

United Nations World Water Assessment Programme (WWAP)

The 4th edition of the United Nations World Water Development Report (WWDR4)

Managing Water under Uncertainty and Risk

Water underpins all aspects of development: it is the only medium that links sectors and through which major crises can be jointly addressed.

The world is changing faster than ever in often unforeseeable ways, creating additional uncertainty and increasing risks.

Business as usual is no longer an option: concerted action must now be taken by water managers, leaders in government, business, and civil society.

The United Nations World Water Assessment Programme (WWAP) is hosted by UNESCO, and brings together the work of 28 UN-Water members and partners in the triennial World Water Development Report (WWDR)
