## OFID Postgraduate Fellowship Programme at ICTP

ICTP and the OPEC Fund for International Development (OFID) announce a joint programme offering fellowships and research/training opportunities to PhD students enrolled in universities in developing countries within areas of ICTP's scientific and technical competence.

**The OFID postgraduate fellowships will support 15 doctoral students from developing countries** to access ICTP and partner research/training facilities for up to six months per year for three consecutive years. Fellows will carry out research/training towards their PhD within the Sandwich Training Educational Programme (STEP) scheme at ICTP (see <http://www.ictp.it/programmes/step.aspx>), mentored by co-supervisors at the host institutes in coordination with their supervisors at their home institutes.

**Fields of study:** physics, mathematics, earth science, information and communication technology, renewable energy, and related areas (any of the ICTP fields of research, see <http://www.ictp.it>).

**Duration:** 3 years; stays of up to 6 months per year.

**Eligibility:** PhD students from developing countries (except OPEC and OFID member countries). Fellowships are awarded on a merit basis; priority will be given to researchers from least developed countries.

**Entitlements:** EUR 1,400 per month during each stay at the host institute as well as the costs of travel and medical insurance.

**Deadline:** 15 August 2015

**For more details visit [ofid.ictp.it](http://ofid.ictp.it)**
