigation, covers a wide range of issues, and draws its perspectives from a variety of intellectual disciplines. The subject was empirically structured over the years from an analysis of country reports commissioned by Unesco, and from the debates and exchange of views expressed in meetings convened by the Organization. The scope of the subject, as defined in the survey, therefore reflects a significant amount of experience however, as is often the case with emerging interdisciplinary fields

dealing with social activity, it is characterized by evolving and uncertain boundaries. For the purpose of the survey which served as the basis for the 1981 directory, the field was broken down into the following twelve subject categories, used to characterize the major focus of research projects :

01. Theory, philosophy and systematization of science and technology.
02. History of science and technology
03. Sociology and ethics of science and technology, science and society.
04. Creativity and psycho-sociology of scientific researchers.
05. Economics of science and technology (i.e. planning, management and financing methods).
06. Analysis and assessment of scientific and technological potential (i.e. personnel, funds, information, institutions, equipment and facilities).
07. Theories and practices of national science and technology policy-making; national legislation in science and technology.
08. Science and technology forecasting and assessment.
09. Transfer, diffusion and implantation of technologies.
10. Organisation and management of scientific and technological activities at the institutional or performer's level.
11. International cooperation, policy and legislation in science and technology.
12. Societal analysis and assessment of the content and results of scientific and technological plans, programmes and projects.

This same classification is used in the present directory. It was originally devised essentially from the classification used in the Unesco developed SPINES thesaurus (N° 50 in the series, Paris 1978 and 1984), a documentation instrument for cataloguing and indexing science and technology policy documents.

C. Collection of data

The 1981 survey covered more than some 5000 establishments, and allowed a final selection of some 1100 entries for inclusion in the 1981 directory. The new survey, carried over the period 1984-1988, essentially covered the already identified 1100 units, and produced the updated information which was reported by some 730 of them. In addition, a number of new units not included in the earlier edition and which had since been brought to our attention were contacted by mail, with the help of a standardized questionnaire.

This new edition contains information received by the Secretariat up until December 1988, when the type-setting and photo-composition of the directory was undertaken.

The Secretariat will continue to collect the same type of information and integrate it into the related computerized data-base. The users of the directory are therefore kindly requested to bring to the attention of the Secretariat ^{1/} any omissions or shortcomings which they may have found in it.

FRANCE

ORGANIZATION AND USE OF THE DIRECTORY

The Directory consists of two parts, a MAIN ENTRY section and a section for INDEXES.

MAIN ENTRY SECTION

In the MAIN ENTRY section, entries are assigned a sequential reference number and appear within a country alphabetically by the name of the parent organisation in the original language.

The name of the country appears in English, French and Spanish before the first entry for a given country and in the upper corner of each page of the Directory; the countries being arranged in the English alphabetical order.

Wherever applicable, the name of the unit, i.e. the administrative entity in which relevant research projects, studies and/or courses are being conducted, appears in the original language under the name of the parent organisation. The translation of the names of those parent organisations and/or units appearing in other languages than English, French or Spanish is given when available in one of these languages, after an oblique line following the corresponding name in the original language. Where appropriate, the acronym of the name of the parent organisation and/or that of the unit is also given in parenthesis under the corresponding full name.

The structure of data elements for the rest of the entry is composed of 8 zones. It is explained below with the help of a typical entry :

0089 MCMASTER UNIVERSITY	
Department of History.	
1 a.	1280 Main Street West Hamilton, Ontario - L8S 4L8
b.	(416) 5259140 x4271
2	Rempel, Richard
3	[1] [2] [3] [4] [5] [6] [7]
4 a. Bertrand Russel Editorial Project (based on the archives of Bertrand Russell). 1977-1994	
b.	Rempel, R./ Blackwell, K.; Brink, A.; Griffin, N.; Slater, J.
c.	01/11,02,03:4
5 a. History of Science. 1967-*/130H/4/&*/\$:1/5	
b.	Grinney, G.
c.	02/03,01,04:4
6 Journal of the History of Ideas (USA) Kronos (USA) Queen's Quarterly (Canada) Russell: the Journal of the Bertrand Russell Archives (Canada) Science Forum (Canada)	
7 George Allen and Unwin (UK) Hakkert (Canada)	
8 a. Newtonianism, Darwinism. 1965-1983	
b.	Grinnell, G.
c.	02/03,04,01:4

X

- 1 a. : Address.
- b. : Telephone number, preceded where available by the telephone code of the town in parenthesis.
- c. : Telegraphic address.
- d. : Telex number.
- 2 : Name and first name of the Head of the unit.
- 3 : Facilities and activities of the unit. See below for the codification key
- 4 : Research projects/studies of the unit. See codification key for zone 4 (page XI).
- 5 : Courses of the unit. See codification key for zone 5 (page XI).
- 6 : Name of the periodical having published material produced by the unit; followed by, in parenthesis, the name of the country where the periodical is published.
- 7 : Name of the publisher having issued publications (other than periodicals) prepared by the unit, followed by, in parenthesis, the name of the originating country of the publisher.
- 8 : Completed research projects/studies of the unit. Codification key as for zone 4.

