

Name	Mick van der Wegen
Year of birth	1971
Nationality	Dutch
Marital Status	Married, 3 children
Present position	Senior Researcher Coastal Engineering
Years with firm	1996 – present

EDUCATION

- | | |
|-----------|---|
| 2005-2010 | - PhD dissertation (part time) at UNESCO-IHE and Delft University of Technology
'Modeling morphodynamic evolution in alluvial estuaries' under guidance of prof. Dano Roelvink. |
| 1990-1996 | - MSc degree at Delft University of Technology, department of Civil Engineering, section of Fluid Mechanics. Thesis : 'Turbulent processes in a shallow water mixing layer', under guidance of prof. J Battjes. |
| 1984-1990 | - Stedelijk Gymnasium Johan van Oldenbarneveldt, Amersfoort, the Netherlands |

EMPLOYMENT RECORD

- | | |
|---------------|---|
| 2012- to date | - Senior Researcher at Deltares (0.3 FTE)
Senior Researcher at UNESCO-IHE (0.6 FTE) |
| 2010 - 2012 | - Visiting researcher at Deltares (1 day/week) within the framework of the CASCaDE II project. Closely involved in development and testing of DFlowFM software. |
| 2008 | - Visiting researcher at USGS, Santa Cruz (3 months) within the framework of the CASCaDe project. |
| 2008 - 2009 | - Visiting researcher RIKZ (1 day/week). |
| 2005 - 2010 | - Part-time PhD candidate on process-based, long-term morphodynamics in estuaries . |
| 1997 - date | - Junior and Senior Lecturer Coastal Engineering and ICZM, Department of Water Science and Engineering, UNESCO-IHE Delft, The Netherlands. |

KEY QUALIFICATIONS

Mick van der Wegen's major field of expertise is related to estuarine morphodynamics and integrated coastal zone management. After his TU Delft MSc degree in Civil Engineering, fluid mechanics, in 1996 he has worked at UNESCO-IHE. He obtained his PhD degree (TU Delft) on estuarine morphodynamics in 2010. He is appointed 0.6 FTE at UNESCO-IHE (since 1997) and 0.3 FTE at Deltares (since 2013).

Research interests include (long-term) estuarine morphodynamics, density currents and salt intrusion, numerical (hydrodynamic and morphodynamic) modeling (Delft3D). Key research efforts focus on decadal to millennial timescale morphodynamic predictions, conditions for morphodynamic equilibrium, channel-shoal interactions and nourishment strategies, always seeking for opportunities to explore new paths beyond the limit of state-of-the-art knowledge.

Education efforts have included teaching, guidance of MSc students and PhD candidates as well as programme coordination including accreditation and quality assurance programs. Other activities include (acquisition of) research projects, advisory work and capacity building projects within an international context and often in close co-operation with institutes like TU Delft, Deltares and USGS. Beside he carries out regular review work for international, peer-reviewed journals.

MAIN DISCIPLINE / SPECIALISATION

Coastal Engineering
Estuarine Morphodynamic Modeling
Integrated Coastal Zone Management

MEMBERSHIP and REVIEW

- Member of AGU
- Outstanding Reviewer *Estuaries and Coast* 2008
- Reviewer averages 6 reviews/yr over the past 3 years. Journal (nr of reviews, 2011 impact factor)
Sedimentary Geology (1, 1.54), Coastal Engineering (2, 1.76), Ocean Dynamics (3, 1.77), Continental Shelf Research (1, 2.09), Estuaries and Coasts (1, 2.11), Geomorphology (3, 2.5), Marine Geology (4, 2.26), Journal of Geophysical Research (2, 3.3), Geophysical Research Letters (1, 4.0)

ACADEMIC PERFORMANCE since 2008 (update May 2014)

Researcher ID (www.researcherid.com)	C-6787-2009
Total Articles in Publication List:	14 (10 first author)
Journals (nr publications, 2011 impact factor):	PLoS One (1, 4.4) Journal of Geophysical Research (5, 3.03) Marine geology (1, 2.7) Marine Ecology Progress Series (1, 2.6) Geomorphology (1, 2.5) Est. and Coastal Shelf Science (1, 2.3) Ocean Dynamics (1, 1.8) Coastal Engineering (3, 1.8)
Sum of the Times Cited (Res.ID, Google scholar):	158, 315
Average Citations per Article (Res.ID, Google scholar):	14.4, 22.5
h-index (Res.ID, Google Scholar):	7, 7

