

Government of the Kingdom of Bahrain & United Nations

Strategic Partnership Framework 2018-2022

October 2017

Foreword by the Government of Bahrain

The Government of Bahrain is pleased to present this Strategic Partnership Framework with the United Nations system, for the period 1st January 2018 until 31st December, 2022. This Framework highlights both ongoing and future cooperation opportunities between the Government and UN system agencies and it reflects their mutual commitment to country development priorities and the **Sustainable Development Agenda & Goals**.

The Framework provides a solid basis for strategic cooperation between United Nations system agencies and the Government. It responds clearly and effectively to specific policy and program priorities of the Government, as laid out in its **Economic Vision 2030** and the **Government Programme of Action, 2015-2018**. The value of this Strategic Partnership Framework is two-fold:

1. It offers a **comprehensive picture** of where and how UN system agencies are working in cooperation with the Government for the achievement of country strategic priorities and related Sustainable Development Goals (SDGs) and targets, and
2. It improves the UN system's focus on results and provides a platform for **common policy work and stronger coordination and delivery** of support from UN system agencies that is fully aligned with Bahrain's development needs and priorities.

The Government wishes to thank the UN Resident Coordinator and heads of UN system agencies for their many contributions to the process. The Government is fully committed to working with the UN system in Bahrain for the implementation of this Strategic Partnership Framework and we express confidence in this and future productive cooperation.

Foreword by the Resident Coordinator of the UN System in Bahrain

As Resident Coordinator of the United Nations System in Bahrain, I express my sincere thanks to the Government of Bahrain for its leadership, and to my fellow heads of UN system agencies for their cooperation. This Strategic Partnership Framework between the UN system and the Government of Bahrain that will guide our current and future cooperation until 2022. With it, we now have a comprehensive and coherent statement of UN system support for country development priorities. It demonstrates how the diverse agencies of the UN system will bring to bear their multiple skills and knowledge sets to address complex challenges.

Importantly, **performance indicators** for Government policies and programmes and the contributing results expected from cooperation with UN system agencies have been aligned, wherever possible, with the indicator framework for the SDGs. It is expected that UN system agencies will continue to support the Government to collect SDG-related data and use it to strengthen future policy and planning.

The Framework also puts emphasis on **South-South cooperation** in order to support the Government to identify lessons and good practices from its policy and program work that can be offered to other countries in the Gulf Cooperation Council (GCC) and throughout the wider Arab region.

As the Government of Bahrain prepares for its next national programme, the UN system will continue to provide **coherent, coordinated support** to address the complex and integrated challenges that it faces. The success of this and future partnership frameworks will lie in our common commitment to implementation.

The United Nations system in Bahrain is grateful for its partnership with the Government. We express our appreciation to all who participated in the development of this Strategic Partnership Framework and their collective desires for a Bahrain where everyone can enjoy stability, fulfillment, and reach their full potential.

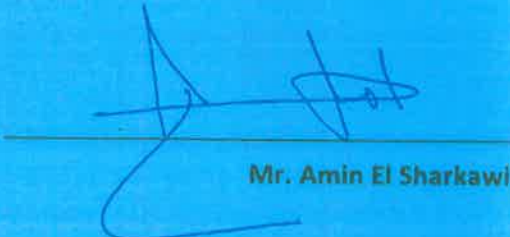

Declaration of commitment

The Government of the Kingdom of Bahrain (GoB) and the United Nations are committed to working together to achieve the country's national vision of '*...a society where justice, security, stability and prosperity prevail*'.

This Strategic Partnership Framework (SPF) will assist the work of the GoB and the UN system in Bahrain until 2022. This framework builds on the successes of past cooperation between the GoB and UN system agencies and it bolsters their coordinated and joint work to achieve national strategic priorities, policies and programmes.

