

WELCOME TO BULGARIA

DEAR MOTHERLAND, YOU ARE PARADISE ON EARTH (as is sung in the Bulgarian anthem)

- An old legend says that when God decided to give parts of land to people, the Bulgarians were late and there was nothing left for them. God had already given away all the land He had.
- For as much as Bulgarians were famous for their kindness and diligence, God decided to give them a piece of His own land – the Paradise!

Nowadays Bulgaria is the place which combines natural beauty, sun and water and the rose is the symbol of the country

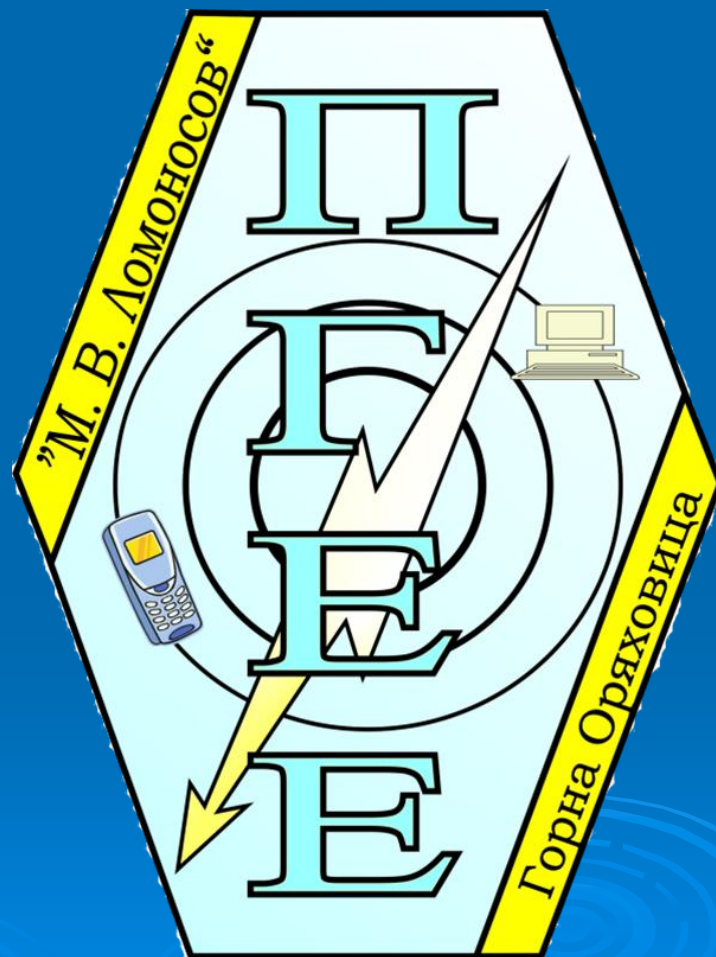

GORNA ORYAHOVITSA

- Gorna Oryahovitsa is a town in the district of Veliko Tarnovo, Central North Bulgaria. It is an important railway junction and its population is about 30 thousand inhabitants

And here are the building and the emblem of our school – Vocational School of Electrical engineering and Electronics, named after the name of the famous Russian scientist Mihailo Vasilievich Lomonosov

Here we study in different specialties:

System
Programming

Computer technic
and technologies

Computer
networks

Telecommunication
systems

Electrical
installations

Renewable
Energy
sources

Electric
power
engineering

SUCCESSFUL PROJECTS

- “Young people – living and working together in Europe”-LLP-2009-COM-MP-019, partners – Germany, Romania, France, Italy and Poland
- **“European dimension of vocational training for the transparency of qualifications and competences”, sub-programme “Leonardo da Vinci”**
- “Bridge over troubled waters”, France, Poland, Romania, Spain, Italy, programme Comenius
- **Learning the Spanish experience in training on renewable energy sources. The project is funded by the Lifelong Learning, sub-programme Leonardo da Vinci**
- Improving knowledge and skills - a chance for quick and successful integration into the labor market - programme Leonardo da Vinci
- **MICROCONTROLLER APPLICATIONS IN VOCATIONAL EDUCATION, programme Leonardo da Vinci**
- Improving the European Innovation in Vocational Education
- **Green employability sub-programme Leonardo da Vinci – transfer of innovations**
- Professional visits to EEI businesses - Portsmouth, UK

And different extracurricular activities:

- Theatre 220
- Table tennis
- Fishing
- Fitness
- Volleyball
- Emergency aid at school
- Computer drawing - AutoCAD
- Pure energy
- Young developer with microcontrollers
- With a knife and a fork around Europe
- Applied electronics
- Combinatorics in chess
- Mathematics plus
- Archimedes
- Handicrafts with scissors and needle
- The spirit of the Bulgarian traditions
- Computer animation
- Expressing myself by Photoshop and digital Scrapbooking
- Sewing for beginners
- Russofiles
