Professor:
Address: Bakweri town Buea
(No 77692613, 77315562)
Country: Cameroon

World Heritage and Sustainable Tourism.

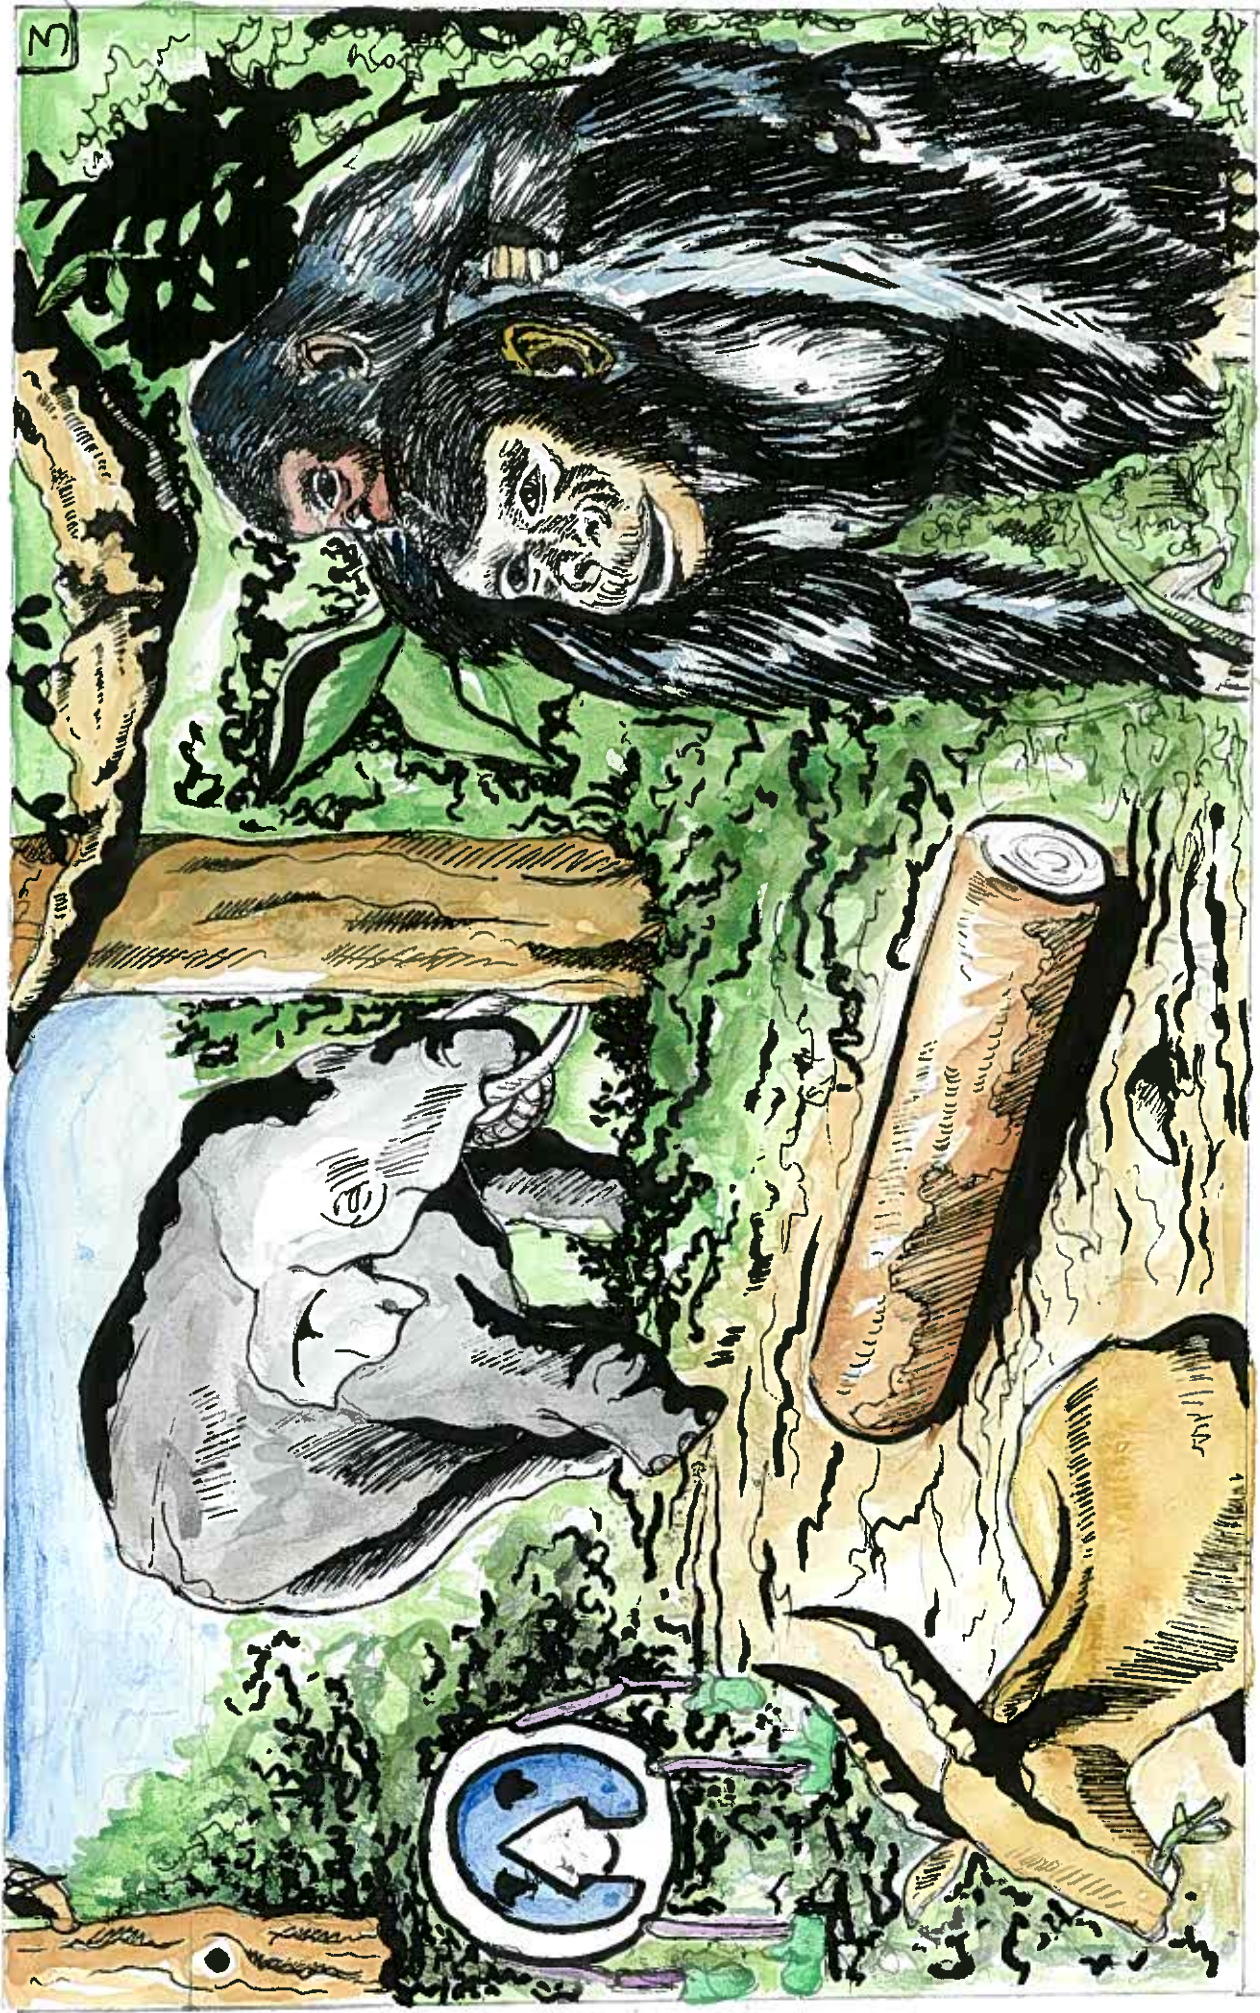

1