This SPF represents a joint commitment by the GoB and the UN system to work in close partnership for the achievement of country priorities, the Sustainable Development Goals (SDGs), and other internationally agreed development goals. It will help to secure the changes that will help the people of Bahrain to live longer, healthier and more prosperous lives.

In signing hereafter, the participating partners endorse this Strategic Partnership Framework and underscore their joint commitment towards the fulfilment of its objectives.

Government of Bahrain:	United Nations Country Team:
	
Shaikh Khalid Bin Ahmed Bin Mohamed Al Khalifa	Mr. Amin El Sharkawi
Minister of Foreign Affairs	United Nations Resident Coordinator

Signatures

In witness thereof, the undersigned¹, being duly authorized, have signed this Government of Bahrain-UN Strategic Partnership Framework for the period 2018-2022 on 24 October 2017 in Manama Bahrain, underscoring their joint commitment to its priorities and partnership results.

Executive summary

This Government of Bahrain (GoB) and United Nations (UN) Strategic Partnership Framework (SPF) offers a framework of results that is based on the **Vision 2030** of the GoB. The results and strategies will contribute to the achievement of strategic priorities in the **Government Programme of Action, 2015-2018 (PoA)**, the **Government Priorities Framework, 2015-2018 (GPF2.0)**, and the **Sustainable Development Goals (SDGs)**.

Planned partnership results between the GoB and UN system agencies² fall in 5 out of 6 strategic priorities, clustered around **12 policies** and related programmes, and including **9 GPF2.0 programmes**. These results were identified jointly by the GoB and UN system agencies and they align with specific SDGs and targets. This SPF underscores a core principle for Government-UN cooperation to work together in a coordinated and coherent manner to promote human dignity, and inclusive economic growth to **leave no one behind**.

This framework builds on the strong cooperation between the GoB and the UN system, and on a period of analysis and consultation that began in late 2014. The GoB has the primary responsibility and accountability for achieving the PoA strategic priorities, policies, and programmes. Based on their comparative advantages in Bahrain, UN system agencies will contribute with policy advice, in accordance with international norms, standards, best practices, and develop capacity at national and local levels to strengthen the implementation and monitoring of national policies and programmes and to prevent negative social, environmental, and economic impacts. Emphasis is placed on policies and programmes that promote the achievement of the SDGs and their targets.

For continuity, the period of this SPF extends to 2022. Partnership results and strategies will be *updated* to respond to the priorities of the next Government Programme, 2019-2022, and biennium budget for the period 2019-2020.

²UN system agencies is a collective term for the UN funds, programmes, and specialised agencies working in support of Bahrain, both resident and non-resident.

Bahrain: Basic Data

Location	Middle East, archipelago in the Gulf, east of Saudi Arabia
Area	778 sq km
Capital	Manama
Administrative units	4 governorates (Muhafazat): Asimah (Capital), Janubiyah (Southern), Shamaliyah (Northern), and Muharraq. Each is administered by an appointed Governor.
Government type	Constitutional monarchy
Political system	Political parties are prohibited. Political societies legalized, July 2005.
Population	1,423,726 ; Urban population: 100%
Annual pop. growth	3.9% (2016 est.)
Median age:	Total: 30 years; male: 31 years; female: 28 years
Dependency ratio	29%
HDI	Value: 0.824; Rank 47/ 188 countries (2016)
Life expectancy at birth	Total population: 76.7years; male: 75.9 years; female: 77.8 years (2016 est.)
Total fertility rate	2.1 children born/woman
Languages	Arabic (official), English
Labour force	776,565 (Bahraini and Non-Bahraini (59% of the population in the 15-64 age group is non-Bahraini (2015 est.)
GDP	2016 GDP at Current Prices (BD Million): 12,099.33 GDP per head (BD)- Current Prices: 8,498.4 2016 GDP at Constant Prices (BD Million): 11,949.06 GDP per head (BD))- Constant Prices: 8,392.8 Non-oil sectors contribute to 80.2% of total GDP. The financial and banking sector is one of the most important non-oil sectors. Bahrain currently has about 404 financial institutions, which contribute to 16.3% of total GDP. The Manufacturing industries contribute 14.7% of GDP
Inflation rate	2.7% from January to December 2016
Unemployment rate	4.1% (2016 administrative data); Ages 15-24 8.5% (official estimates; actual rates may be higher)
Budget	Revenues: 1,897,777,453 BD; Expenditures: 3,121,413,053 BD
Public debt (% GDP)	Fiscal deficit: 12.6% of GDP; Government debt: 62.1% of GDP (est.2016)
Natural resources	Bahrain has 0.05% of global oil reserves. Arable land represents 9% of Bahrain's land area. Fishing is a significant economic activity. There are 18 species of mammals, 330 species of birds, and Bahrain is a major stopping point on the Eurasian flyway.