Codification key for zone 3 : *Facilities and activities of the unit*

- [1] = Library or specialized collection of book and/or periodicals in the field of science and technology policy is readily available to the staff members of the units.
- [2] = Unit has access to in-house staff and facilities for issuing publications (books and/or journals).
- [3] = Computerized data processing facilities such as remote terminals, video screens, printers, are available to the staff members of the unit.
- [4] = Unit can provide office space, technical equipment and/or other necessary support services to visiting researchers.
- [5] = Unit has held conferences, seminars, symposia and/or other scientific meetings within the past two years.
- [6] = Unit conducts research projects/studies in the field of science and technology policy.
- [7] = Unit offers courses in the field of science and technology policy.

Note : Should any of the above mentioned facilities and/or activities not be available, the corresponding codification key number will be absent.

Codification key for zone 4 : Research projects/studies conducted by the unit

Zone 4 of a typical entry :

<p>4 a. Bertrand Russell Editorial Project (based on the archives of Bertrand Russell). 1977-1994</p> <p>b. Rempel, R./ Blackwell, K.; Brink, A.; Griffin, N.; Slater, J.</p> <p>c. 01/11,02,03:4</p>

- 4 a : Title of the research projects/study in English, French or Spanish, followed where available by the year of beginning and the year of completion of the research project/study. In the case of permanent ongoing research projects/studies, the year of completion is replaced by two dashes (--) e.g. 1986--. Where the year of beginning is unknown, but the year of completion is stated, the latter is preceded by two dashes (--) e.g. --1989.
- b : Name of the project/study *Leader* followed where appropriate, after an oblique line (/) by the names of up to five other project officers.
- c : Number of the subject category (see page VIII for the complete list) constituting the major focus of the research project/study followed where appropriate, after an oblique line (/) by the numbers of up to three other subject categories which, in order of priority, are also covered by the research project/study. This information is followed where available, after a punctuation mark of a colon (:) by a number 1 to 4 indicating the extent to which *information* relevant to the subject matter of the project/study and produced outside the country in which the unit is located, is available to the unit.

The rating scale is :

- 1 : Practically no information available;
- 2 : Little information available;
- 3 : Moderate amount of information available;
- 4 : Detailed information available.

Codification key for zone 5 : Courses offered by the unit

Zone 5 of a typical entry :

<p>5 a. History of Science. 1967/»/130H/μ/8*/\$:1/5</p> <p>b. Grinney, G.</p> <p>c. 02/03,01,04:4</p>

5 a : Title of the course in English, French or Spanish. Under the title of the course a set of 7 data elements, each separated by an oblique line (/), gives where available the following information on the course :

- Year in which the course was first given
- Periodicity of the course :
 - << = not periodical
 - >> = periodical
- Duration of the course in hours (H)
- Level of the course :
 - μ̄ = not academic status
 - μ = graduate level
 - μ̄ = postgraduate level
- Time of the holding of the course :
 - &° = day-time course
 - &°° = day-time summer course
 - &• = evening course
 - & = occasional (or ad hoc) course 2 weeks minimum
- Course fees (\$) : 0 = No fee requested
1 = Fee requested
- Course certificate :
 - § = course is not part of a curriculum leading to a diploma
 - § = course is degree or certificate

b : Names of up to 3 lecturers responsible for the course.

c : Number of the subject category (see page VIII for the complete list) constituting the major focus of the course, followed where appropriate, after an oblique line (/) by the numbers of up to three other subject categories which, in order of priority, are also covered by the course. This information is followed where available and after a punctuation mark of a colon (:) by a number 1 to 4 indicating the extent to which *information* relevant to the subject matter of the course and produced outside the country in which the unit is located, is available to the unit.

The rating scale is :

- 1 : Practically no information available;
- 2 : Little information available;
- 3 : Moderate amount of information; available;
- 4 : Detailed information available.

Codification key for zone 8 : *completed research projects/studies* : as for zone 4 (page XI)

INDEXES SECTION

The INDEXES section is composed of 8 lists. The entries in this section are arranged alphabetically and, as far as the lists 1, 3, 4, 5 and 6 are concerned, also by country. All the entries are followed by their respective reference number of the main entry section.

1. List of the parent organizations and their units.
2. List of the heads of the units.
3. List of parent organizations arranged by major focus (12 foci) of their research projects/studies.
4. List of parent organizations arranged by major focus (12 foci) of their courses.
5. List of units offering facilities for visiting researchers.
6. List of units having a specialised library or specialised collection of books and/or periodicals in science and technology policy.
7. List of periodicals publishing material in the field of science and technology policy.
8. List of publishers issuing other publications than periodicals in the field of science and technology policy.