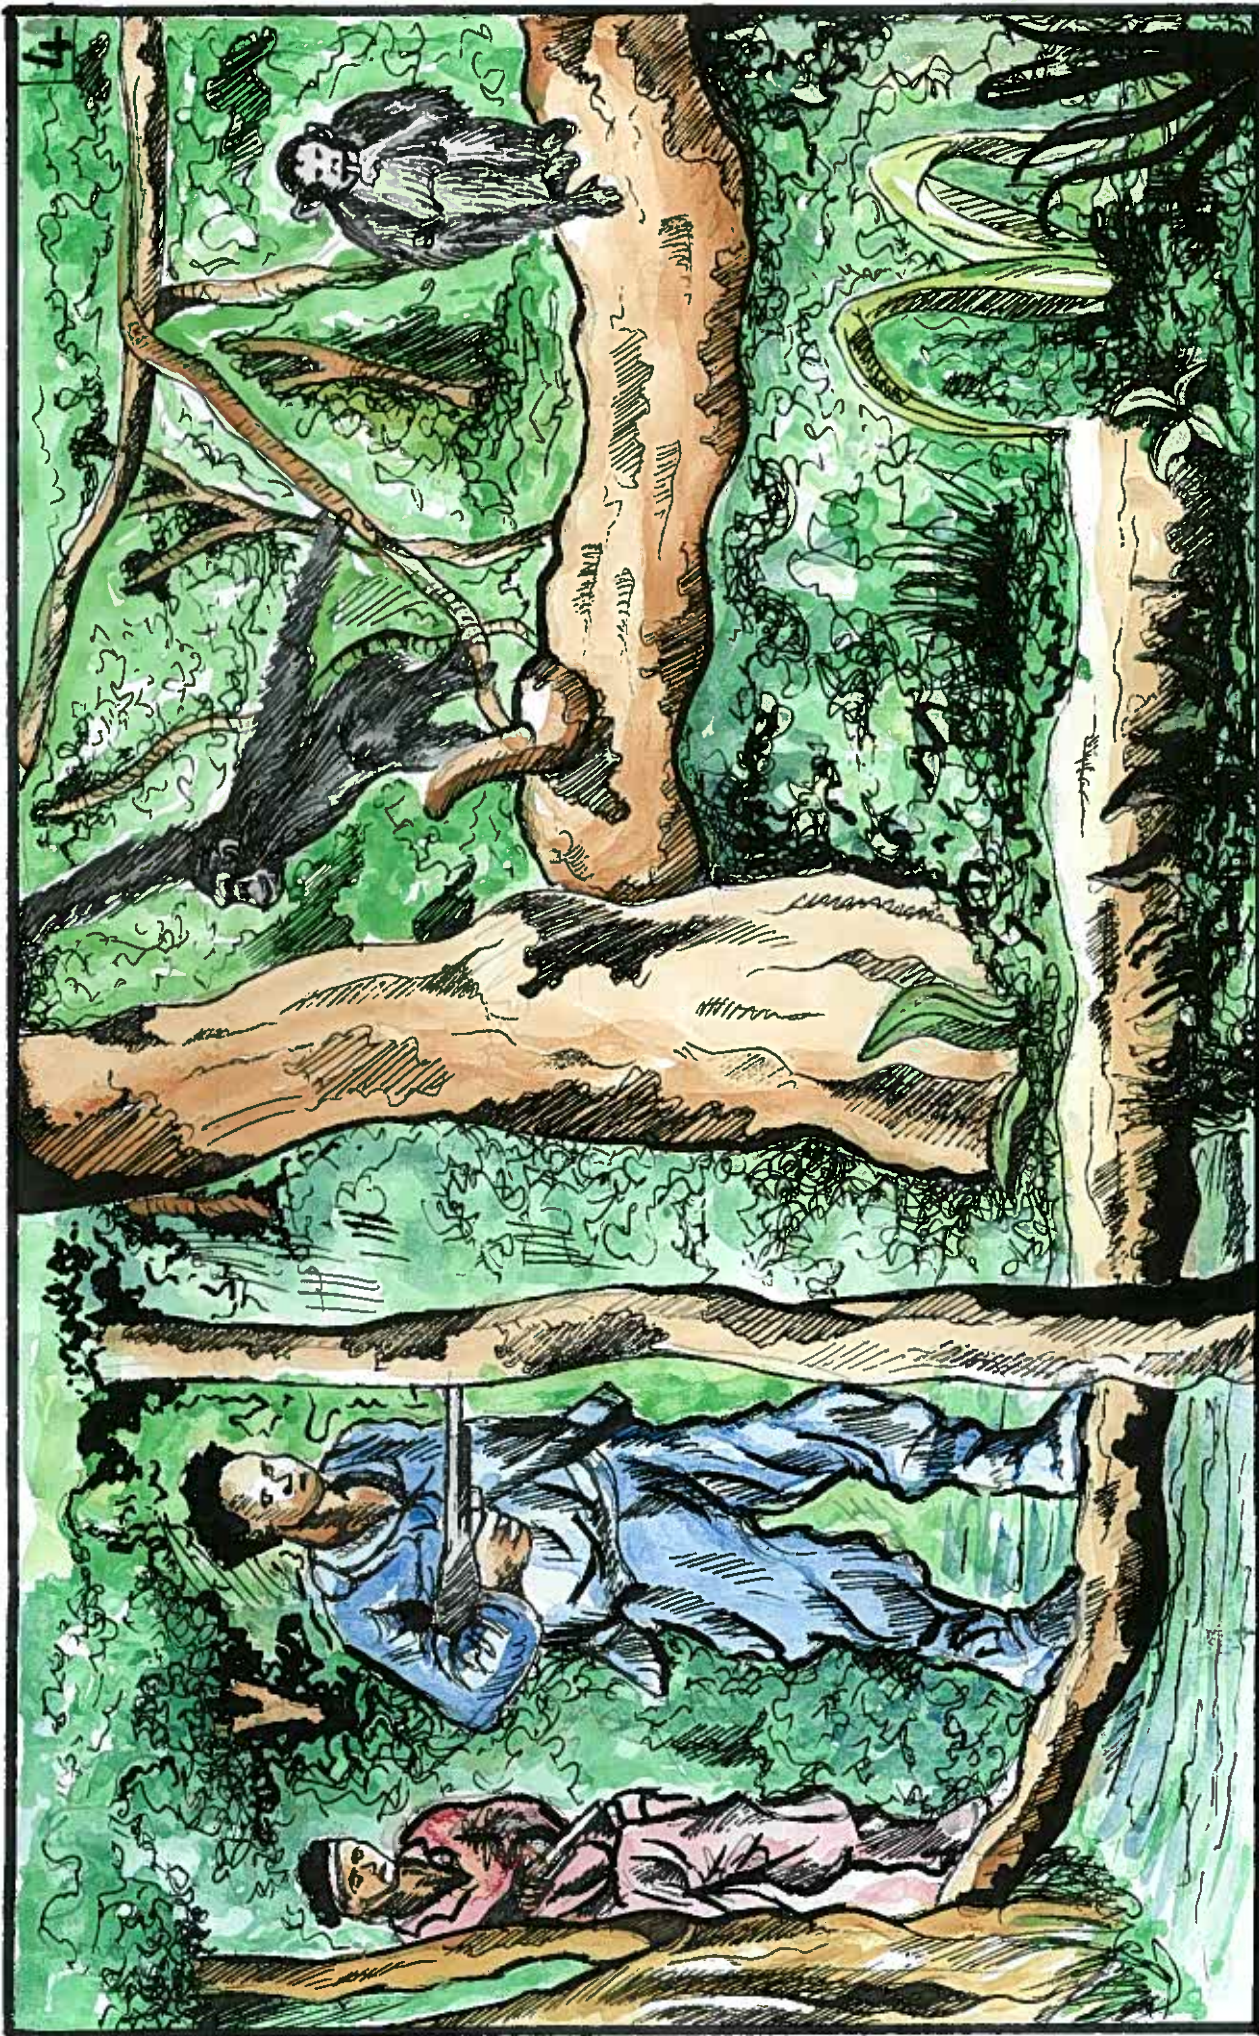

Patrimoine decided to go for a tripe on holidays to visit
any Game reserve and of course he decided this time to choose
The ~~Djo~~ Faunal Reserve in Cameroon.

