## 6th Asia School Health and Nutrition Training Course

**When:**

Sunday, February 12, 2017 to Sunday, February 19, 2017

**Where:**

Bangkok, Thailand

The internationally renowned Asia School Health and Nutrition Training Course is designed to enable participants to develop country-specific action plans reflecting all aspects School Health and Nutrition (SHN) and to share learning about cutting-edge developments in the field.

The course aims to highlight health and nutrition management in schools and the importance of SHN policy, skills based health education, school-based health services and a safe school environment. The course develops the capacity of human resources and staff training with regard to SHN activities.

Sessions on action planning and policy analysis will identify delegates country level issues and problems and by the end of the course participants will have developed practical action plans in order to effectively apply best practice in the region.
