Want to Learn to Code to Address Social Needs?
Apply for Youth Mobile App Development Training Program

This initiative, implemented under the project supported by the United Nations Education, Scientific and Cultural Organization (UNESCO) in collaboration with InSTEDD iLab Southeast Asia, calls for applications for Youth Mobile App Development training in Cambodia.

You'll learn:

- How to develop hybrid mobile applications (Android & iOS)
- A creative approach to problem solving (Human-Centred Design)
- Learning-to-code and coding-to-learn with experienced trainers
- How to leverage the power of computer, Internet, and mobile technologies to address social issues concerning young people and promote sustainable development of local communities

Requirements:
- 4th year Computer Engineering students or recent graduates
- Basic knowledge of HTML, Javascript, and CSS
- Available during the training program: 9th October 2015 - 28th December 2015 (every morning 8:30 AM - 12:00 PM; Monday - Friday)

To apply:
Please use the application form on this link: http://goo.gl/WH15PQ
Deadline: October 8th, 2015

Note: Only selected candidates will be notified for interview.
