Au Luxembourg sont considérées en situation d'illettrisme, les personnes qui ont été scolarisées mais qui ne maîtrisent pas ou plus suffisamment la lecture, l'écriture, et le calcul (compétences de base) pour être autonome dans les situations simples de la vie quotidienne. L'instruction de base vise aussi les personnes issues de l'immigration qui n'ont jamais été scolarisées et les personnes alphabétisées dans un autre alphabet.Lors des dernières années une réforme fondamentale a été mise en œuvre : Le débat a été lancé par une conférence européenne en Septembre 2012. Par la suite un réseau des offreurs nationaux fut mis en place, un cadre de référence national fut développé, l'offre a été élargie, le personnel enseignant a été formé, la coopération avec les offices et services sociaux, l'agence pour le développement de l'emploi et l'office luxembourgeois d'accueil et d'intégration a été institutionnalisée et des campagnes publicitaires « apprendre à mieux écrire, lire ou calculer »ont été développées.Les compétences de base digitales sont promues par l'initiative «Internetführerschäin ». La formation comprend quatre domaines de compétences:1.Se familiariser avec les moyens d'information et de communication modernes 2.S'informer 3.Communiquer 4.Créer.Des projets récents dans le domaine des compétences de base sont la mise en place d'un dispositif Family Learning, l'instruction de base en milieu professionnel et une offre d'instruction de base permettant d'atteindre les socles de compétences requis pour accéder à la formation professionnelle de base (CCP).</p>