P R E F A C E

La collection "Etudes et documents de politique scientifique" a été créée en 1963 par l'Unesco dans le cadre de son "Programme d'information sur la politique scientifique des Etats membres" pour les années 1963 et 1964, en exécution de la résolution 2.312 adoptée par la Conférence générale à sa douzième session (1962). Le premier numéro de la collection a été publié en 1965.

Cette collection s'adresse aux décideurs, chercheurs et universitaires spécialisés dans l'élaboration et l'analyse des politiques scientifiques et technologiques ainsi qu'aux planificateurs du développement et aux chercheurs s'intéressant au développement scientifique et technologique.

Elle comprend trois grandes catégories de documents : des études nationales, des documents techniques et des rapports de réunions internationales. Les études nationales, préparées par les autorités responsables de la politique scientifique et technologique dans les pays considérés, énoncent les grands principes qui sous-tendent cette politique et décrivent les priorités et modalités d'organisation ainsi que les ressources disponibles dans ces pays, en matière de science et de technologie. Les **documents techniques** couvrent une série de domaines allant des méthodes d'analyse des politiques et des structures organisationnelles

à des manuels sur les techniques de la planification en passant par des répertoires d'institutions. Les **rapports de réunions internationales** contiennent les comptes rendus des débats et les décisions des rencontres organisées par l'Unesco en vue de dégager les priorités de la coopération scientifique et technologique, ainsi qu'une documentation connexe regroupant des analyses régionales et des études faisant le point du développement scientifique et technique.

Le présent document technique s'inscrit dans le cadre des activités d'échange d'information menées au titre du programme de l'Organisation en matière de politique scientifique et technologique. Elle actualise les informations contenues dans le répertoire publié en 1981 sous le titre : "Répertoire mondial de projets de recherche, d'études et de cours dans le domaine des politiques scientifiques et technologiques" (n° 49 de collection). Le Secrétariat de l'Unesco espère que ce répertoire ainsi mis à jour améliorera la communication entre spécialistes poursuivant des recherches analogues ainsi qu'entre responsables et chercheurs en matière d'élaboration des politiques, contribuant de la sorte à la mise en place de réseaux de formation et de recherche dans le domaine de l'étude des politiques scientifiques et technologiques.

INTRODUCTION

A. Historique

L'intérêt que les milieux politiques, économiques et d'affaires, l'administration publique et les milieux académiques portent aux activités scientifiques et technologiques est allé croissant au fil des ans en raison de l'impact de plus en plus grand de ces activités sur les sociétés modernes et de l'ampleur des ressources qui leur sont consacrées. Dans le même temps, les activités de recherche visant à étudier les multiples aspects de cette évolution se sont intensifiées et des groupes multidisciplinaires se sont progressivement constitués pour mettre au point des instruments et des techniques d'analyse susceptibles de fournir une base théorique pour la formulation des politiques scientifiques et technologiques. Parallèlement à ce travail de recherche, l'enseignement et la formation ont connu une expansion comparable.

L'Unesco a mené sa première enquête sur les unités de recherche et d'enseignement dans le domaine de la politique scientifique et technologique à la fin des années 60 et publié un répertoire recensant quelque 340 unités situées en Europe et en Amérique du Nord (n° 28 de la collection, Paris 1971). L'intérêt suscité par ce type d'information et l'expansion ininterrompue des groupes de recherche l'a incitée à procéder à une nouvelle enquête, cette fois sur une échelle internationale, vers la fin des années 70. Cette enquête a débouché sur la publication d'un répertoire international contenant des renseignements sur quelque 1 100 unités (n° 49 de la collection, Paris 1981).

B. Délimitation du domaine couvert

La politique scientifique et technologique, en tant qu'objet d'étude, recouvre une grande variété de domaines et base son champ d'action sur des disciplines intellectuelles très diverses. Au fil des ans, ce domaine d'étude a été structuré de façon empirique à partir de l'analyse des rapports nationaux établis à la demande de l'Unesco et sur la base des débats et des échanges de vues ayant eu lieu lors des réunions convoquées par l'Organisation. C'est donc en fonction d'une expérience non négligeable qu'a été déterminée

son étendue, telle qu'elle est définie dans l'enquête; cela étant comme beaucoup de nouveaux domaines interdisciplinaires intéressant l'activité sociale, ses frontières sont mouvantes et floues. Aux fins de l'enquête sur la base de laquelle a été établi le répertoire de 1981, ce domaine a été subdivisé en douze grandes catégories thématiques, qui servent à identifier l'orientation principale des projets de recherche :

