1. Context – what is going on?
2. How Wikipedia engenders information literacy
3. What does this look like?

1. Context – what is going on?

“Overall, young people’s ability to reason about the information on the Internet can be summed up in one word: *bleak*.”

“Evaluating Information: The Cornerstone of Civic Online Reasoning”,  
Stanford University, 2016

“...students I met were being told that Wikipedia was untrustworthy and were, instead, being encouraged to do *research.*”

“They heard that Google was trustworthy and Wikipedia was not.”

- danah boyd, author of  
*It's Complicated: The Social Lives of Networked Teens*

Abstinence-only  
Wikipedia education  
doesn't work

## 2. How Wikipedia engenders information literacy

“Wikipedia exists to battle fake news. That's the whole point”

## How Wikipedia dodged public outcry plaguing social media platforms

# Fake news

From Wikipedia, the free encyclopedia

*This article is about the type of hoax. For the online type and the websites that specialize in it, see [Fake news website](#). For other uses, see [Fake news \(disambiguation\)](#).*

**Fake news** is a type of [yellow journalism](#) or [propaganda](#) that consists of deliberate [misinformation](#) or [hoaxes](#) spread via traditional print and broadcast [news media](#) or online [social media](#).<sup>[1][2]</sup> This false information is mainly distributed by social media, but is periodically circulated through mainstream media.<sup>[3]</sup> Fake news is written and published with the intent to mislead in order to damage an agency, entity, or person, and/or gain financially or politically,<sup>[4][5][6]</sup> often using sensationalist, dishonest, or outright fabricated [headlines](#) to increase readership, online sharing, and Internet click revenue. In the latter case, it is similar to sensational online "clickbait" headlines and relies on advertising revenue generated from this activity, regardless of the veracity of the published stories.<sup>[4]</sup> Intentionally misleading and deceptive fake news is different from obvious [satire](#) or [parody](#), which is intended to amuse rather than mislead its audience.

The relevance of fake news has increased in [post-truth politics](#). For media outlets, the ability to attract viewers to their websites is necessary to generate online advertising revenue. If publishing a story with false content attracts users, it may be worthy of producing in order to benefit advertisers and ratings. Easy access to online [advertisement](#) revenue, increased political polarization, and the popularity of [social media](#),<sup>[1]</sup> primarily the [Facebook News Feed](#),<sup>[1]</sup> have all been implicated in the spread of fake news,<sup>[4][7]</sup> which has come to provide competition for legitimate news stories. Hostile government actors have also been implicated in generating and propagating fake news, particularly during elections.<sup>[8]</sup>

Fake news also undermines serious media coverage and makes it more difficult for journalists to cover significant news stories.<sup>[9]</sup> An analysis by [Buzzfeed](#) found that the top 20 fake news stories about the [2016 U.S. presidential election](#) received more engagement on Facebook than the top 20 news stories on the election from 19 major media outlets.<sup>[10]</sup> Anonymously-hosted [fake news websites](#)<sup>[1]</sup> lacking known publishers have also been criticized, because they make it difficult to prosecute sources of fake news for libel.<sup>[11]</sup>

Reporters with various forms of "fake news" from an 1894 illustration by Frederick Burr Opper