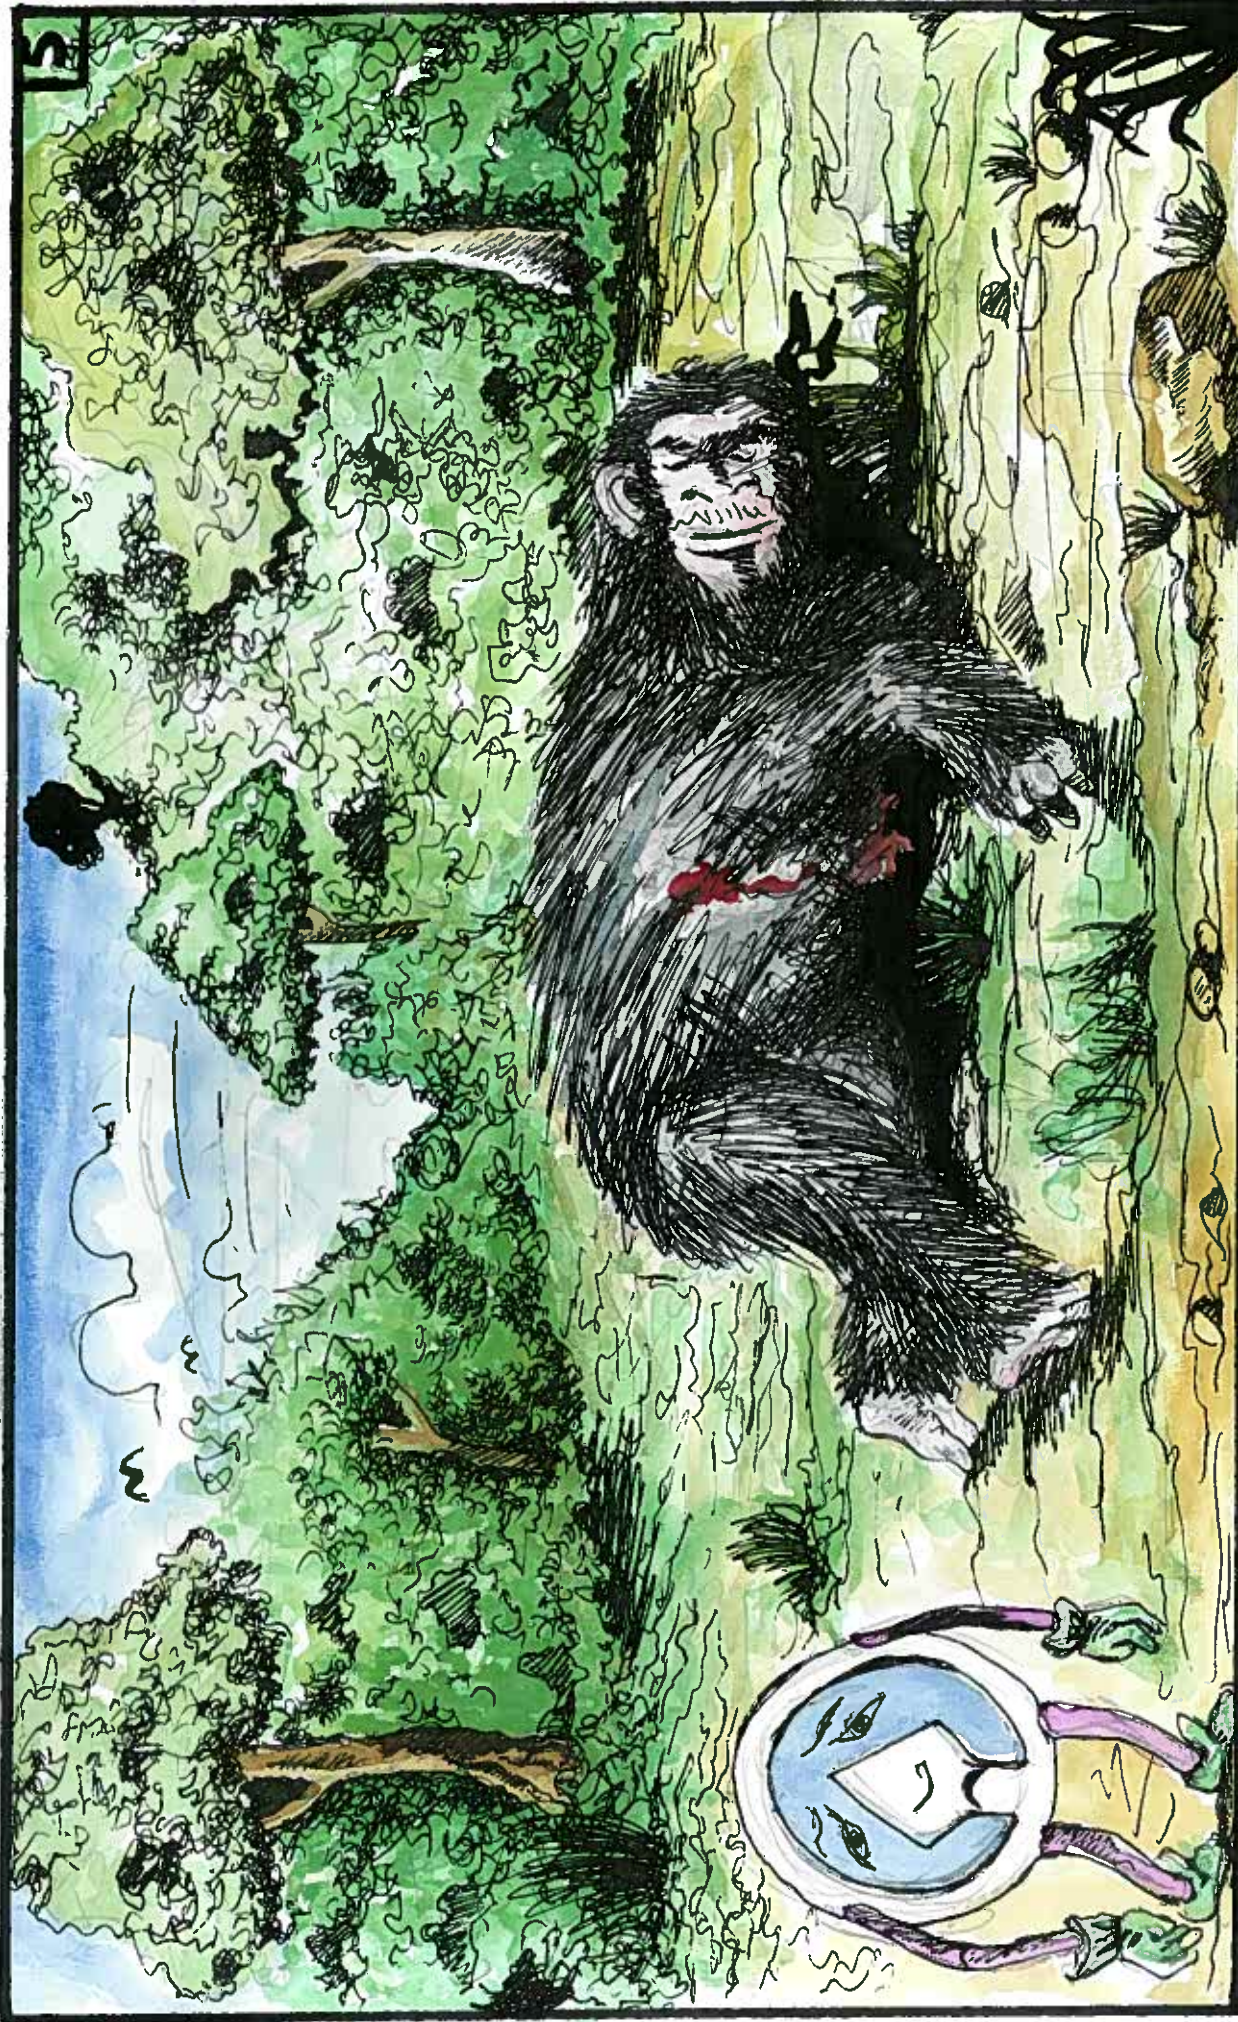

Patrimonito enjoyed the beautiful land scape of the
Dja Faunal Reserve.