01. Théorie, philosophie et systématisation de la science et de la technologie.
02. Histoire de la science et de la technologie.
03. Sociologie et éthique de la science et de la technologie, science et société.
04. Créativité et psychosociologie des chercheurs scientifiques.
05. Economie de la science et de la technologie (i.e. méthodes de planification, de gestion et de financement).
06. Analyse et évaluation du potentiel scientifique et technologique (i.e. personnel, fonds, information, institutions, équipements et installations).
07. Théories et pratiques des politiques scientifiques et technologiques nationales, législation nationale relative à la science et à la technologie.
08. Prévision scientifique et technologique.
09. Transfert, diffusion et implantation des technologies.
10. Organisation et management des activités scientifiques et technologiques au niveau de l'institution ou des exécutants.
11. Coopération, législation et politiques internationales dans le domaine de la science et de la technologie.
12. Analyse et évaluation d'ordre sociétal du contenu et des résultats généraux des plans, programmes et projets concernant la science et la technologie.

Cette classification est celle qui est utilisée dans le présent répertoire. A l'origine, elle a été établie essentiellement à partir de la classification employée dans le Thésaurus SPINES élaboré par l'Unesco (n° 50 de la collection, Paris 1978 et 1984), instrument documentaire pour le catalogage et l'indexation des documents de politique scientifique et technologique.

C. Collecte des données

L'enquête menée en 1981 a porté sur plus de 5 000 établissements et permis de sélectionner finalement quelque 1100 entrées destinées à figurer dans le répertoire de 1981. La nouvelle enquête, menée de 1984 à 1988, a porté essentiellement sur les 1100 unités déjà identifiées et permis de mettre à jour les informations concernant 730 d'entre elles environ. En outre, un certain nombre d'unités nouvelles qui ne figuraient pas dans l'édition antérieure et qui ont été depuis signalées à notre attention ont été contactées par courrier et un questionnaire normalisé leur a été adressé.

Cette nouvelle édition contient les informations reçues par le Secrétariat jusqu'en décembre 1988, mois au cours duquel a été lancée la fabrication technique du répertoire.

Le Secrétariat continuera à réunir le même type d'informations et à les intégrer à la base de données informatisée correspondante. Les utilisateurs du répertoire sont par conséquent invités à bien vouloir lui signaler^{1/} toute omission ou insuffisance qu'ils pourraient y relever.

ORGANISATION ET UTILISATION DU REPERTOIRE

Le Répertoire comprend deux parties : la partie principale pour les FICHES DESCRIPTIVES et la partie des INDEX DE REFERENCE.

LES FICHES DESCRIPTIVES

Les FICHES DESCRIPTIVES reçoivent un numéro de référence séquentiel et sont classées dans le pays concerné par ordre alphabétique des noms des organisations mères dans la langue originale.

Le nom du pays figure en anglais, français et espagnol avant la première fiche descriptive relevant du pays, et dans le coin supérieur de chaque page du Répertoire : les pays étant classés dans l'ordre alphabétique anglais.

Quand il y a lieu, le nom de l'unité, c'est-à-dire l'entité administrative qui est le siège de recherche, d'études et/ou de cours, apparaît dans la langue originale sous le nom de l'organisation mère. La traduction des noms des organisations mères et/ou des unités qui apparaissent dans une autre langue qu'anglaise, française ou espagnole, est donnée, lorsqu'elle est disponible, dans une de ces langues après le nom dans la langue originale. De plus, le cas échéant, le sigle du nom de l'organisation mère et/ou celui de l'unité figure entre parenthèses sous le nom complet concerné.

Les autres renseignements figurant dans chaque fiche descriptive sont structurés en 8 rubriques. La structure adoptée est décrite ci-dessous à l'aide d'une fiche descriptive caractéristique.

0089 MCMASTER UNIVERSITY	
Department of History.

- 1 a. : Adresse.
- b. : Numéro de téléphone, précédé s'il y a lieu de l'indicatif téléphonique de la ville entre parenthèses.
- c. : Adresse télégraphique.
- d. : Numéro de télex.
- 2 : Nom et prénom du directeur de l'unité.
- 3 : Installations et activités de l'unité. Voir ci-dessous code de la rubrique 3.
- 4 : Projets de recherche/études de l'unité. Voir code de la rubrique 4 (page XVII).
- 5 : Cours de l'unité. Voir code de la rubrique 5 (page XVII)
- 6 : Titre du périodique où sont parus les documents produits par l'unité, suivi, entre parenthèses, du nom du pays de publication du périodique.
- 7 : Nom de l'éditeur ayant publié des ouvrages (autres que des périodiques) réalisés par l'unité, suivi, entre parenthèses, du nom du pays d'origine de l'éditeur.
- 8 : Projets de recherche/études terminés. Se référer au code de la rubrique 4.

