

Home-grown school feeding: resource framework. Technical document

Rome: FAO, WFP, 2018. 170 p.

Organizations:

FAO
WFP

ISBN:

978-92-5-130846-2

Description:

This Resource framework is intended as a guidance tool for stakeholders involved in programme design, implementation and monitoring of Home-Grown School Feeding Programmes and the related policy and institutional environment, including, inter alia: governments and development partners providing technical and financial assistance, as well as civil society, community based organisations and the private sector. It is a knowledge product that harmonizes the existing approaches and tools, and builds on the wealth of expertise and experience with home grown school feeding models i.e. those designed to provide children in schools with safe, diverse and nutritious food, sourced locally from smallholders, with multiple impacts on Sustainable Development Goals. This knowledge product contains a discussion of concepts, issues and experience , as well as other considerations and elements of relevance to home grown school feeding programmes. This lays the ground for a community of practice to support innovation and learning, as well as replication, adaptation and expansion of successful models of interventions, for impact at scale.