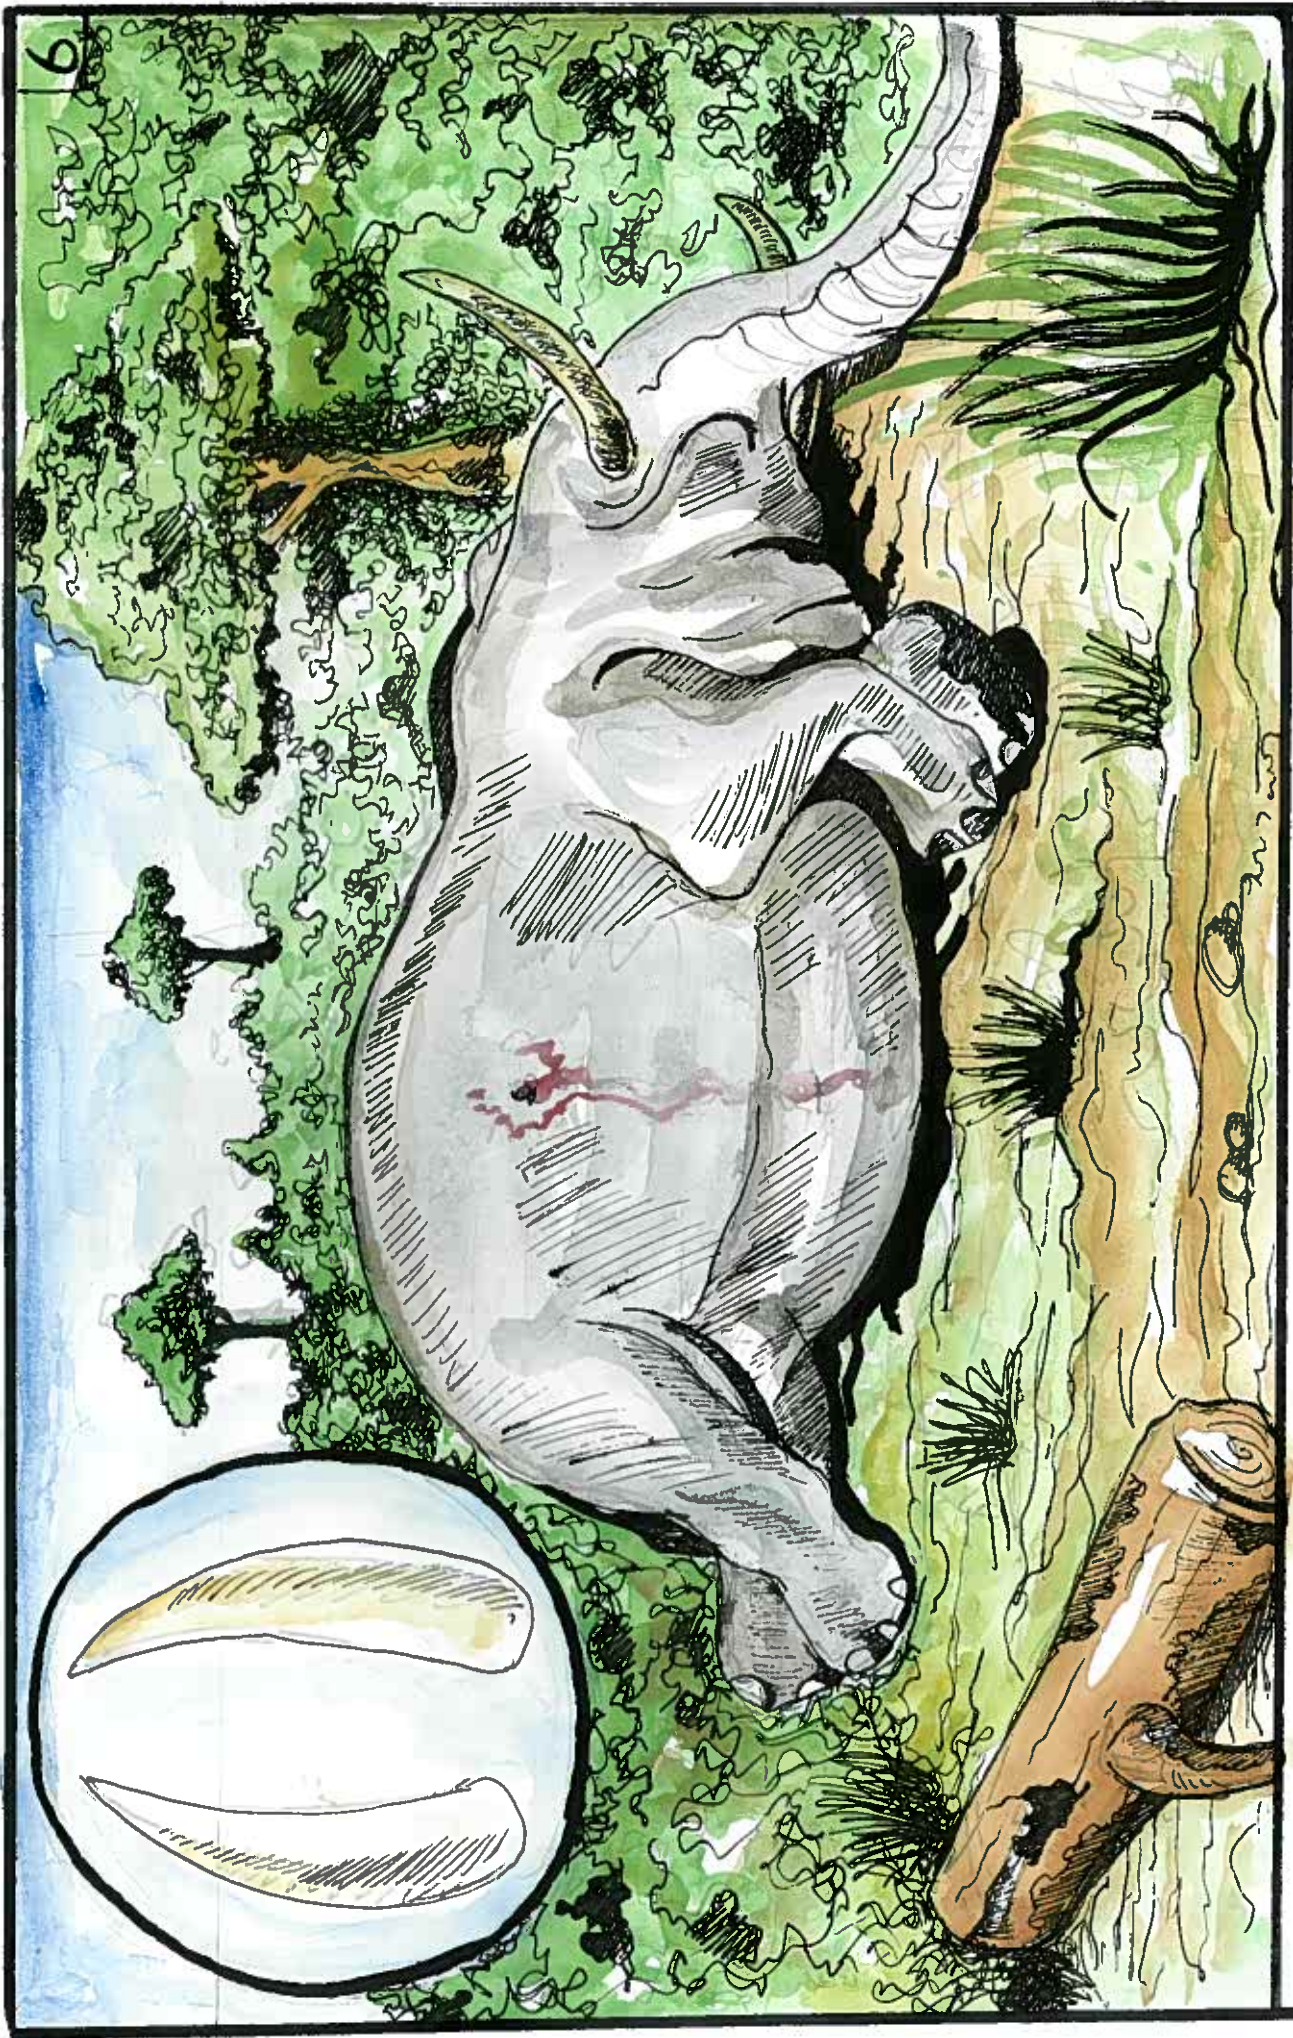

Patrimonto also saw different types of animals like Chimpanzeas, Dears, elephant and many others.