Code de la rubrique 3 : Installations et activités de l'unité

- [1] = Bibliothèque ou collection spécialisée d'ouvrages et/ou de périodiques dans le domaine des politiques scientifiques et technologiques facilement accessible aux membres du personnel de l'unité.
- [2] = L'unité peut utiliser le personnel et les installations de l'organisation pour faire paraître des publications (livres et/ou revues).
- [3] = Le personnel de l'unité a, à sa disposition, des installations de traitement automatique des données, telles que terminaux périphériques, terminaux à écran, imprimantes, etc.
- [4] = L'unité est en mesure de fournir des bureaux, des équipements et des installations techniques et/ou d'autres services de soutien nécessaires à des chercheurs invités.
- [5] = L'unité a organisé des conférences, des séminaires, des colloques et/ou d'autres réunions scientifiques au cours des deux dernières années.
- [6] = L'unité réalise des projets de recherche/études dans le domaine des politiques scientifiques et technologiques.
- [7] = L'unité offre des cours dans le domaine des politiques scientifiques et technologiques.

Note : Lorsque l'une quelconque de ces installations et/ou activités n'existe pas, on omet le numéro de code correspondant.

Code de la rubrique 4 : Projets de recherche/études menées par l'unité

Rubrique 4 d'une fiche descriptive caractéristique:

4 a. Bertrand Russell Editorial Project (based on the archives of Bertrand Russell). 1977-1994
b. Rempel, R./ Blackwell, K.; Brink, A.; Griffin, N.; Slater, J.
c. 01/11,02,03:4

4 a : Titre du projet de recherche/étude en anglais, espagnol ou français suivi, lorsqu'elles sont connues, de l'année du début et de l'année d'achèvement du projet de recherche/étude. Dans le cas de projets de recherche/études permanents, l'année d'achèvement est remplacée par deux tirets (--), exemple : 1986--. Si l'année du début n'est pas connue, mais que l'année d'achèvement est indiquée, cette dernière est précédée de deux tirets (--); exemple : --1989.

b : Nom du responsable du projet/étude, suivi, le cas échéant, après une barre oblique (/) du nom d'au plus cinq autres personnes chargées de la recherche.

c : Numéro du sous-domaine (voir page XIV la liste complète) constituant le thème principal du projet de recherche/étude, suivi, s'il y a lieu, après une barre oblique (/) des numéros d'au plus trois autres sous-domaines dans l'ordre de priorité, également couverts par l'activité en question. On trouve ensuite, le cas échéant, après un signe de ponctuation de deux points (:) un numéro de 1 à 4 indiquant dans quelle mesure l'unité dispose d'informations pertinentes pour le projet de recherche et/ou étude et produites à l'extérieur du pays où se trouve l'unité.

L'échelle d'appréciation est la suivante :

- 1 : Pratiquement aucune information accessible;
- 2 : Peu d'informations accessibles;
- 3 : Quantité modérée d'informations accessibles;
- 4 : Informations détaillées accessibles.

Code de la rubrique 5 : Cours offerts par l'unité

Rubrique 5 d'une fiche descriptive caractéristique:

5 a. History of Science.
1967/»/130H/μ/&*/\$:1/5
b. Grinney, G.
c. 02/03,01,04:4

5 a : Titre du cours en anglais, espagnol ou français. Sous le titre du cours, une série de 7 éléments, séparés chacun par une barre oblique (/), donne les renseignements suivants :

- Année où le cours a été donné pour la première fois

- Périodicité du cours :

<< = non périodique

>> = périodique

- Durée du cours en heures (H)

- Niveau du cours :

μ = niveau non universitaire

μ = niveau universitaire

μ = niveau universitaire supérieur

- Type du cours :

&° = cours dispensé dans la journée

&°° = cours d'été dispensé dans la journée

&* = cours du soir

& = cours occasionnel (ou ad hoc) d'une durée minimum de 2 semaines

- Droits à acquitter (\$) : { 0 = gratuit
1 = payant

- Nature du cours :

§ = le cours ne fait pas partie d'un programme d'études sanctionné par un diplôme, un grade ou un certificat
§ = le cours fait

b : Noms d'au plus trois personnes chargées du cours.

c : Numéro du sous-domaine (voir page XIV la liste complète) constituant le thème principal du cours, suivi, s'il y a lieu, après une barre oblique (/) des numéros d'au plus trois autres sous-domaines dans l'ordre de priorité, également couverts par le cours. On trouve ensuite, le cas échéant, après un signe de ponctuation de deux points (:) un numéro de 1 à 4 indiquant dans quelle mesure l'unité dispose d'informations pertinentes pour le thème des cours, et produites à l'extérieur du pays où se trouve l'unité.

L'échelle d'appréciation est la suivante :

- 1 : Pratiquement aucune information accessible;
- 2 : Peu d'informations accessibles;
- 3 : Quantité modérée d'informations accessibles;
- 4 : Informations détaillées accessibles.