1. Introduction

Purpose of the Strategic Partnership Framework

The Government of Bahrain-UN Strategic Partnership Framework (SPF) 2018-2022 is a framework for achieving results that is based on the **Vision 2030** of the GoB. The results and strategies will contribute to the achievement of will contribute to the strategic priorities, policies and programmes as spelled out in the **Government Programme of Action³ (PoA)**, the **Government Priorities Framework⁴ (GPF2.0)** for the period 2015-2018, and the Sustainable Development Goals⁵ (SDGs).

For continuity, the period of this SPF extends to 2022. Partnership results and strategies will be *updated* to respond to the priorities of the next Government Programme, 2019-2022, and biennium budget for the period 2019-2020.

The current PoA provides six mid-term strategic priorities, each with a set of contributing policies and programmes, including a sub-set of 32 high priority target programmes in the GPF2.0. These policies and programmes are *equivalent to outcomes*. Planned cooperation results between the GoB and UN system fall in **5 out of 6** strategic priorities, clustered around **12 policies and 23 related programmes, including 9 GPF2.0 programmes**. The contributions of the UN system to these policies and programmes are shown in two ways:

- (1) As **outputs⁶** expected from country programmes and projects supported by UN system agencies; and
- (2) As **service lines⁷** of contributing UN system agencies, related to specific technical support and advisory services requested by the GoB.

It is important to note that the indicated financial support provided by GoB and UN system agencies is **already committed** and does **not** constitute a new request. Annex B contains *proposed, un-funded* initiatives that may be considered in future by the GoB, UN system agencies, and other partners.

This framework builds on the successes of previous cooperation between the GoB and UN system agencies. It describes how the GoB and UN can work together to deliver on these commitments, including jointly-managed coordination and implementation arrangements, joint resource mobilization, and effective progress monitoring and reporting. Given GoB efforts to develop an '*evaluation culture*'⁸ for greater performance and accountability, **indicators** at both the policy and programme levels have been aligned, wherever possible, with the indicator framework for the SDGs. This helps to demonstrate a clear theory of change between the support provided by UN system agencies and the GoB's development results.

The GoB has the primary responsibility and accountability for achieving the PoA strategic priorities.

³ Government of Bahrain, Government Programme of Action, (PoA 2015-2018) – 'Towards Justice, Security, and Welfare of Community', January 2015 [UNDP Un-official translation].

⁴ The GPF 2.0 was prepared by the Office of the First Deputy Prime Minister. It comprises a sub-set of 32 'high priority' target programmes from the 600 programmes included in the GoB Programme of Action, 2015-2018.

⁵ Sustainable Development Goals and Targets <http://sustainabledevelopment.un.org/focussdgs.html>

⁶ An output is for the **entire** programme period. It is a development result that relates to the availability of new skills and abilities, products or services. The outputs of GoB-UN cooperation can be measured and will make a direct, tangible contribution for the achievement of selected policies and programmes in the Government Programme, 2015-2018.

