## *Background*

During the 182nd session of the UNESCO Executive Board, UNESCO Member States highlighted the importance of interdisciplinary approaches to biodiversity which consider the broader scientific, cultural and educational aspects of biodiversity. Such a holistic approach to the biodiversity debate enhances the importance of recognizing the inextricable links existing between biodiversity and cultural diversity, particularly as 2010 is both the International Year of Rapprochement of Cultures and the International Year of Biodiversity.

*2010 International Year of Biodiversity* provides an effective framework for reinforcing the implementation of the three objectives of *the Convention on Biological Diversity (CBD)*, while also highlighting the linkages between biodiversity and human well-being.

In this context, the International Conference on Cultural and Biological Diversity: *Diversity for Development - Development for Diversity* is held from 8 to 10 June 2010 in Montreal, Canada.

## *Organizers*

The Conference is jointly organized by *UNESCO* and *the Canadian Commission for UNESCO*, the Secretariat of the *Convention on Biological Diversity*, the *United Nations Environment Programme (UNEP)* and the *Canada Research Chair in Ethnoecology and Biodiversity/University of Montréal*.

The Conference is held in partnership with the 16th edition of *the International Economic Forum of the Americas* (Montreal Conference).

## *Objectives*

The main objectives of the conference are to:

- Bring together civil society, representatives of indigenous and local populations, policy makers, scientists and intergovernmental and development cooperation agencies to exchange knowledge and practices linking biological and cultural diversity; and
- Provide elements for a programme of work to be jointly implemented by *UNESCO*, the *CBD* and other partners. This Programme will be submitted for approval by the 10th Conference of the Parties to the *CBD*, to be held in Nagoya, Japan in October, 2010.
