Sound Scape Ecology

- Biodiversity Index (Acoustic Diversity Index)
- Anthropogenic effects (Airplanes, cars, aircondition)
- Climate Change

(rainfall, wind, temperature)

STEM Education

Drone Mapping

- Coral Reef area
- Marine debris
- Coastal erosion
- Dugong seagrass

COVID-19 Effects on Biodiversity: Science Education Reimagined

Health Prevention

- Dengue, Zika, Malaria

GLOBE MOSQUITO PROTOCOL COLLECTION

WHY SHOULD WE DO THE GLOBE MOSQUITO PROTOCOL?

MOSQUITOS AND HUMAN DISEASES

MOSQUITO LIFE-CYCLE

Smart Agriculture

Weather Station

Smart Phone

Computer

Impacts

25 schools*40 students*10 containers/month*10 mosquitos/container*12 months*11 countries = **13.2** Million mosquito larvae killed

Increase Coral Reef Diversity
No marine debris
Better tourism income
Zero Hunger (SDG)

Reduces in crop lost due to climate changes.
Increase crop quality and quantity.
Reduce pesticide and fertilizer uses.

High Biodiversity in Tropical Rainforest

Dengue Free Southeast Asia

Drone Mapping Coral Sensor Network

Smart Agriculture using Sensors and

Soundscape ecology Camera Trap