⁷ A service line is a category of technical assistance that is of short duration and responds to a specific request from the GoB. The cooperation of UN system agencies in Bahrain may involve a mix of both programme outputs and service line activities.

⁸ PoA 2015-2018, *ibid.*, 6.5.1, 52.

The GoB and UN system have identified contributing partnerships results and strategies that align strongly with the SDGs and targets⁹, and that build upon **UN system comparative advantages**:

- » Policy advice, in accordance with international norms, standards, and best practices,
- » Provision of high level, technical expertise to address complex social, economic, and environmental challenges,
- » A global perspective encompassing the norms, standards, and principles of international conventions and treaties ratified by the GoB,
- » Capacity development to strengthen the implementation and monitoring of country strategies, policies and plans and to address the situation of needy individuals in society¹⁰, and
- » A trusted, neutral partner and '*honest broker*'.

Structure of the Strategic Partnership Framework

The Strategic Partnership Framework (SPF) contains six parts:

- » Part 1 continues to describe the principles for the SPF and a summary of the development context;
- » Part 2 describes the planned GoB-UN partnership results that will contribute to the strategic priorities, policies and programmes of the GoB. It also describes initiatives supported by UN system agencies that are outside the SPF.
- » Part 3 describes the mechanisms and processes for steering and review of the SPF;
- » Part 4 outlines the arrangements for monitoring, evaluating, and reporting about SPF results, based on the partnership matrix and UN system agency work plans;
- » Part 5 offers a summary of the communication strategy; and
- » Part 6 provides the commitments of all parties.

The full partnership matrix is provided in **Annex A**.

Annex B offers proposed initiatives for future consideration, and **Annex C** (attached separately) provides an indicative budget.

1.1 Principles

This Strategic Partnership Framework (SPF) reinforces the strong relationship between the GoB and the UNCT to work in a coordinated and coherent manner to achieve national development priorities, policies, and programmes, and the Sustainable Development Goals¹¹ and other internationally agreed development goals and treaty obligations¹². As a strategic framework, it is based on Bahrain's Vision 2030 to contribute to '*...a society where justice, security, stability and prosperity prevail*'.

⁹ Indicators for the policies and programmes of the PoA and related GPF2.0 priorities are aligned with the SDG indicator framework Sustainable Development Goals, Targets, and Indicators. For ease of reference, indicator numbers have been maintained from their source documents. See: <http://sustainabledevelopment.un.org/focussdgs.html>, <http://unstats.un.org/sdgs/indicators/indicators-list/>

¹⁰ This is also understood in the context of the 2030 Agenda for Sustainable Development and its focus on the vulnerable.

¹¹ The 2030 Agenda for Sustainable Development seeks to realize human rights of all (Preamble) and is grounded in the UN Charter, the Universal Declaration of Human Rights, international human rights treaties and other instruments, including the Declaration on the Right to Development (para 10), whilst emphasising the responsibilities of all States to respect, protect and promote human rights and fundamental freedoms for all, without distinction of any kind (para 19). [Sustainable Development Goals](#) and targets.

¹² These refer specifically to international human rights and environmental agreements ratified by the Government of Bahrain, such as the CRC, CEDAW, UNFCCC, and CBD.

The SPF is based upon the following principles:

Table: Partnership principles

1. **Bahrain priorities:** The SPF shows how UN system agencies contribute to GoB efforts to achieve specific policy and programme priorities in the PoA and GPF2.0, 2015-2018.
2. **International commitments:** The SPF shows how the policies and programmes of the Government Programme are aligned with the Sustainable Development Goals (SDGs) and the goals and targets of international conventions and agreements ratified by the GoB.
3. **Partnership:** The GoB and UN system agencies use joint structures to coordinate their cooperation.
4. **Accountability:** The GoB and UN system agencies are mutually accountable for the results in the SPF. This means that each one of them is accountable for its contribution to the planned results, including GoB policies and programmes and UN supported outputs and service lines. This will involve effective management arrangements (section 3), coordinated, effective monitoring, evaluation, and progress reporting (section 4), and communications (section 5).
5. **Transparency:** The GoB and UN system agencies share regular, detailed and timely information on the outputs of their partnership.

