BIBB facilitates study visits for UNEVOC Guests

At the occasion of the “UNESCO-UNEVOC Learning Forum: managing skills in time of disruption” (23-25 May) and the UNEVOC TVET Leadership Programme (25 June -6 July), the Federal Institute for Vocational Education and Training (BIBB) organised study visits for the foreign delegations.

Study visit at the occasion of the UNESCO-UNEVOC Learning Forum

The activity comprised a practice-oriented visit to the Competence Center for Digital Crafts and Trade at HWK Koblenz. The site provides a demonstration of possible operational uses of digital technologies to assist craft businesses with adapting to the future market. The practical visit was complemented by an interactive session in which the ongoing projects implemented by BIBB in the fields of disruption were explained. Participants learned about approaches for addressing the consequences of displacement of people and demographic changes in Germany, by looking at the case example "Recognition in Germany".
