

Observatory of Learning Outcomes Measurements

The Catalogue of Learning Assessments Questionnaire

Group Discussion

Harare, 12-14 May 2015

Group discussion

Discuss the good practices and challenges your country is facing during the different stages of the assessment process:

1. Planning (developing test items, sampling, training of assessment team ...)
2. Data collection (test administration, data capture and entry)
3. Data analysis and writing results
4. Data dissemination and using results (reforms, targeted policies...)

Do not focus on challenges alone Best Practices 😊! And areas for improvement 😊

Planning

Test Design

Data Collection

Data processing

Data Analysis

Education Policy Reform

Data Dissemination