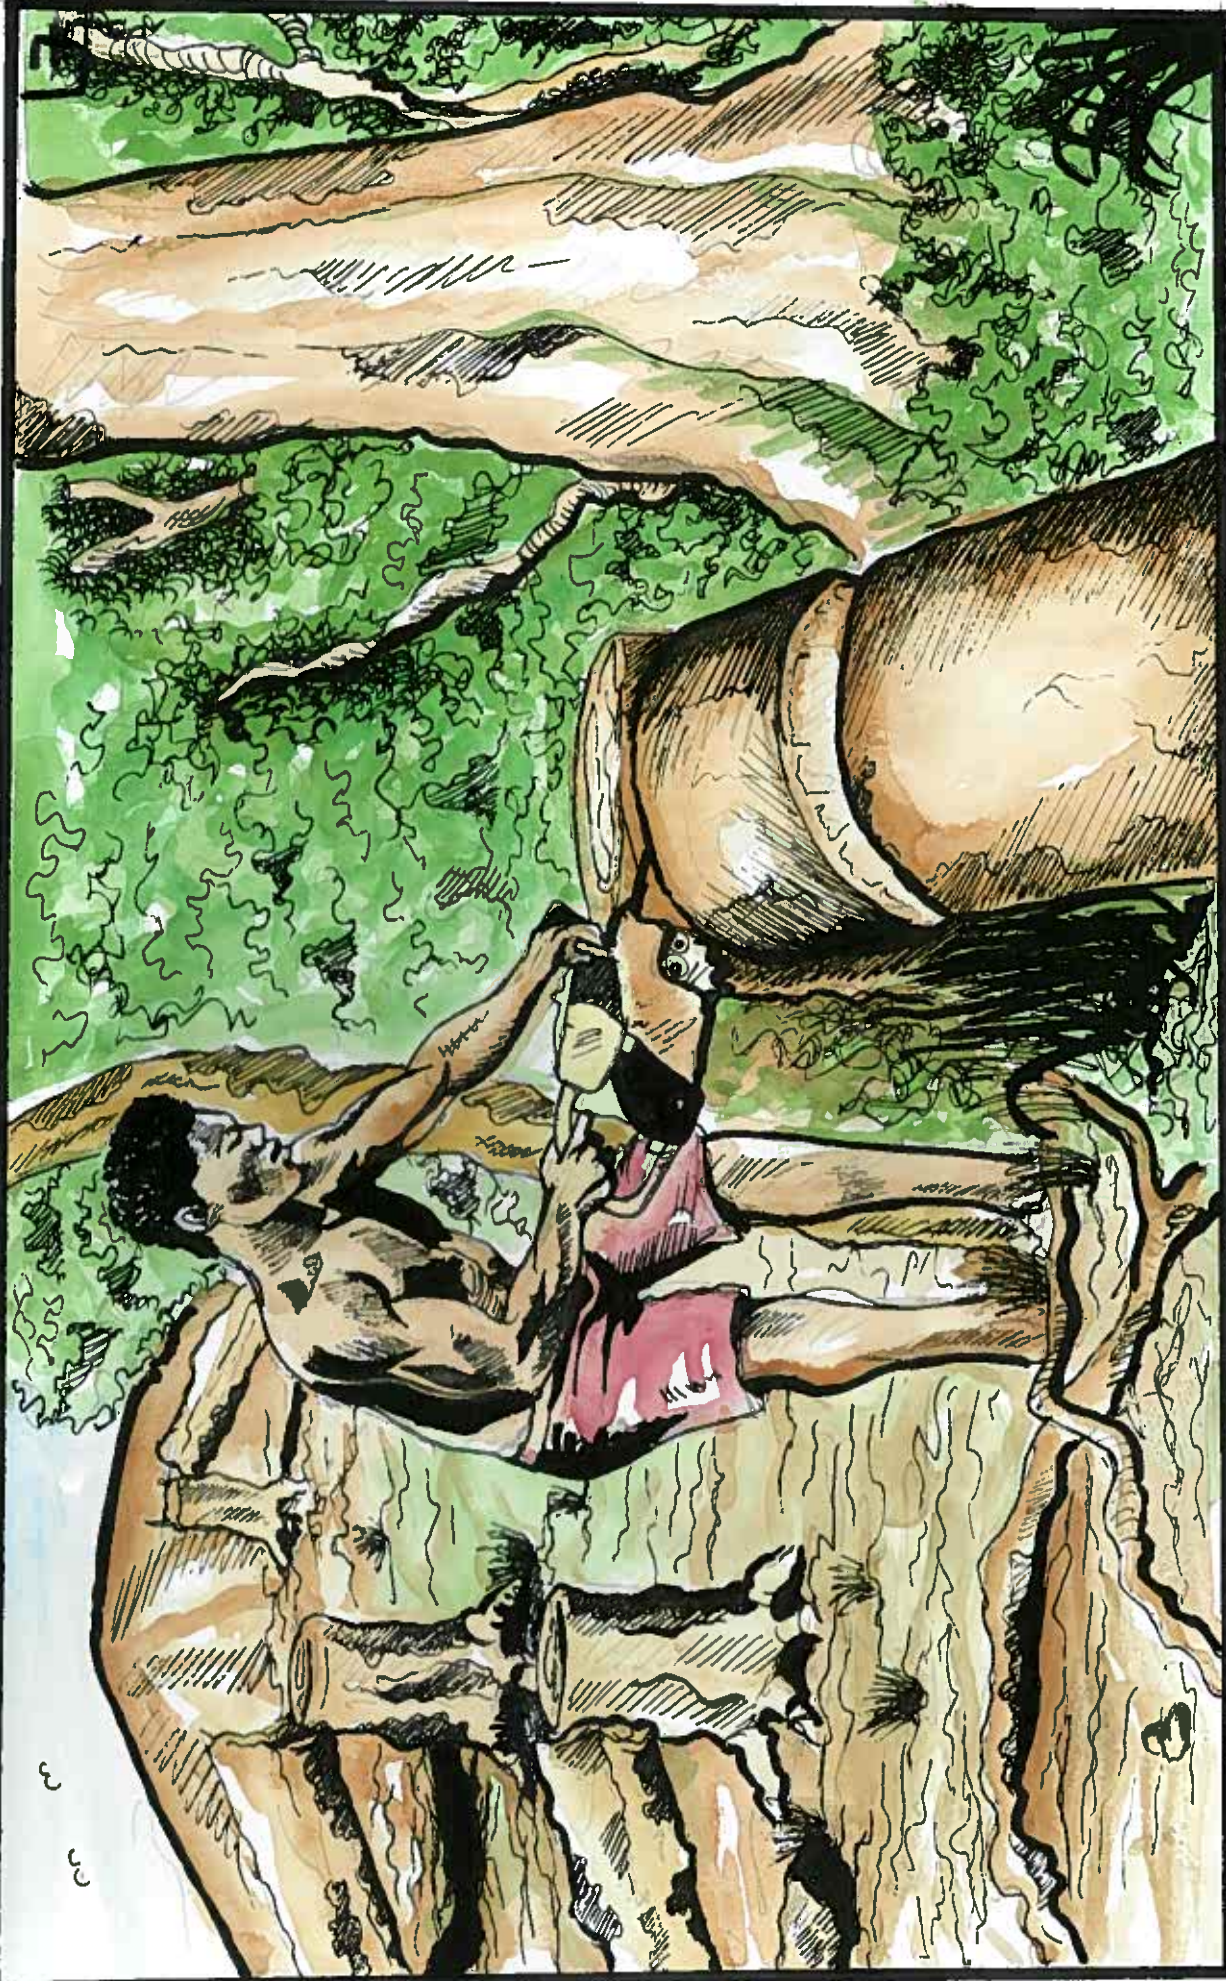

Soon after some dangerous explorers started invading the forest and hunting after the animals.