Code de la rubrique 8 : *projets de recherche/études de l'unité terminés* : idem rubrique 4

LES INDEX DE REFERENCE

Cette partie comprend 8 listes. Les entrées dans toutes les listes sont classées par ordre alphabétique et, dans les listes 1, 3, 4, 5 et 6, également par pays. Toutes les entrées sont suivies des numéros de référence contenus dans la partie principale du Répertoire.

1. Liste des organisations mères et de leurs unités.
2. Liste des directeurs d'unités.
3. Liste des organisations mères classées selon le thème principal (12 thèmes principaux) de leurs projets de recherche/études.
4. Liste des organisations mères classées selon le thème principal (12 thèmes principaux) de leurs cours.
5. Liste des unités disposant d'installations utilisables par des chercheurs invités.
6. Liste des unités disposant d'une bibliothèque ou d'une collection spécialisée d'ouvrages et/ou de périodiques dans le domaine des politiques scientifiques et technologiques.
7. Liste des périodiques où paraissent des articles touchant à la politique scientifique et technologique.
8. Liste des éditeurs publiant des publications autres que des périodiques dans le domaine des politiques scientifiques et technologiques.

PREFACIO

La colección de la Unesco "Estudios y Documentos de Política Científica" se creó en 1963 como parte del "Programa de información de política científica de los Estados Miembros" de la Organización para los años 1963 y 1964, que había sido autorizado por la Resolución N° 2.312 de la Conferencia General en su 12a. reunión (1962). El primer número de la colección se publicó en 1965.

Esta colección está destinada a los responsables de las políticas científicas y tecnológicas y a los analistas de las políticas de la administración pública, las organizaciones de investigación y los círculos académicos, así como a los planificadores del desarrollo y a los investigadores interesados en temas de desarrollo científico y tecnológico.

La colección comprende tres grandes categorías de documentos: los estudios por países, los estudios técnicos, y los informes de reuniones internacionales. Los estudios por países, realizados por las autoridades gubernamentales encargadas de establecer la política de ciencia y tecnología, contienen declaraciones de política e información descriptiva sobre las prioridades, la organización y los recursos nacionales de ciencia y tecnología. Los estudios técnicos

abarcan una amplia gama de temas, desde los métodos de análisis de políticas y los análisis de organización hasta los manuales de técnicas de planificación y los repertorios de instituciones. Los informes de reuniones internacionales contienen las actas y las decisiones de reuniones de políticas convocadas por la Unesco sobre prioridades de cooperación en ciencia y tecnología, y documentación afín sobre análisis regionales y estudios de desarrollo científico y tecnológico.

El presente estudio técnico forma parte de las actividades de centro de intercambio de información del programa de política científica y tecnológica de la Organización. En esta publicación se actualiza la información del repertorio publicado en 1981 con el título "Repertorio mundial de proyectos de investigación, estudios y cursos relativos a las políticas científicas y tecnológicas" (N° 49 de la colección). Se espera que este repertorio actualizado contribuya a mejorar las comunicaciones entre los investigadores con intereses similares, entre las autoridades responsables de las políticas y los estudiosos, haciendo así una aportación al desarrollo de redes de formación e investigación en el campo de los estudios sobre las políticas científicas y tecnológicas.

INTRODUCCION

A. Antecedentes históricos

A lo largo de los años, las actividades científicas y tecnológicas, por su creciente repercusión en las sociedades modernas y la magnitud de los recursos que se les dedican, han ido despertando cada vez más atención en los círculos políticos, empresariales y económicos, la administración pública y los académicos. La actividad de investigación encaminada a estudiar las diferentes facetas de esta evolución ha ido incrementándose al mismo tiempo, y han surgido gradualmente grupos multidisciplinarios que han desarrollado mecanismos y técnicas de análisis para dotar de cierto fundamento teórico a la formulación de políticas de ciencia y tecnología. Junto con la investigación, también la enseñanza y la formación han experimentado un auge similar.

La Unesco realizó su primera encuesta de unidades de investigación y enseñanza en el campo de la ciencia y la tecnología a finales de decenio de los años sesenta y publicó un repertorio que abarcaba unas 340 unidades situadas en Europa y América del Norte (N° 28 de la colección, París, 1971). El interés demostrado por este tipo de información y la constante expansión de los grupos de investigación llevaron a la Unesco a efectuar una nueva encuesta de alcance internacional a finales de los años setenta. El resultado fue la publicación de un repertorio internacional con información relativa a unas 1.100 unidades (N° 49 de la colección, París 1981).

