Submission #65

Personal information

Name Prof. Dr. Friedrich Krotz

Organisation Center for Media, Communicatin and Internet Research (ZeMKI), University of Bremen, Germany

Email address krotz@uni-bremen.de

Country/region Germany

Gender male

How would you define the stakeholder community or communities to which you belong? Civil society

Questions

1. What are your priorities for issues that should be addressed through the Internet Universality framework in each of these five categories?

Rights	The right of own data.
Openness	Transparence for all operations of bureaucracy, government, ecnomy
Accessibility	for all
Multistakeholder participation	control by changing institutions of civil society
Cross-cutting indicators	

2. Are there are any existing indicators with which you are familiar that you think it would be useful to include in the ROAM indicators framework?

Rights	learning from history
Openness	human rights

Accessibility	democracy
Multistakeholder participation	independent of Governmentes, Religion, Ideology
Cross-cutting indicators	

3. What do you think are the most important gaps in data/evidence required for monitoring Internet Universality and the ROAM principles? What approaches do you think could help to address these in your country, region or area of work?

Rights	commercialization, bureocratic control
Openness	commercialization, bureocratic control
Accessibility	commercialization, bureocratic control
Multistakeholder participation	commercialization, bureocratic control
Cross-cutting indicators	commercialization, bureocratic control

4. What experience or views do you have of indicators relating to the Internet which are concerned with gender and with children and young people?

The long term meta process Mediatization: hidden behind the concept of digitization is a process which results in more and more computers and more and more computernets in all areas of human life. A digital computercontrolled infrastructure for all symbolic operations is coming up: organized and used mainly by economy and government - and this includes aesthetics, technologiy, organization. This is what must be changed.

5. How do you think you might use the indicator framework for Internet Universality once it has been developed?

political decisions, civil society movements

6. How do you think that other stakeholders might use the framework?

developing only indicators will give the mighty institutions in culture and society as enterprises and bureaucracy to optimize their instruments.

7. Please add any other comments that you think will be helpful to UNESCO in developing the indicators framework.

see above.

8. Please upload any documents that you think will be helpful here.

Please indicate here if you do NOT want your contribution to be published on the UNESCO Internet Universality Indicators consultation platform.