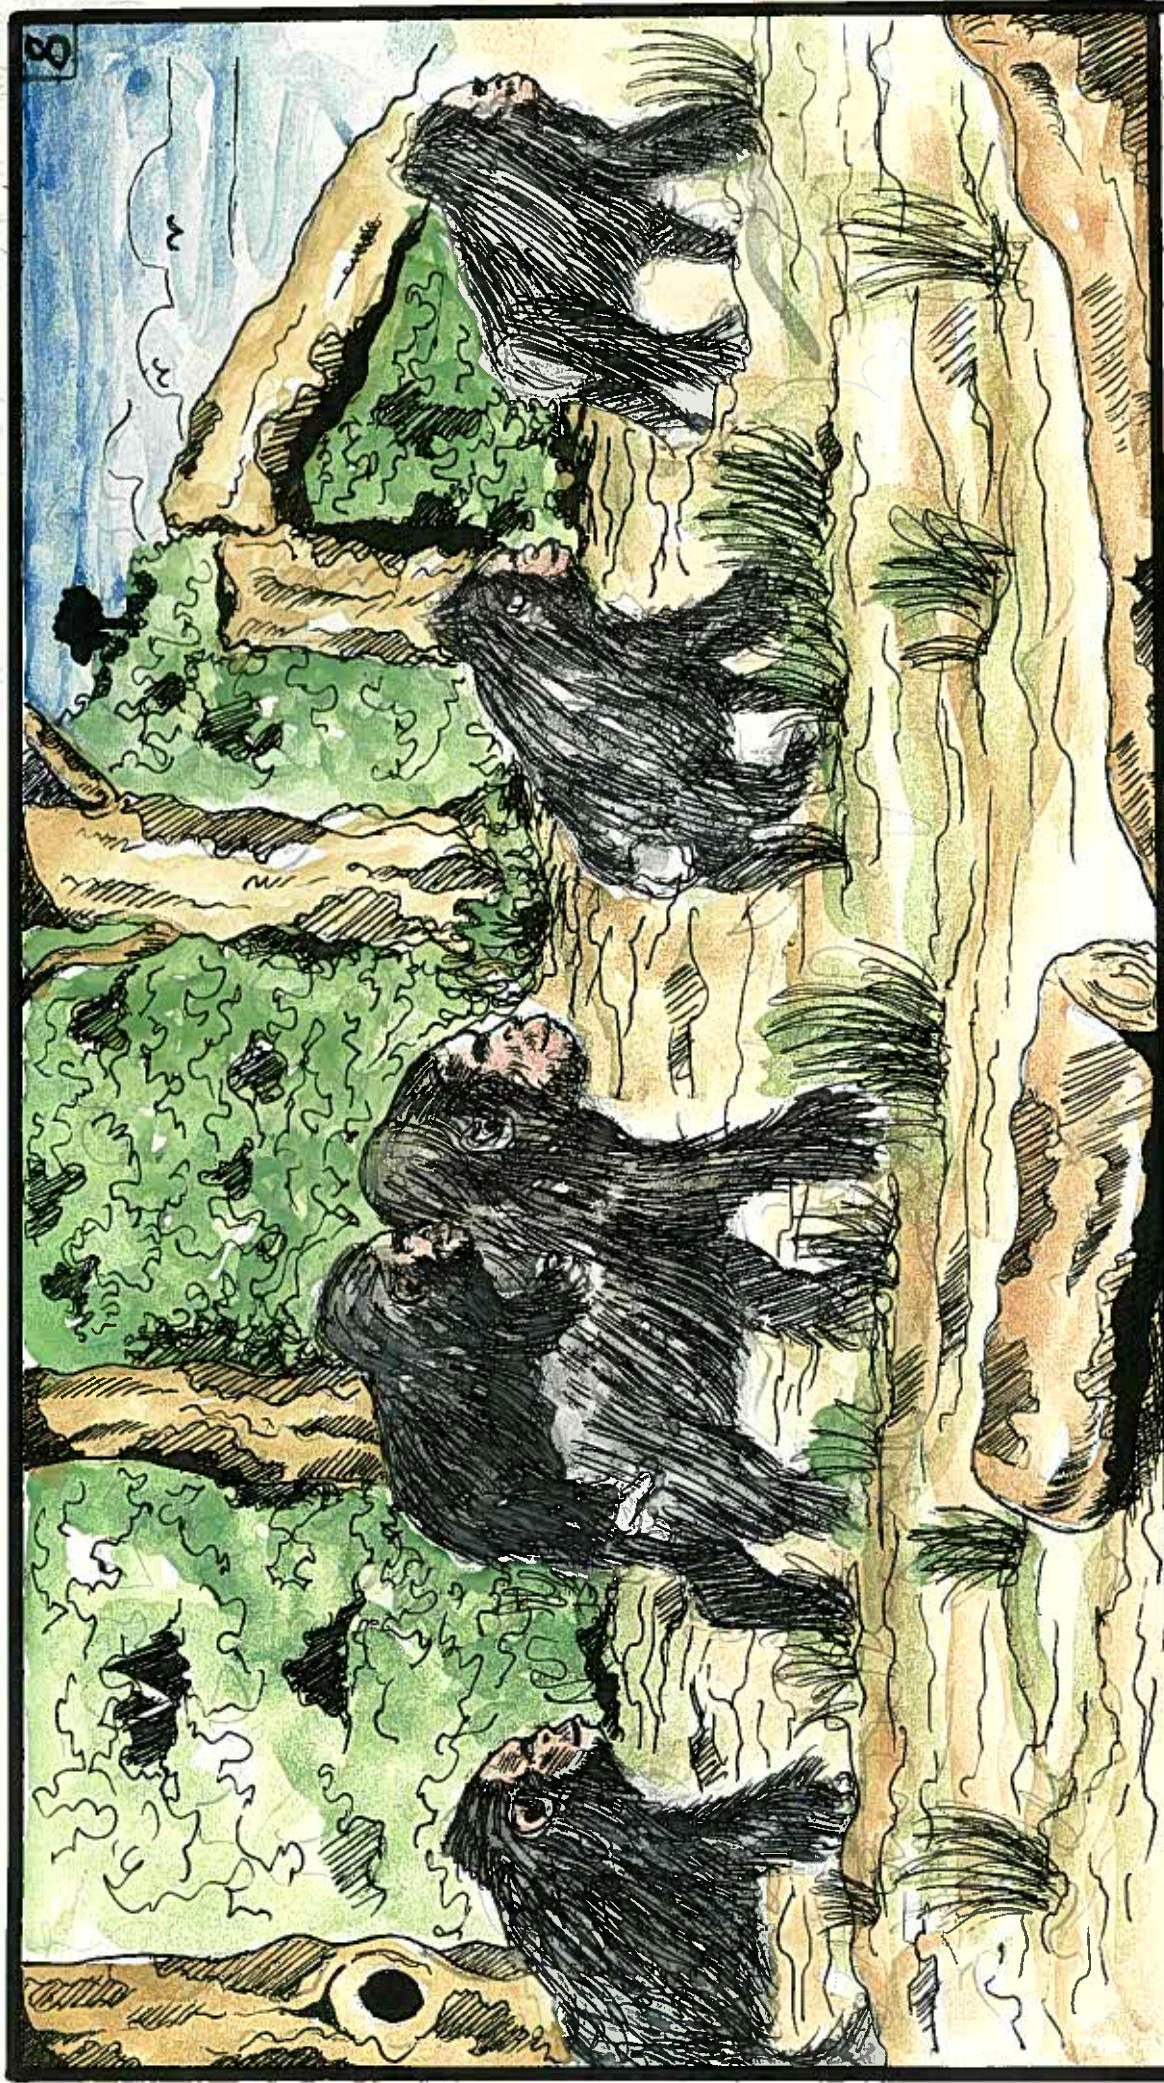

Soon after the Inukbees started killing innocent animals and Patrimonito was very angry and sad.

The Dangerous Invaders also killed elephants in order to sell their tusk.

Soon after the people started over exploiting the forest through
cutting down too much trees.

8

Due to the catching of trees it made the animals to migrate to the other site as it made the forest to be empty.

