## 7.a Progress and outputs from WG2

### (Capacity Development)

Sir Wonder Masebola – Botswana

Marc Bernal – UIS

TCG4 Meeting

Dusit Thani Dubai, January 18 2018

<b>Participant name</b>	<b>Organization / Country</b>	<b>Function in the group</b>	<b>Participation status to the 4th TCG meeting</b>
Mr Sir Wonder Masebola	Botswana	Chair	Present
Mr Elly Kamahungye	Uganda	Member	Present
Ms Rashida Choudhury	(CCNGO Coordination Group)	Member	Present
Mr Jordan Naidoo	UNESCO HQ	Member	Present
Mr Marc Bernal	UIS	Member and Secretariat	Present
Mrs Astrid Gillet	UNESCO HQ	Member	Present
Mrs Sonia Dubourg-Lavroff	France	Member	Present
Mrs Valeria Rocha	RCEP	Participant	Present
Ms Anna Ericsson	Sweden	Member	Absent
Mr Abdelhaq El Hayani	Morocco	Member	Absent
Mr Napoleon K. Juanillo Jr.	Philippines	Member	Absent
Mr Said Ould Voffal	UIS	Member and Secretariat	Absent

**The Working Group on Capacity Development (WG2) is intended to provide a response to the critical needs of statisticians in charge of education indicators and to improve global data availability.**

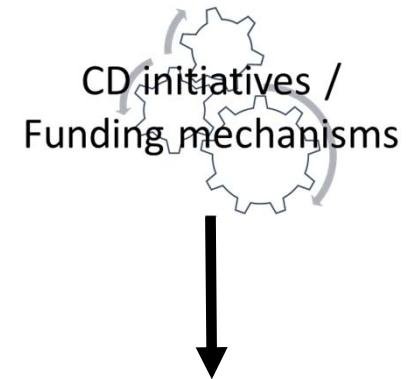

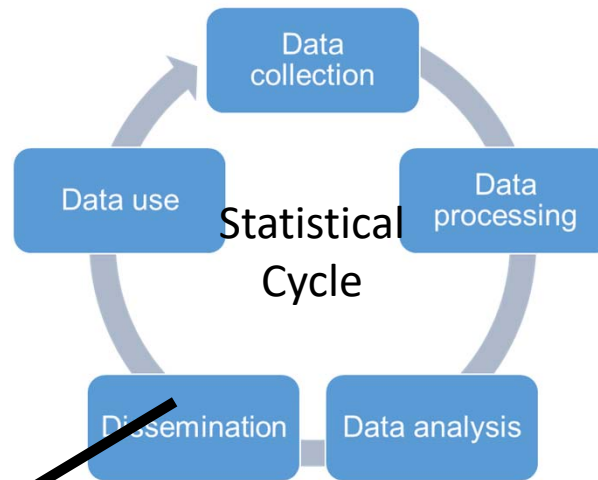

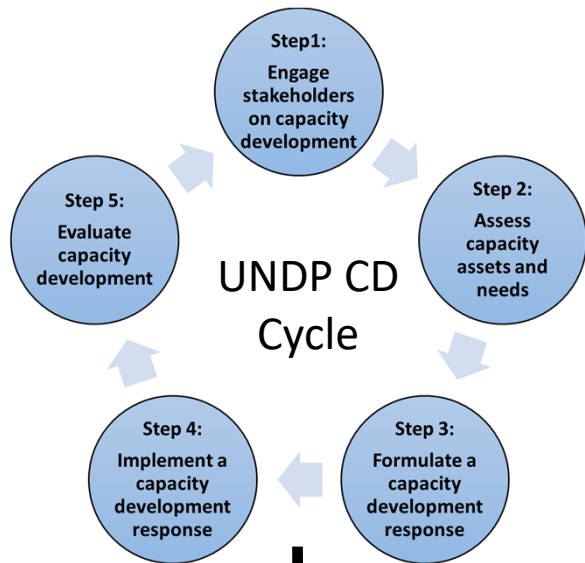

Expected outputs:

1. A **framework** that includes:
  - An **inventory of key national education statistical CD areas** to be addressed for enhancing national capacities in generating and using education data
  - A **repository of CD tools, initiatives and funding mechanisms** available for countries to inform their CD strategy.
  - A **identification of gaps (in the repository)** in terms of tools to be developed / improved and to strengthen coordination among CD actors.
2. **Responses to the gaps** identified through the mapping.

Version française

The Working Group on Capacity Development (WG2) supports the SDG4 Technical Cooperation Group (TCG) in responding to the critical capacity development (CD) needs that may result from the implementation of the new agenda at national level. Indeed, monitoring SDG4-Education 2030, will require mobilising a wide range of data sources and will place considerable demands on countries to improve data quality in its different dimensions.

The main objectives of the WG2 is to contribute to the identification and better understanding of the statistical CD needs; provide guidance for feasible solutions and plans that can be disseminated to countries and other partners; and contribute to the harmonization of capacity development efforts.

The WG2 met in Montreal, May 2017, and agreed on the necessity to setup a **statistical CD Framework** which will help meeting these objectives. It is mainly constituted of a **Repository of CD Tools** and a list of CD initiatives and Funding mechanisms. The overall statistical CD Framework is presented in a concept note at the Resources section here below.

Soon on public access at: <https://teams.unesco.org/cop/tcg/cd-en>

## Repository of CD Tools

The Framework is built on top of the UNDP generic five steps CD process grounded into the SDG4 Education 2030 context. It is elaborated through the identification (the inventory) of key education statistical areas where countries may require support (national education statistical capacity needs). The Framework will serve as a repository in which for each of these areas potential CD tools will be made available as public goods to help countries develop their statistical CD strategy or simply to pick some resources of interest when needed.

CD Steps	Statistical areas	CD Tools					
		General	Administrative data	Household survey	Learning assessment	Finance	Other
Engage stakeholders on capacity development	Institutionalisation	CapED approach					
		Paris declaration					
Assess capacity assets and needs	Data gaps identification	SDG4 National Indicators Framework					
		UIS SDG4 data mapping tool					
	Data quality assessment	SDG4 meta-data					
		UN Fundamental principles of official statistics	UIS - World Bank DQAF	IMF DQAF			
		Generic NQAF	UIS Light Ed-DQAF	Household Survey DQAF	UIS Education Finance DQAF

## Linkage with WG 1 and 3:

- Capacity Development will be carried forward on the conclusions of their work (e.g. SDG4 meta-data or Guidelines on SDG4 reporting)

Aiming at improving national capacities in producing and using better quality data for SDG4 reporting & monitoring

- Making available CD tools to countries
- Possibly close existing gaps through the development of new tools
- Sharing lessons learnt and good practices
- Fuel projects implementation

GROUP

7.b Linkages and implications to SDG4 data availability

## Wiki update

- Review
- Included some changes

## Communication and sustainability strategy

- PPT + Leaflet → TCG members to promote the Wiki
- Brief letter from the TCG Chair → countries (20 SSA 20 Asia + LAC)
  - Short survey - 2 months timeframe
- Brief letter from the TCG Chair → Development Partners
- Present in different events:
  - SC meeting (end February)
  - PanAfrican meeting (April) and other events (TCG members to suggest)
- Teleconference WG2 to discuss way forward including means of keeping the wiki alive within the 2030 agenda

Thank you!  
Merci!  
Shukran!