This SPF will, in respect of each of the signatory UN system agencies, be read, interpreted, and implemented in a manner that is consistent with the **basic agreements** between the UN system agencies and the Government of Bahrain.

1.2 Country context

The Kingdom of Bahrain is a high income country of nearly 1.4 million people. It has a diversifying economy and sophisticated Government machinery for engaging in international and regional economic, social, and political affairs. The country has an enviable record of converting its resource wealth into an ever increasing standard of living for its people. In 2015, Bahrain reported achievement of seven of the eight Millennium Development Goals (MDGs) – MDG 7 was partially achieved due to the country’s geographic characteristics¹³.

Going forward, the Government of Bahrain in its **Economic Vision 2030** aspires to build a globally competitive economy, with a productive, prosperous middle class that enjoys high-wage jobs and good living standards¹⁴. To achieve this vision, Bahrain’s **Government Programme of Action (PoA)** for the period 2015-2018 provides six mid-term strategic priorities, each with a set of contributing policies and programmes that are *equivalent* to outcomes¹⁵. The process to develop the PoA was notable for the comprehensive committee discussions that took place in Parliament and for the thorough budget review process during the first semester of 2015. Implementation of the PoA is expected to also benefit from the \$10 billion GCC Plan agreed by Gulf nations in 2013 to finance large-scale infrastructure and service projects¹⁶ in Bahrain that will also create new long-term employment opportunities.

¹³ Government of Bahrain, Bahrain National MDG Report, 2015.

¹⁴ Government of Bahrain, Vision 2030, EDB, May 2013.

¹⁵ Government of Bahrain, Government Programme of Action, 2015-2018 – ‘Towards Justice, Security, and Welfare of Community’, Legislative Chapter IV, January 2015.

¹⁶ Gulf News, [Oman and Bahrain have lot to gain from GCC plan](#), June 19, 2013. Investment areas include: housing, health services, energy and water management, particular renewable energy,

In parallel with these achievements are some issues that are also creating headwinds for the achievement of Bahrain's vision 2030 and its mid-term strategic priorities:

- » GDP growth slowed to 2.9% in 2015 compared with 5.4% in 2013, with a slowdown in non-oil sector and flat growth in the oil sector, which accounts for about 80% of government revenue. Economic diversification efforts, based on technology and innovation, are essential to counteract these forces¹⁷.
- » Significant fiscal consolidation measures have been taken to enhance Government revenues and reduce the generous **subsidy regime**, which is estimated to absorb more than 20% of the government budget¹⁸.
- » **Regional and local political tensions** including the ongoing conflicts in Syria, Iraq and Yemen are likely to continue to have negative impacts on flows of foreign direct investment and tourism and a generally greater emphasis on security priorities. The PoA contains clear policy directions and programmes to address this situation¹⁹.
- » Following the 2017 Universal Periodic Review²⁰, Bahrain has committed to implement 139 recommendations to meet its **human rights obligations**.
- » As a small island state with an arid climate, limited arable land and fresh water, and extreme vulnerability to adverse weather events, are ever-present constraints to growth and development.

Process to prepare the Strategic Partnership Framework

On the basis of interest expressed by the Government of Bahrain, the process to prepare the SPF began with a country Analysis paper in 2015. It offered perspective on major development challenges in Bahrain and explored potential areas of cooperation between the Government of Bahrain (GoB) Programme of Action (PoA), 2015-2018 and the work of United Nations (UN) Agencies. Consultations and discussions organised by the Ministry of Foreign Affairs and the Office of the UN Resident Coordinator, led to the preparation of this Strategic Partnership Framework (SPF) between September 2016 and April 2017. The SPF is highly suited to **net contributing countries (NCC)** and **upper middle income countries** where UN support is a selection of highly targeted, strategic interventions. As such, the SPF could become a model for Government-UN partnership in these country situations, globally.