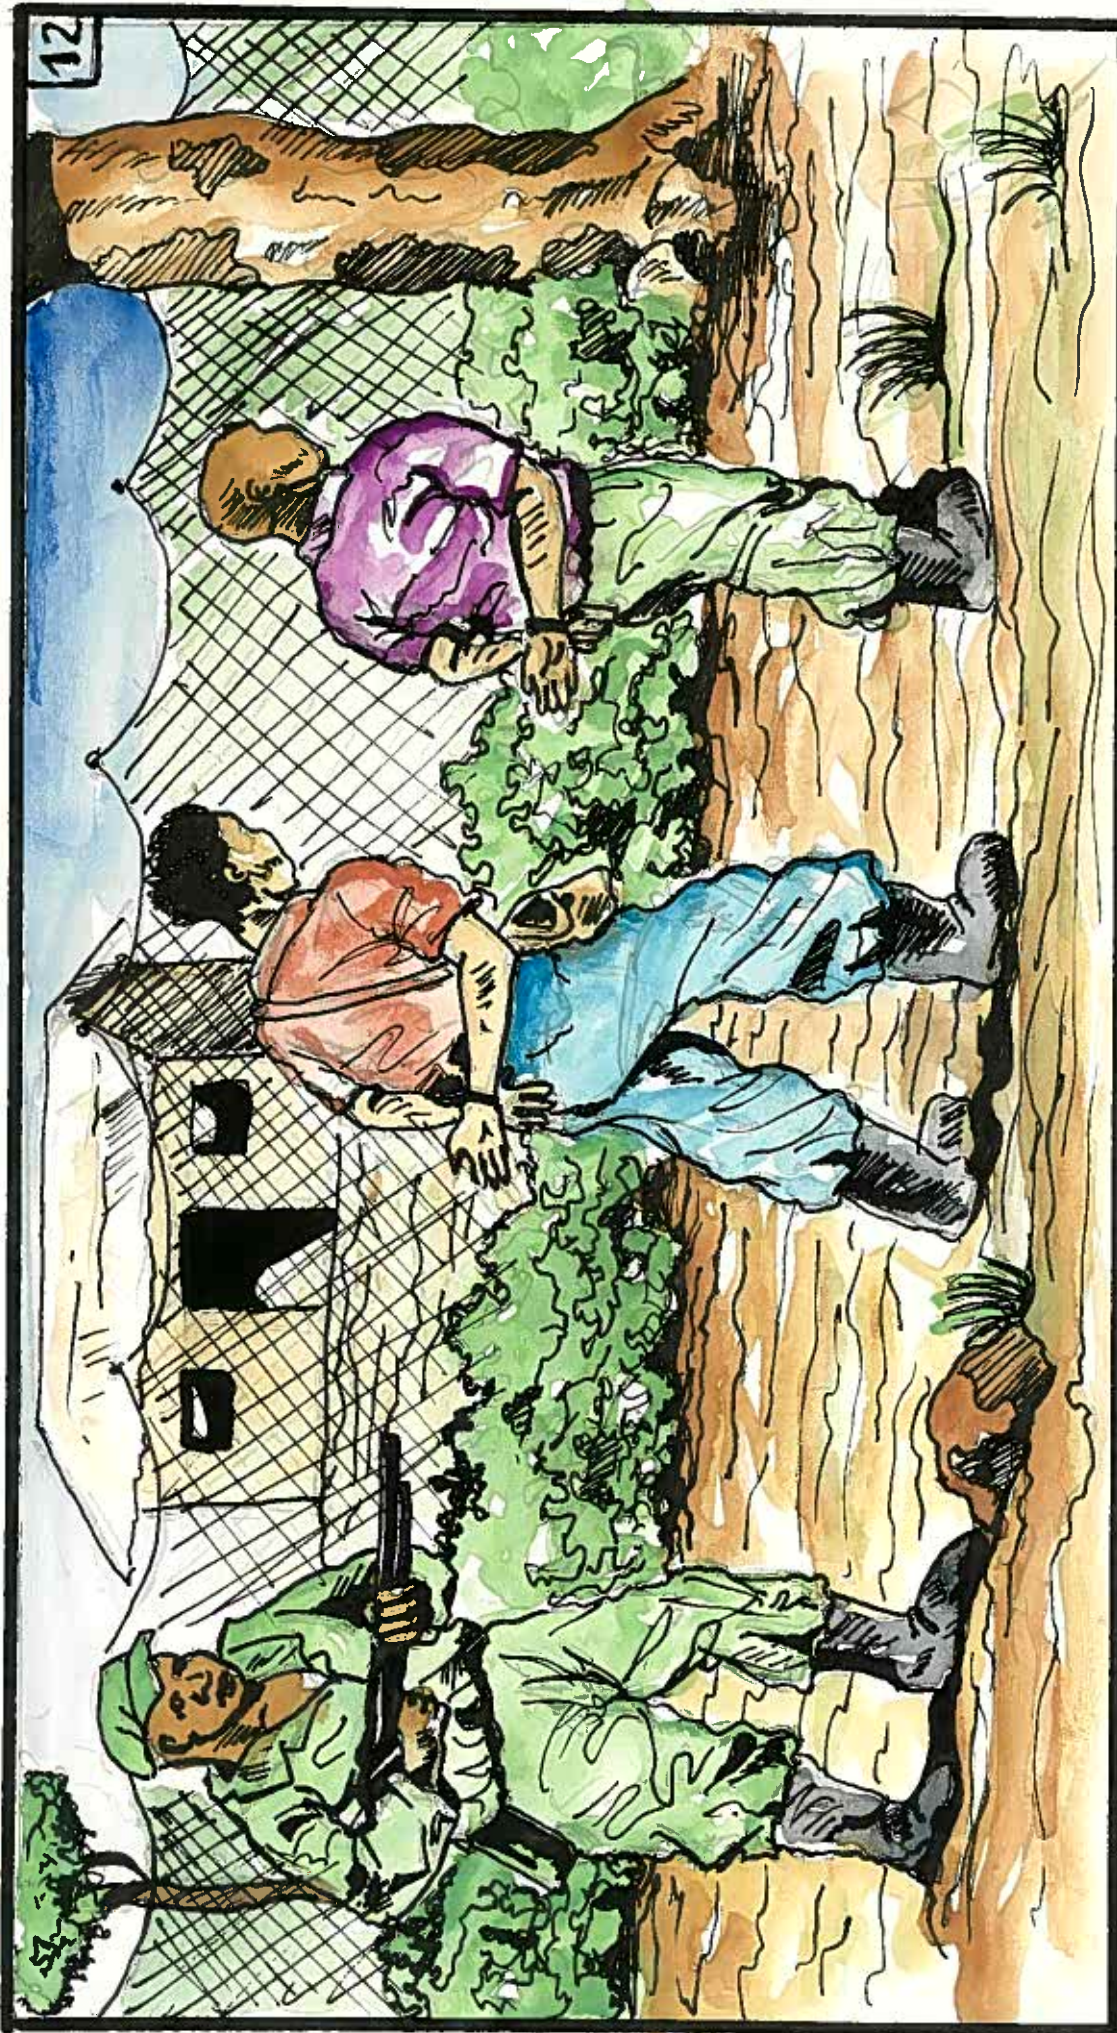

Due to the over exploitation of the forest it led to Climate change (Global warming).

All of this problems made patrimonio to Plead with the Came-
soon to put in some law in other to restore law \$ other in
the forest \$ wild life areas.

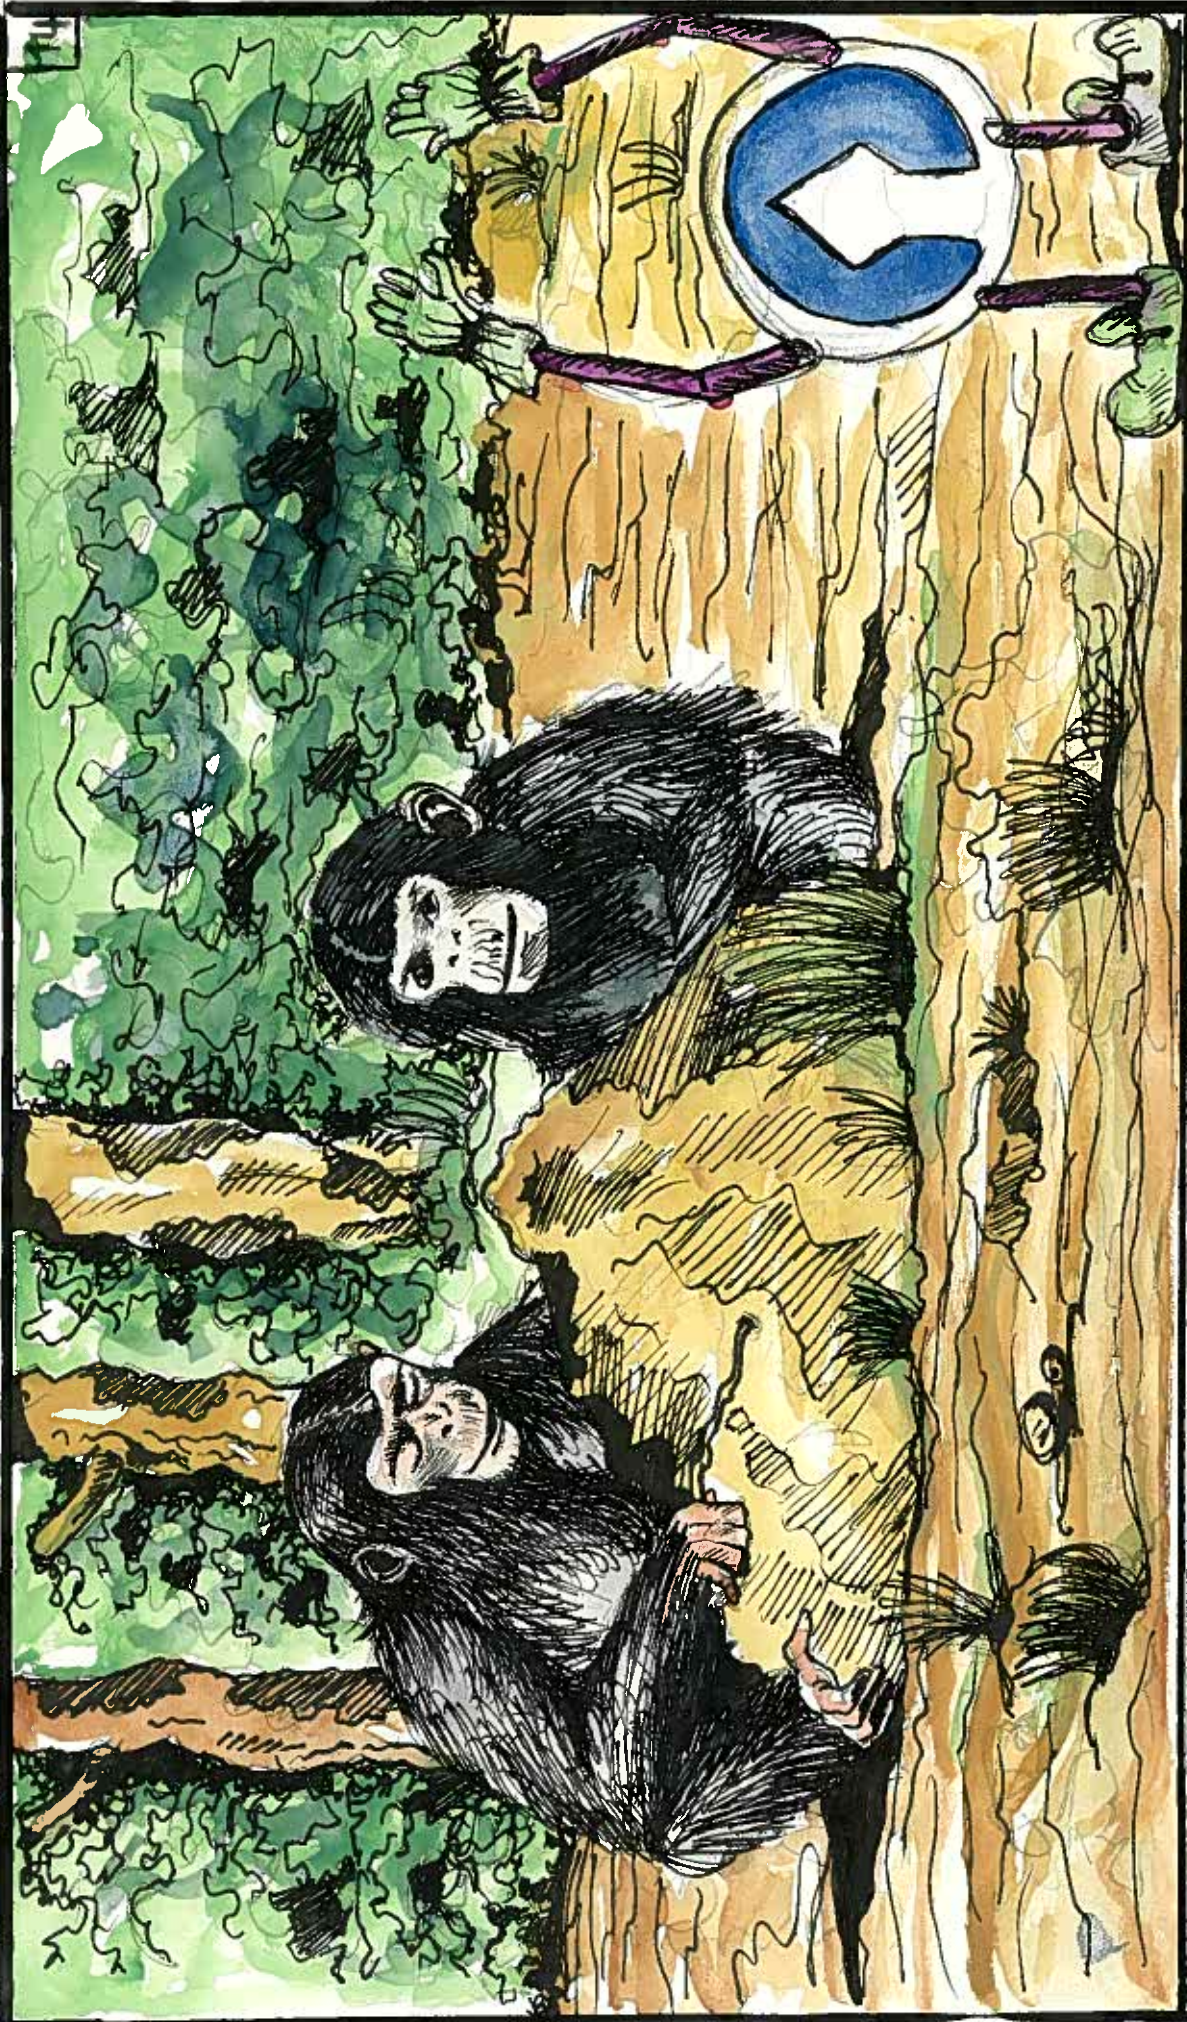

And so the law was put and some forest guards were recruited to guard the Dja Faunal Reserve.

