UNESCO to EXPO 2015

The theme chosen for **EXPO Milano 2015**, “Feeding the Planet, Energy for Life”, provides an excellent opportunity for UNESCO to share its experience of the relationship between man, culture, nature and the production/ consumption of food with a global audience, and to explore the vital role of cultural and natural diversity as drivers for sustainable development.

As well as participating in EXPO Milano as a member of the UN system under the banner “The Zero Hunger Challenge. United for a Sustainable World”, UNESCO has prepared a broad set of activities and events in and around Venice and other Italian UNESCO sites, as

part of the “**Venice to EXPO 2015**” Programme:

- The “**Behind Food Sustainability**” exhibition
- **Water worlds**, including the “Exploring the Venice Lagoon” multimedia installation and two international conferences, “Waterscapes and Historic Canals as a Cultural Heritage” and “Water for a Sustainable World”
- **Children’s EXPO**, including the Treasure Hunt in Venice, the Parco degli Alberi Parlanti in Treviso and Young Leonardo at EXPO
- The involvement of **other designated territories and sites** in Italy

UNESCO’s contribution to EXPO 2015 was made possible thanks to the generous support of the Italian Ministry of Foreign Affairs and International Cooperation to the UNESCO Regional Bureau for Science and Culture in Europe, Venice (Italy).

BEHIND FOOD SUSTAINABILITY

The “*Behind Food Sustainability*” exhibition brings together experiences from UNESCO networks – World Heritage sites, Biosphere Reserves and elements of the Intangible Cultural Heritage– viewed as examples of food sustainability that can yield valuable lessons for the future. Communities from around the world share expertise, traditional knowledge and practices and an undivided passion for sustainable development in their territories –“heritage” to be passed down to future generations.

The exhibition includes five main thematic areas, each focusing on a

particular sustainability challenge: **Managing Water; Looking after the Land; Balancing the Food Economy; Protecting diversity; Fostering participation.**

It also features a map table with interactive tablets that allow you to learn about more UNESCO sites from all over the world, an eight-minute video on the same subjects (which will also be shown by the Ministry of the Environment and the Protection of Land and Sea in the Thematic Area on Biodiversity at EXPO Milano 2015) and a dedicated web page.

WATER WORLDS

Exploring the Venice Lagoon

The aim of this interactive multimedia installation is to convey the universal value of the 'Venice and its Lagoon' World Heritage site. Visitors will have the chance to explore the historic waterways that

extend inland from Venice itself. The Venice lagoon is a rich, complex ecosystem containing a wealth of cultural and historical heritage and a broad variety of natural habitats and cultural landscapes that together represent a unique 'Water Civilization'.

'Water for a Sustainable World' Conference

In the context of *Aquae Venezia 2015*, the **UN World Water Assessment Programme (UN-WWAP)** is promoting a conference

on the *World Water Development Report 2015*, titled "Water for a Sustainable World".

The conference will study the role water resources play in fundamental social processes such as economic growth, poverty reduction and environmental sustainability.

Waterscapes

UNESCO is lending its support to the organization of the "Waterscapes and Historic Canals as a Cultural Heritage" international conference focusing on tangible and intangible

heritage linked to waterways and historic canals and the policies that should be put in place to encourage sustainable tourism and development in the areas in question.

CHILDREN'S EXPO

The Treasure Hunt in Venice

Based on the "H2Ooooh!" initiative, produced by UNESCO and Gruppo Alcuni with the support of RAI Fiction on issues of water protection and its sustainable use, the Treasure Hunt reaches out to Venice's

younger visitors. Using the fun new App, participants can embark on an adventure around the narrow Venetian streets to discover many different facts about this precious resource. At the end of the itinerary, all participants will be given a board game that will allow them to continue to explore at home.

Parco degli Alberi Parlanti in Treviso

The *Parco degli Alberi Parlanti* in Villa Margherita in Treviso is one of the Venice to EXPO 2015 activities aimed at children, schools and families, jointly organized by Gruppo Alcuni and UNESCO. Visitors

to the park will be able to watch the Leonardo EXPO cartoons and the H2Ooooh! cartoon series featuring the Pet Pals, while specially designed itineraries will allow them to discover more about important subjects such as ecological footprints, water and energy saving.

Leonardo EXPO

UNESCO has contributed to the production of 13 episodes of the Leonardo EXPO cartoon in cooperation with Gruppo Alcini and RAI Fiction, which allow children to explore various topics linked to sustainable development in the

context of EXPO 2015: food, water, renewable energy, sustainable cities, ecological footprint, cooperation and solidarity. The cartoons are also on display at EXPO Milan as part of the United Nations multimedia points and in the Children's Park.

INVOLVEMENT OF OTHER TERRITORIES AND DESIGNATED SITES IN ITALY

The "Behind Food Sustainability" exhibition forms the core of UNESCO's contribution to Venice to Expo 2015. It will be shown in Venice and in other UNESCO designated sites in the Veneto and further afield in Italy. These include:

©Parco Nazionale Appennino Tiroce-Friuliano

Botanical Garden Padua

Padua's botanical garden, founded in 1545 as a garden of simples, is now a World Heritage site of immense scientific and cultural value. The **Biodiversity Garden** is a new museum within the site that hosts

almost 1,300 species and recreates the planet's major ecosystems.

For three weeks, it will host the 'Behind Food Sustainability' exhibition, plus a series of conferences on the theme of biodiversity and food.

Delta del Po

The Rosolina Mare Conference Centre in the **Po Delta Biosphere Reserve** will host the "Behind Food Sustainability" exhibition and the "Water ways, memory lanes" multimedia project. The aim of this project is to encourage greater public interest on a topic which is

of huge historical value but which also holds great potential for sustainable development in rural areas: navigation on inland rivers and lagoons. The specially designed 'DeltaPo' App for smartphones and tablets will allow visitors to further explore the delta landscape.

Behind Food Sustainability in Italian Parks and in Milan

The "Behind Food Sustainability" exhibition will be on display in a number of important territories and UNESCO sites throughout Italy, including:

The Dolomiti (World Heritage site and Alpi di Ledro – Giudicarie Biosphere Reserve); the **Appennino Tosco-Emiliano** (candidate to become a Biosphere Reserve); the

Circeo (Biosphere Reserve); the **Sila** (Biosphere Reserve).

The Directorate for the Protection of Nature and Sea at the Italian Ministry of the Environment and the Protection of Land and Sea is organizing, in collaboration with UNESCO, a day in which Biosphere Reserves from Italy and beyond will have the chance to meet and discuss the topics selected by UNESCO for the "Behind Food Sustainability" exhibition. The exhibition video will also be shown on this occasion, and will remain on display in Milan until the end of October.