¹⁷ For example, Bahrain is ranked 1st in the Arab region in terms of introducing and adopting e-Government services (UN-DESA index: eGDI).

¹⁸ The subsidy regime was reported to have increased by 73% in recent years, to BD1.126bn (\$2.99bn) per year. The government has begun significant fiscal consolidation measures.

¹⁹ GoB Programme, 2015-2018, Policy 1.1, Programme 1.1.3 and Policy 1.2; Programme 1.2.1.

²⁰ UN Human Rights Council, Report of the Working Group on the Universal Periodic Review - Bahrain, July 2017, A/HRC/36/3.

2. Partnership results and strategies

The Government of Bahrain-UN Strategic Partnership Framework (SPF) 2018-2022 responds to country priorities, the SDGs, and other internationally agreed development goals and treaty obligations. The GoB Programme of Action (PoA) provides six mid-term strategic priorities, each with a set of contributing policies and programmes, including a sub-set of 32 high priority target programmes in the GPF2.0, that are *equivalent* to outcomes.

2.1 Results

Planned partnership results between the GoB and UN system agencies fall in 5 out of 6 strategic priorities, clustered around **12 policies** and related programmes, including **9 GPF2.0 programmes**. These expected results were identified jointly by the GoB and UN system agencies. They build on achievements and lessons from previous cooperation, they utilise the comparative advantages of the UN system agencies in Bahrain, and they align with *specific SDGs and targets*, especially to:

- » Reduce vulnerability to climate-related extreme events and other emergencies (SDG1),
- » Support sustainable food production systems (SDG2),
- » Reduce risks from non-communicable diseases, promote mental health and well-being, and strengthen capacities to prevent and manage national and regional health risks (SDG3),
- » Promote productive employment, fostering innovation, and growing the MSME sector (SDGs 8, 9),
- » Ensure inclusive, quality education with effective learning outcomes and support young people to gain technical and vocational skills (SDGs 4,8),
- » Achieve gender equality and empower all women and girls (SDG5),
- » Ensure availability and access to safe drinking water (SDG6),
- » Upgrade technology for modern and sustainable energy, including renewable energy (SDG7),
- » Increase access to safe and affordable housing for the under-privileged (SDG11),
- » Strengthen the management of chemicals and waste (SDG12),
- » Integrate climate change measures into national policies, strategies and planning (SDG13),
- » Restore degraded land and soil and halt bio-diversity loss (SDG15),
- » Combat illicit financial flows and organized crime (SDG 16), and
- » Enhance North-South, South-South and triangular regional and international cooperation, and access to technology and financial resources (SDG17).

A summary of partnership results is provided below. The complete partnership matrix including indicators, baselines, targets, and means of verification is provided in **Annex A**.