B. Definición del campo

El campo de la política científica y tecnológica como tema de investigación abarca una amplia gama de aspectos y perspectivas procedentes de diversas disciplinas intelectuales. El tema se estructuró empíricamente a lo largo de los años partiendo de un análisis de los informes por países encargados por la Unesco y de los debates y el intercambio de opiniones de las reuniones convocadas por la Organización. El alcance de tema, tal como se define en la

encuesta, refleja pues un acervo significativo de experiencia. No obstante, como suele suceder con campos interdisciplinarios nuevos relacionados con la actividad social, se caracteriza por lo cambiante de sus límites. A efectos de la encuesta que sirvió como base para el repertorio de 1981, la tema se desglosó en los siguientes doce campos temáticos, utilizados para definir el núcleo de los proyectos de investigación:

01. Teoría, filosofía y sistematización de la ciencia y la tecnología.
02. Historia de la ciencia y de la tecnología.
03. Sociología y ética de la ciencia y la tecnología, la ciencia y la sociedad.
04. Creatividad y psicología de los investigadores científicos.
05. Economía de la ciencia y de la tecnología (métodos de planificación, gestión y financiación).
06. Análisis y evaluación del potencial científico y tecnológico (recursos humanos, financieros, de información e institucionales; equipo e instalaciones).
07. Teorías y prácticas de las políticas nacionales de ciencia y tecnología; legislación nacional de ciencia y tecnología.
08. Previsión y evaluación científica y tecnológica.
09. Transferencia, difusión e implantación de tecnologías.
10. Organización y gestión de las actividades científicas y tecnológicas a nivel de la institución o del ejecutor.
11. Cooperación, legislación y política internacionales en ciencia y tecnología.
12. Análisis y evaluación sociales del contenido y de los resultados de planes, programas y proyectos de ciencia y tecnología.

En este repertorio, la misma clasificación se emplea. En principio se elaboró esencialmente a partir de la clasificación usada en el tesoro SPINES de la Unesco (n° 50 de la colección, París, 1978 y 1984), instrumento de documentación para la catalogación y la indexación de los documentos de políticas científicas y tecnológicas.

C. Acopio de datos

La encuesta de 1981 abarcaba más de 5.000 establecimientos y con ella se pudo hacer una selección final de unos 1.100 asientos para el repertorio de 1981. La nueva encuesta, realizada en el periodo 1984-1988, cubría esencialmente las 1.100 unidades ya identificadas y actualizó la información que proporcionaron 730 de ellas, aproximadamente. Además, se estableció relación por correspondencia, mediante un cuestionario normalizado, con algunas unidades nuevas que no figuraban en la edición anterior y de cuya existencia se había tenido conocimiento.

Esta nueva edición contiene información recibida por la Secretaría hasta diciembre de 1988, que fue cuando se iniciaron la composición y la fotocomposición del repertorio.

La Secretaría seguirá recogiendo el mismo tipo de información e integrándolo en la base de datos computadorizada correspondiente. Por tanto, se agradecería a los usuarios del repertorio que se sirvan señalar a la Secretaría^{1/} toda omisión o insuficiencia que hayan podido encontrar en él.

Clave de codificación para la rúbrica 4 : Proyectos de investigación o estudios realizados por la unidad

Rúbrica 4 de un asiento tipo :

<p>4 a. Bertrand Russell Editorial Project (based on the archives of Bertrand Russell). 1977-1994</p> <p>b. Rempel, R./ Blackwell, K.; Brink, A.; Griffin, N.; Slater, J.</p> <p>c. 01/11,02,03:4</p>

4 a : Título del proyecto de investigación o estudio, en inglés, francés o español, seguido, cuando se dispone de él, del año de comienzo y del año de finalización del proyecto de investigación o estudio. Cuando se trata de proyectos de investigación o estudios permanentes, el año de finalización se reemplaza por dos guiones (--), por ejemplo, 1986--. Cuando se desconoce el año de comienzo, pero figura el año de finalización, este último va precedido de dos guiones, por ejemplo, --1989.

b : Nombre del *Director* del proyecto/estudio, seguido, cuando procede, después de una línea oblicua (/), de los nombres de otros cinco encargados del proyecto como máximo.

c : Nombre de la categoría temática (consúltese la página XX con la lista completa) que constituye el enfoque principal del proyecto de investigación o estudio, seguido, cuando procede, después de una línea oblicua (/), de los números de otras tres categorías temáticas como máximo que, en orden de prioridad, también abarque el proyecto de investigación o estudio. A continuación figura, después del signo (:), un número de 1 a 4 que indica en qué medida la unidad tiene acceso a la *información* correspondiente al tema del proyecto de investigación o estudio, producida fuera del país en el que está situada la unidad.

La escala es la siguiente :

- 1 : Prácticamente ninguna información disponible;
- 2 : Poca información disponible;
- 3 : Una cantidad moderada de información disponible;
- 4 : Abundante información disponible.