Postdoc, PhD and MSc guidance and involvement

2013-date	<i>Zheng Zhou</i> - PhD candidate at University of Cantabria, Spain
2012-date	<i>Roseanne Martyr</i> - Post doc in CASCADE II project Modeling hydrodynamics and phytoplankton dynamics in San Francisco Bay-Delta system with D-Flow FM.
2011-date	<i>Fernanda Achete</i> - PhD candidate in CASCADE II project Modeling hydrodynamics , sediment transport and morphodynamics in San Francisco Bay-Delta system with D-Flow FM.
2010-date	<i>Gerard Dam</i> - Morphological modeling of the Western Scheldt
2009-date	<i>Guo Leicheng</i> - Morphodynamic modeling of the river- and tide- dominated Yangtze Estuary, China: processes and mechanisms
2007-2012	<i>Ali Dastgheib</i> - Morphodynamic modeling of the Waddenze (involved)
2006-2010	<i>Pushpa Kumara Dissanayake</i> - Morphodynamic modeling of Waddenze inlets (involved)
2004-2008	<i>Nguyen Anh Duc</i> - Salt intrusion , tides and mixing in multi-channel estuaries (involved)
1998- date	Guidance of on average 4 MSc candidates/year on different topics related to coastal engineering and coastal morphodynamics

GUESTLECTURER

2005-date	Twente University, the Netherlands: Lecture series Integrated Water Resources Management, focus on ICZM
2005-2008	University of Amsterdam, the Netherlands: Lecture series People and the Sea, focus on ICZM

EXPERIENCE RECORD

PROJECTS - Research (acquired)

2011-date	USA: CAsCade II interdisciplinary research project financed by USGS and Calfed (1.8 MUSD): Development of San Francisco Bay and Delta model based on D-Flow FM; coupling with Delwaq functionality. Study of sediment transports through Delta and Bay and morphodynamic hindcast of this system. 1PhD 2MSc, http://cascade.wr.usgs.gov/ , http://www.unesco-ihe.org/The-San-
-----------	---

	<u>Francisco-Bay-Delta-model</u> , USGS, Deltares, UNESCO-IHE.
2009-date	USA: Corte Madera (40 KUSD): Modeling salt marsh development in San Francisco Estuary, USGS, BCDC.
2009-date	USA: Calibration and validation of Bay-Delta model of San Francisco Estuary with DFlow FM for USGS, 50 KUSD.
2007-2009	USA: CAsCade <i>interdisciplinary research project financed by USGS and Calfed</i> : Long -term morphological development of San Francisco Estuary, http://cascade.wr.usgs.gov/
2006	The Netherlands: <i>Organization NCK days</i> , two day conference of the Netherlands Centre for Coastal Research on the current Dutch coastal research
2004-2006	The Netherlands: <i>Re-evaluation of the Netherlands Long Term Climate targets</i> NRP-CC, NLCT project; (VU-IVM, RIVM, WUR, KNMI, RIZA, RIKZ, ICIS) contribution specifically related to the coastal zone.
2000-2003	The Netherlands: member Delft Cluster research project on environmental flow requirements (ENFRAIM) in co-operation with WL Delft Hydraulics, Alterra and TU Delft
1999	Australia: advisory service on salt intrusion in the Mary River, Darwin, Australia. The assessment was related to increasing salt intrusion in the Mary river threatening the fresh water wetlands in a nature reserve. Expert advice was given on the managerial and engineering measures to be taken to cope in a sustainable way with the processes going on.
1998	The Netherlands: Coast3D, research project including training on Delft3D, in co-operation with WL Delft Hydraulics. The project aimed to investigate the morphology in front of the coast of Egmond, the Netherlands, using a 3D mathematical model.
1996	The Netherlands: Research on mixing processes in shallow water mixing layers in the laboratory for Fluid mechanics, Delft University of Technology. Work included laser-Doppler measurements in a flume and mathematical model development.