Table: Summary of GoB-UN partnership results, 2018-2022

Strategic Priority 1. Promote security and stability, the democratic system and foreign relations				
Policy	Partnership results	Partners	GPF2.0	SDG targets
1.1 Preservation of security and realization of stability	» Increased capacity to prepare for, detect, and respond to radiation emergencies and health security threats	Ministry of Health (MoH) Supreme Council for Environment (SCE) IAEA; WHO		No poverty: 1.5.2, 1.5.3
	» Strengthened capabilities to address challenges related to drugs and crime in accordance with the related international legal regimes and standards and norms in crime prevention and criminal justice	Ministry of Interior; Royal Academy of Police; UNODC		Climate action: 13.1.2 Peace, justice: 16.4
1.2 Strengthening democratic system	» Improved criminal justice responses in accordance with international standards and norms in crime prevention and criminal justice and human rights instruments	Ministry of Justice, Islamic Affairs and Endowments; Judicial and Legal Studies Institute; UNODC		
	» Strengthened application of international conventions and practices for implementation of international legal frameworks	Public Prosecutor's Office, Judiciary Training Institute, National Institution for Human Rights, UNDP	Enhance Case Management	Peace, justice: 16.3
1.3 Strengthening foreign relations	» Enhanced policy making and international partnerships	Bahrain Institute of Public Administration (BIPA), UNDP		Partnerships: 17.6.1 17.16.1
Strategic Priority 2. Establish a strong and diversified economy and a stable financial system and currency				
Policy	Partnership results	Partners	GPF2.0	SDG targets
2.1 Concrete and sustained rates of economic growth	» Enhanced policies to strengthen Bahrain's trade competitiveness, innovation	Bahrain Chamber of Commerce and Industry (BCCI), UNDP		Decent work, econ. growth: 8.1.1, 8.5.2
	» A growing MSME sector with new sources of finance and export development services	Bahrain Development Bank (BDB), Tamkeen. Other partners (tbd), UNIDO		Industry, Innovation: 9.3.1
Strategic Priority 3. Empower Bahrainis to raise their contribution to the development process				
Policy	Partnership results	Partners	GPF2.0	SDG targets
3.1 Quality and efficiency of educational services	» Improved education policy & planning and an effective, innovative TVET sector	Ministry of Education UNESCO	Quality teaching; Vocational qualifications	Quality education: 4.1.1, 4.3.1, 4.4.1

Strategic Priority 3. Empower Bahrainis to raise their contribution to the development process				
Policy	Partnership results	Partners	GPF2.0	SDG targets
3.2 Improvement of health services	» Strengthened health systems, with improved financing, Enhanced prevention and treatment of NCDs, Health policy and strategy harmonization with SDGs	Ministry of Health, Supreme Council of Health WHO		Good health: 3.4.1
	» Improved clinical nuclear medicine procedures	Ministry of Health IAEA		End Hunger: 2.2.2
3.3 Quality housing services	» Effective housing policies that target the less privileged	Ministry of Housing UNDP; UN Habitat	Housing policy	Sustainable cities: 11.1.1
3.4 Support, care and effective social development	» Improved targeting of needy individuals for social protection systems and enhanced engagement of young people in national development	Ministry of Labour and Social Development (MoLSD) Ministry of Youth and Sport (MoYS)		Gender equality: 5.1
	» Greater capacity to implement measures for gender equality and women's advancement	Ministry of Health (MoH)		Reduced inequalities: 10.2.1
	» Stronger labour market policies including mechanisms for dispute resolution and occupational health and safety	Supreme Council for Women ILO, UNDP	Occupational Standards Regulations for expatriates	Decent work, econ. growth: 8.5, 8.6, 8.8
Strategic Priority 5. Sustainable management of strategic resources and ensuring sustainable urban development				
Policy	Partnership results	Partners	GPF2.0	SDG targets
5.1 Efficient use of resources and energy	» Integration of renewable energy and energy efficiency policies, including climate change considerations, into national strategies and policies	Sustainable Energy Unit, Ministry of Oil and Gas, Supreme Council of the Environment UNDP		Clean energy: 7.2, 7.b
	» Reduce pesticide and mycotoxin Residues in water and food	Ministry of Health; IAEA	Sustainable Food Supply	Clean water, sanitation: 6.1.1
5.2 Safe, convenient environment for residents	» High quality national reporting about climate change	Supreme Council of the Environment	Enhance Bahrain's land management model	Responsible consumption: 12.4.2
	» A national strategy and action plan implemented to protect biodiversity and pearling sites	UN Environment		Climate action: 13.2.1
	» Policy, regulatory, monitoring capacities strengthened to improve air quality and the management of chemicals and hazardous waste			Life on Land: 15.3.1