# Student Learning Outcomes using Wikipedia-based assignments

## Fall 2016

## Research Report

June 2017

Prepared for the Wiki Education Foundation

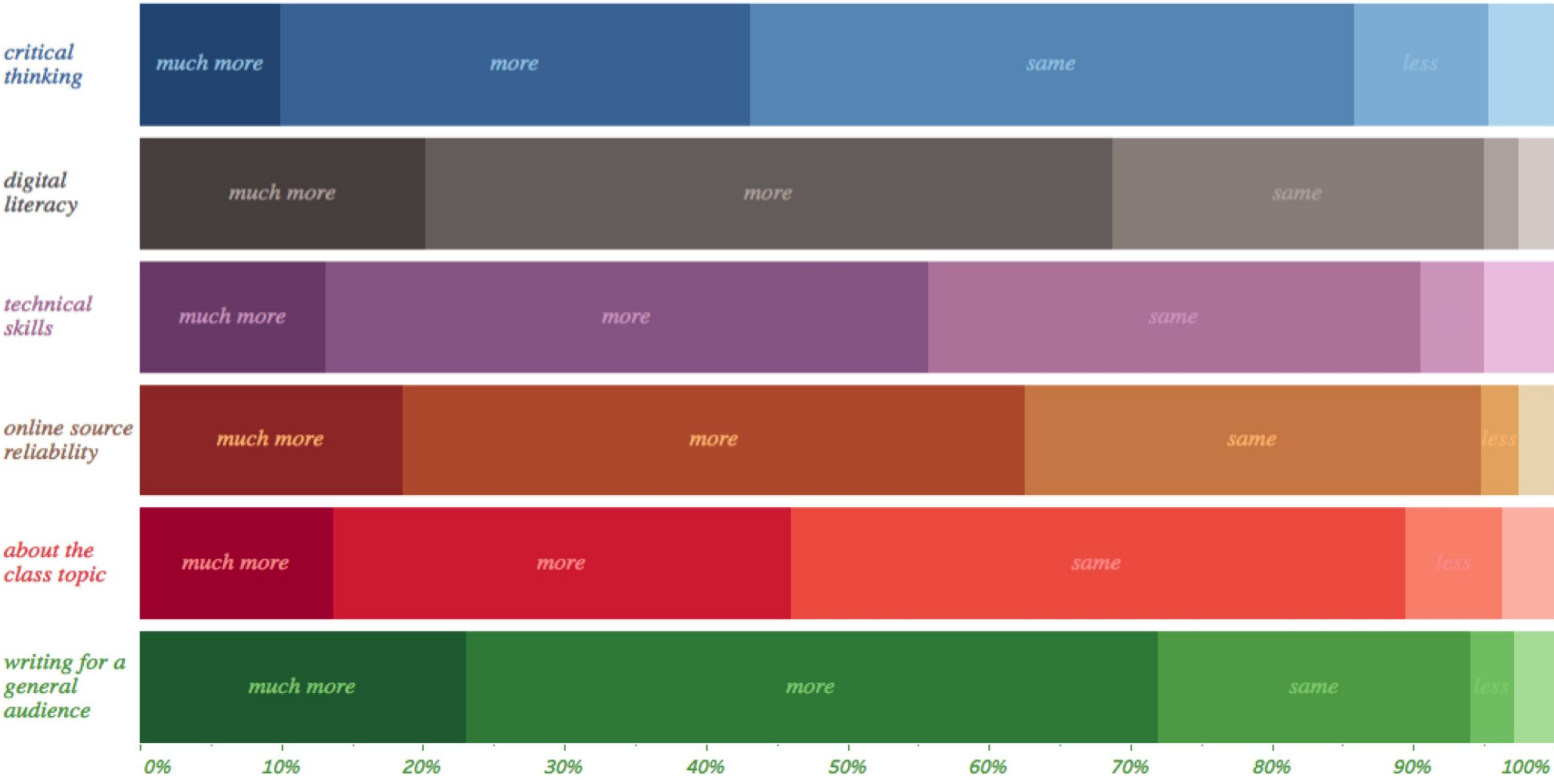

# In comparison with a traditional assignment, instructors value Wikipedia assignments for learning

# In comparison with a traditional assignment, **students value Wikipedia assignments for learning**

# Knowledge has value

“I think you're a lot more ... you have much more of a questioning mentality and *you're a lot more conscious of the validity of the information that you read.*”

# Knowledge is connected

“One thing I realized is, *a lot of the stuff that we're writing about is very interconnected... I would try to link stuff and then it wouldn't work - there would be no page... it's not random, the information that's missing from Wikipedia.* It's a history of the knowledge of the events that have been documented and historicized in the world, and that's what's on Wikipedia right now.”

# Knowledge is **participatory**

*“I have trouble getting myself to do [my papers] sometimes just because I'm like, "Why?" But this, I was like I'm contributing to something bigger and it's public. So, I felt more motivation to go in and edit it and whatever. “*

*“I think also the fact that it's public facing instead of just for a teacher. You're definitely more motivated to do something good that everybody approves, not just a teacher. Maybe you don't care about grades too much. Maybe you have an opinion about your teacher. That's irrelevant... you make those changes and you have something that stands, you feel good about yourself.”*

So what?

Edit a better future.

(Thank you)