PROJECTS - Capacity building

2001-2008	The Netherlands: member steering committee and co-ordinator on behalf of IHE in the HWRU project. Project funded by Dutch Embassy in Hanoi aiming to develop a department of Coastal engineering at HWRU, Vietnam. Project includes curricula development and training and coaching of 20 HWRU staff, partly up to PhD level.
2001-2003	Vietnam: Conductance of courses ICZM in Hue, Hanoi, Vung Tau and Nam Dinh; within the framework of larger capacity building project funded by Dutch Embassy in Hanoi. Partners WL Delft hydraulics, DHV, Arcadis, RIKZ. Course co-ordination and development. Lecture tasks specifically related to policy analysis and 3 day role play.

- 2001 **Vietnam:** groupwork guidance on an EIA of the Dong Nai River Catchment including field visit, Vietnam. Project sponsored by Dutch Embassy Hanoi. The groupwork aimed at a thorough EIA related to the Dong Nai Masterplan that was proposed in a JAICA. The EIA was carried out at IHE by a group of 15 Vietnamese students from different disciplines and Vietnamese institutes.
- 1998-2002 **The Netherlands:** project leader of different projects related to distance learning related to Integrated Coastal Zone Management (more information at www.coastlearn.org). Development of teaching material suitable for the internet in co-operation with RIKZ, WL|Delft Hydraulics, Resource Analysis, EUCC and different smaller Eastern European partners. Projects carried out under ICES, and EU programmes (ao LIFE, PIN MATRA, LEONARDO, TACIS).
- 1997-date **The Netherlands:** development of CRESS software in co-operation with RWS/DWW and TU Delft, more information at www.cress.nl. CRESS aims to provide the user with rules of thumb related to hydraulic engineering in combination with background information. Software development includes selection and critical review of routines including sensitivity analyses.

Education and internal UNESCO-IHE projects

- 2009-date **The Netherlands:** specialization co-ordination. Responsible for academic education programme in Coastal engineering and Port Development.
- 2004-date **The Netherlands:** co-ordination and teaching of yearly, 1 weeks short course on morphodynamic modeling with Delft3D, involvement of 50 students, co-operation with TU Delft, Deltares.
- 2001-2003 **The Netherlands:** secretary Personnel Council; regular meetings with Rectorate ao. on the transition from IHE to the UNESCO-IHE institute per June 2003, staff assessment procedures and flexible working conditions for staff.
- 2000-2003 **The Netherlands:** programme coordinator of courses on Coastal Engineering and Port Development, River Basin Development and Land and Water Development, involvement of 60 students, 12 IHE staff and 100 guest lecturers.
- 1997-date **The Netherlands:** Lectures given at IHE include, Basic Hydraulics, Density Currents and Salt Intrusion, Hydrodynamic and Morphodynamic Modeling (Delft3D), Coastal Morphology, Design of Closure Dams, Remote Sensing and Integrated Coastal Zone Management.
- 1997-date **The Netherlands:** co-ordination of yearly, 2 weeks Coastal Zone Management Seminar at IHE, including teaching activities, involvement of 50 students and 10 guest lecturers, co-operation with TU Delft, Deltares.
- 1997-date **The Netherlands:** different research projects, partly carried out in the framework of MSc studies; topics related to (amongst others)
- Breach growth in clay dikes, breach width development in time and sensitivity analysis on physical parameters like adaptation length and soil parameters.

- Effects of salinity gradient on sediment balance in Haringvliet Mouth
- Dune erosion processes, including comparison of software DUROSTA (extreme events with non-linear wave interactions) and UNIBEST CT (long time dune erosion).
- Access channel sedimentation near Port of Songkla, Thailand; investigation on optimal dredging management using SUTRENCH
- Hurricane waves in the Caribbean sea. Assessment and hindcasting of design wave heights based probabilistic approach using Hurricane data
- Morphological developments of Hai Phong estuary (using DELFT 3D)
- Prediction of beach erosion of Hue coast and assessment of different alternatives like beach nourishment and different groyne systems (using UNIBEST).
- Investigation on morphological behaviour of Thuan An inlet Hue Lagoon, Vietnam and the related hydraulic reactions of the lagoon

1997-2000

The Netherlands: co-ordination of course Coastal Engineering and Port Development, responsible for progress of the course, both financially and qualitatively, involvement of 20 students, 4 IHE staff and 30 guest lecturers