Clave de codificación para la rúbrica 5 : Cursos impartidos por la unidad

Rúbrica 5 de un asiento tipo :

<p>5 a. History of Science. 1967/»/130H/μ/&*/\$:1/§</p> <p>b. Grinney, G.</p> <p>c. 02/03,01,04:4</p>

5 a : Título del curso en inglés, francés o español. Bajo el título del curso, una serie de 7 elementos de datos, separados entre sí por líneas oblicuas (/), proporciona las siguientes informaciones disponibles sobre el curso :

- El año en que se impartió por primera vez el curso
- Periodicidad del curso :
 - << = no periódico
 - >> = periódico
- Duración del curso en horas (H)
- Nivel del curso :
 - # = sin jerarquía académica
 - μ = nivel de grado universitario
 - μ̄ = nivel de postgrado
- Horario en que se imparte el curso :
 - &° = curso diurno
 - &°° = curso diurno de verano
 - &* = curso nocturno
 - & = curso breve o especial (o ad hoc), de dos semanas como mínimo
- Derechos de matrícula (\$) :

{	0 = no se exigen derechos de matrícula
	1 = se exigen derechos de matrícula
- Título correspondiente al curso :

{	§ = el curso no forma parte del programa de estudios
	§̄ = el curso conducente a un diploma, título o certificado.

b : Nombre de tres profesores, como máximo, encargados del curso.

c : Nombre de la categoría temática (consúltese la página XX, con la lista completa) que constituye el enfoque principal del curso, seguido cuando corresponde, después de una línea oblicua (/), de los números de otras tres categorías temáticas como máximo, que en orden de prioridad estén también relacionadas con el curso. A continuación figura, después del signo (:), un número de 1 a 4 que indica en qué medida la unidad tiene acceso a la *información* correspondiente al tema del curso, producida fuera del país en el que está situada la unidad.

La escala es la siguiente :

- 1 : Prácticamente ninguna información disponible;
- 2 : Poca información disponible;
- 3 : Una cantidad moderada de información disponible;
- 4 : Abundante información disponible.

Clave de codificación para la rúbrica 8 : *proyectos de investigación o estudios terminados* : idem rúbrica 4

SECCION DE INDICES DE REFERENCIA

La sección de INDICES DE REFERENCIA se compone de 8 listas. En esta sección los asientos están dispuestos en orden alfabético, y las listas 1, 3, 4, 5 y 6 también lo están por países. Después de cada asiento figura el número de referencia de la sección de asientos principales.

1. Lista de las organizaciones matrices y sus unidades.
2. Lista de los jefes de las unidades.
3. Lista de organizaciones matrices dispuestas según el enfoque principal (12 enfoques principales) en sus proyectos de investigación o estudios.
4. Lista de organizaciones matrices dispuestas según el enfoque principal (12 enfoques principales) de los cursos.
5. Lista de las unidades que ponen facilidades de trabajo a la disposición de investigadores invitados.
6. Lista de unidades que poseen una biblioteca especializada o una colección especializada de libros y/o publicaciones periódicas en el campo de las políticas científicas y tecnológicas.
7. Lista de publicaciones periódicas donde aparece material relativo a la política científica y tecnológica.
8. Lista de editoriales que producen otras publicaciones, no periódicas, en el campo de las políticas científicas y tecnológicas.

b. Leslie, C.
c. 01/02,03,09:4
- 5 a. Engineering Ethics.
c. 03:0
- 5 a. Magic, Science and Religion:
How are magic, science and
religion related to each other
as systems of thought and
practice? How do they vary from
one civilization to another?
How have their relationships
evolved in our own society?
c. 01:0
- 5 a. Ethical Issues in Scientific
Research: An interdisciplinary
approach to ethical arising in
scientific research, covering
both life and physical sciences.
c. 03/04:0
- 5 a. Critical Thinking, Scientific
Ideas and Culture: An
interdisciplinary course
studying historical and
contemporary ideas of science to
develop capacities for critical
thinking. The tools used will
be both scientific and
humanistic texts.
c. 03/02:0
- 5 a. Sociology of Science:
Introduction to sociology of
science by examining the most
important sociological and
socio-historical conceptions of
the social system of science and
of scientific and technological
- 5 a. Time, Relativity and Modern
Fiction: A study of a number of
contemporary works of fiction
(mostly American) in the context
of Einsteinian physics and 20th-
century theories of physical and
psychological time.
c. 01/03:0
- 5 a. Literature and Science.
c. 01:0
- 5 a. Philosophical Analysis of
Biological Theory: The course
discusses theories of scientific
method and tests theories
against actual biological
practice. After introducing the
standard analysis of scientific
theories, it examines modern
biological theories in the light
of the analysis. It then
briefly discusses traditional
metaphysical problems associated
with biology.
c. 01/03:0
- 5 a. History of Biological Ideas: An
analysis of the major
intellectual and scientific
concepts of biology in their
historical context. The seminar
emphasizes those developments
(e.g. evolutionary theory, the
recent histories of
microbiology, physiology and
anatomy) that had direct
relationship to the
professionalization of clinical
biology and the biomedical
sciences since the mid-19th
century.
