

**From Now to Next: How New Pedagogies and Technologies are
Delivering on the Promise of Personalized Learning**

Steven Duggan

Director, Worldwide Education Strategy for Microsoft Corporation, USA

Drawing on his experience as Director of Worldwide Education Strategy for Microsoft and his involvement in global initiatives including the New Pedagogies for Deep Learning global partnership, Steven Duggan argues that we are now in a position to deliver true, personalized learning journeys for individual learners across the globe. In addition to highlighting how information technologies are advancing educational outcomes in developed world nations, he also demonstrates the ways in which technology is enabling anytime, anywhere learning for the most disadvantaged and remote communities on the planet: including those without teachers, physical schools, electricity or broadband access.