And so the forest guards caught some of the invaders.
and they were locked up.

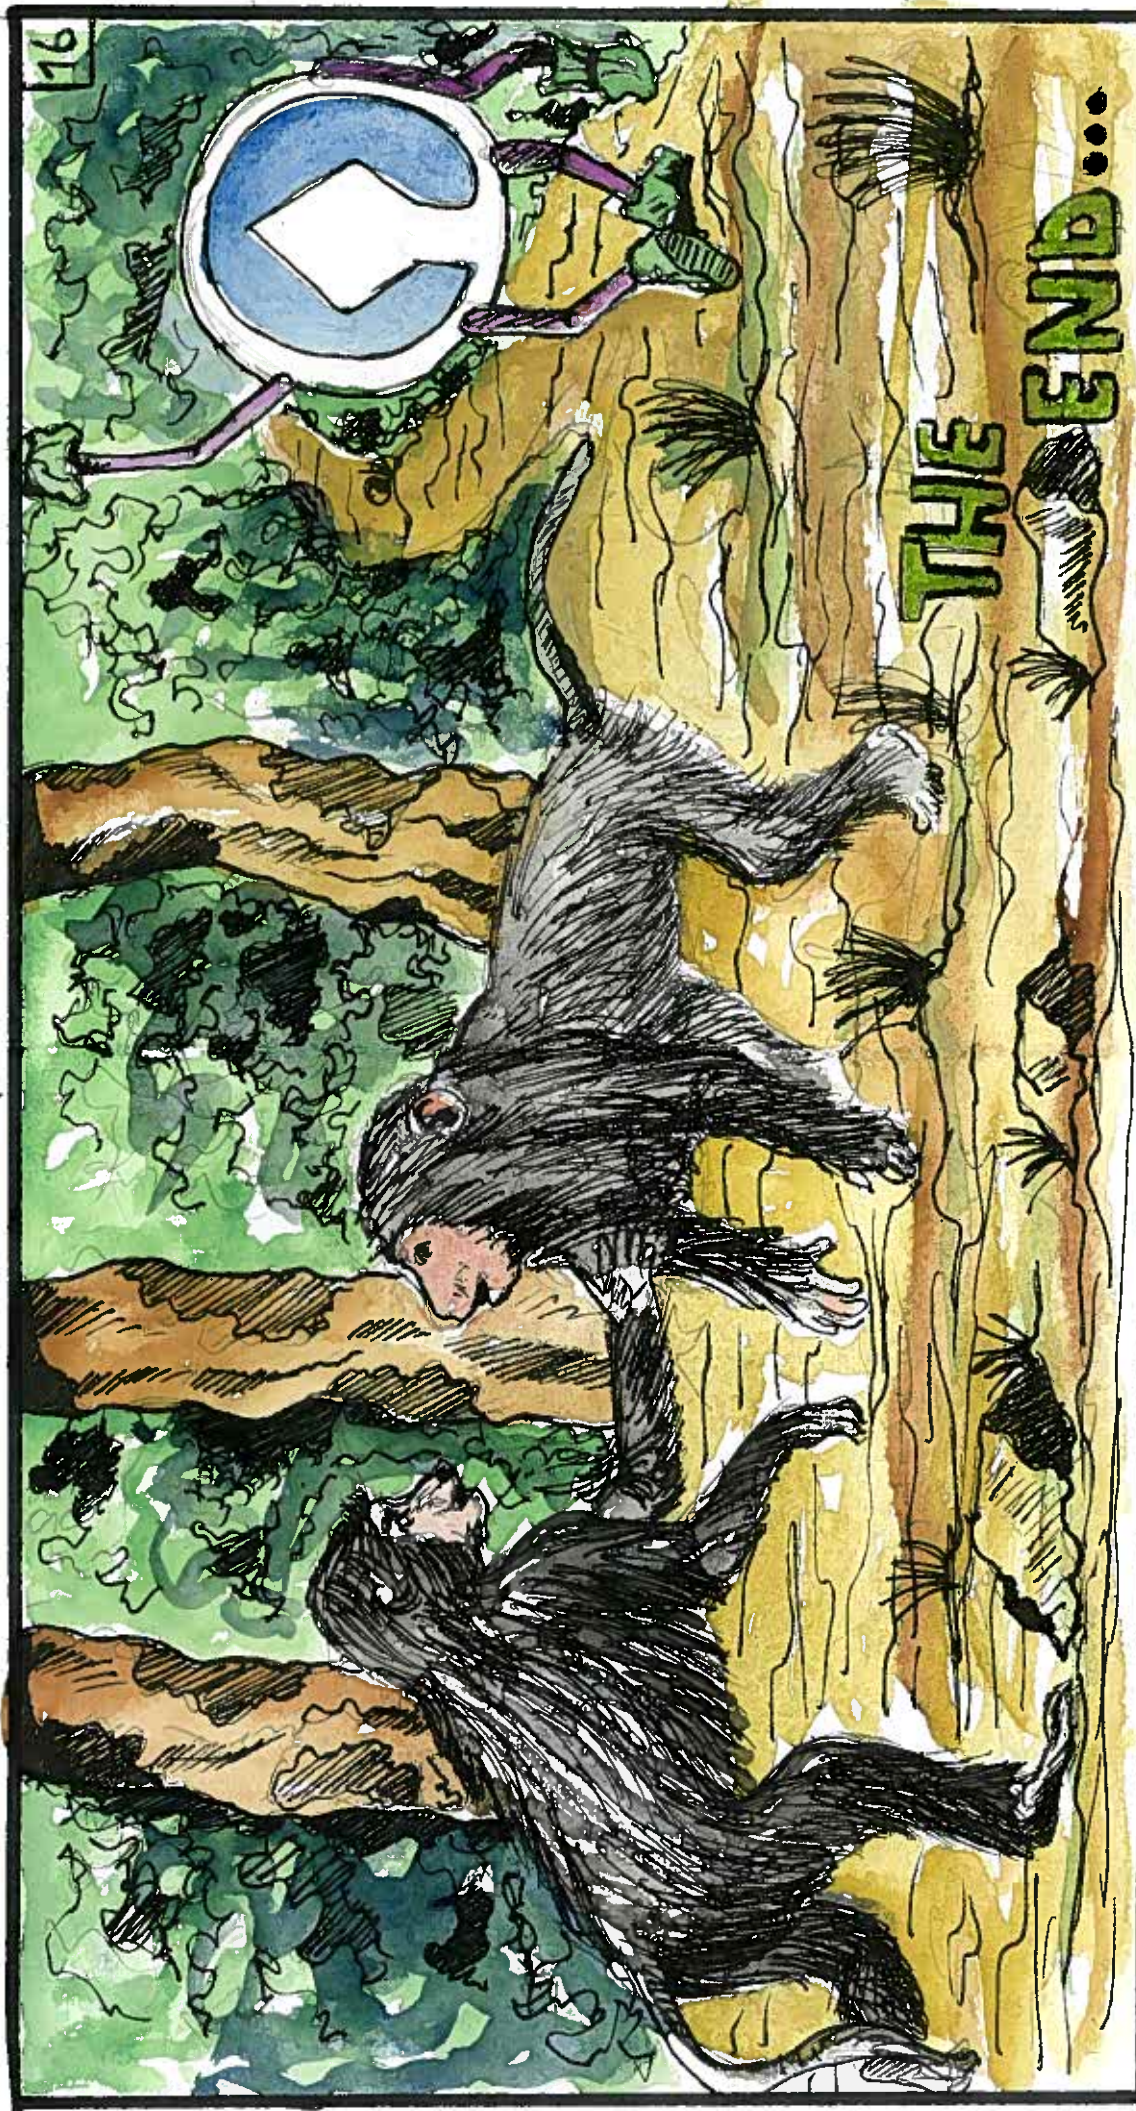

Another law which was put was that the trees were to be planted through reforestation.

Patrimonto was very happy because the trees ~~had~~ that
where planted had grown and the animals had come back
to the forest.

And so the animals lived happily and this brought foreign people and tourists to visit the Dja Faunal Reserve.

Patrimonito went back happily and the animals lived happily ever after
