

**Russia/Russie**

**(203)**

**UNITWIN/UNESCO Chairs Programme**

**Progress Report**

**Period of activity: 2007**

**UNESCO Chair in Transfer of Technologies for Sustainable Development**

**Report established by:** Prof. Dr. A.S. Peshkov, Coordinator, and Dr. A.M. Novikov,  
International Center of Educational Systems (ICES)

## **I. Activities**

### **1. Academic activities**

#### ***Education***

During the 2007 activity year, the UNESCO Chair offered courses on:  
Methods and technical equipment in technological and production processes.  
Target group: postgraduate students

200 MegaWatt (MWt) power generating unit of Pechora HEPS.  
Target group: university instructors

#### ***Trainings***

System of obligatory certification on ecological requirements.  
Management and economics of quality.

#### ***Research***

Ecological Management, Aircosmoecology, Water and Sustainable Development.

### **2. Conferences/Meetings**

Modern culture of youth: problems, tendencies and perspectives of development.  
Date and Place: April 2007, Moscow

Policy and Power in Postindustrial Society: New Problems and Opportunities.  
Date and Place: November 2007, Moscow

Linguistic education in a technical institute: science, culture, creativity.  
Date and Place: December 2007, Moscow

### **3. Partnerships**

International Center of Educational Systems (ICES), Russian Federation

Y.A. Gagarin Russian Federation Astronauts Training Center (ATC), Russian Federation

Moscow Bauman State Technical University, Russian Federation

Russian State Polytechnic Museum, Russian Federation

MAMONTOVKA Industrial Joint Stock Company, Pushkino, Russian Federation

### **4. Publications**

*Culture of everyday life: Private and social life in modern world*

Author: T.S. Georgieva

Year: 2007

## **II. Impact**

The UNESCO Chair in Transfer of Technologies for Sustainable Development organizes training activities on engineering and technology for postgraduate students and university researchers in Russia. The Chair collaborates in research projects on sustainable development with other institutions and universities including the International Center of Educational Systems, the Moscow Bauman State Technical University and the Russian State Polytechnic Museum.

## **III. Forthcoming activities**

The Chair will organize an international conference on “Young Scientists” and offer trainings on ecological engineering. The Chair will promote projects on sustainable development and advance research initiatives at Russian technical universities on the fields of radio engineering and electronics.