Strategic Priority 6. Enhance the effectiveness and efficiency of government performance				
Policy	Partnership results	Partners	GPF2.0	SDG targets
6.1 Improve public sector productivity and governance	» Improved policy and public administration capacities for Parliament and Ministries, and collaboration in the region	Bahrain Institute of Public Administration (BIPA), UNDP	National leadership development	Peace, justice, strong institutions 16.6.1 16.6.2
6.5 Government performance evaluation and follow-up	» Increased capacity for evidence-based plans and policies for economic diversification, aligned w. SDGs	Government of Bahrain (tbd) UNDP		16.7.2

Table: Other initiatives with UN system agencies

Partners	Partnership results
Central Informatics Organization (CIO); UN ESCWA	» Capacity development: Support and build capacities of CIO to compile and report on SDG related data
Bahraini Red Crescent; The Royal Charity Organization; UNHCR	» Capacity development: Training programme for MoFA, Mol, and civil society groups on international refugee law and protection of refugees. The training examines links with the national legal framework, international protection law, and registration as a tool for protection, and inter-agency coordination. » Medical Assistance, in consultation with the Royal Charity Organization (RCO), for Syrian refugees in Bahrain.
Ministry of Transport WMO	» Global and regional technical programmes for meteorological observation systems and access to terrestrial, ocean and space-based data, global weather forecasting/climate prediction, and disaster risk reduction and multi-hazard early warning systems

2.2 Strategies

To contribute to country priorities and related SDGs and targets, the partnership results supported by the UN system agencies in Bahrain will employ the following general strategies. These are essential to promote human dignity and inclusive economic growth, whilst preventing negative social, environmental and economic impacts:

1. Further strengthen country capacities and strengthen cross-sectoral coordination

A capacity development approach will support Bahrain to achieve its vision and priorities in the PoA, GPF2.0, and related SDG targets. Planned initiatives supported by UN system agencies will provide high quality policy advice and alternatives to help the GoB to address a range of structural challenges, and they will involve tangible capacity development that will extend beyond training and skills development, to generate sustainability and support the scaling-up of good practices.

To promote cross-sectoral linkages between policy and programme priorities and related SDGs, the UN will support the GoB to apply multi-sectoral thinking and approaches. This will enable the consideration of different policy options and models with multi-sectoral benefits. It will also encourage greater inter-ministerial and inter-departmental coordination for enhanced planning, implementation, and monitoring of the coverage and quality of services in line with international standards.

2. Enhance cooperation with the GCC and other Arab States, and strengthen south-south cooperation

Regional cooperation, particularly amongst the members of the Gulf Cooperation Council (GCC), is a critical dimension for many of the Government of Bahrain's policy priorities. The Government aims to strengthen regional integration with Bahrain's closest neighbours in political, social economic spheres, through a common market, institutions and ever more harmonized social and economic policies. Bahrain will also continue to play an effective role in the League of Arab States (LAS), cooperating with all Arab countries on areas of mutual economic and social interest²¹.

Bahrain's GCC partners comprise the main market for non-hydro carbon exports and provide most of the 8 million tourists who visit Bahrain each year²². Bahrain is also the GCC focal point for work on regional projects that include: impacts of coastal reclamation, standardised air quality data collection, harmonised chemicals management system, and preparation of the annual State of the Environment report for the GCC.

Cooperation will continue to support the GoB to consider alternative policies for greater economic integration and efforts to move towards a single market, as well as measures to increase consistency between domestic and GCC regulations. These measures will also help to address common political, economic, social, environmental, and security challenges and to harness the potential for greater south-south and triangular cooperation arrangements. UN system agencies will continue to explore with the GoB the possibility of establishing Bahrain as a centre of excellence in areas of programming of critical concern to the GCC and wider Arab region.

3. Promote resilience and environmental sustainability

Population growth, urban and industrial development and expansion against a backdrop of limited natural resources and a fragile, arid environment, have created major environmental challenges: scarcity of fresh water, desertification, pollution and coastal and marine ecosystem degradation from oil production, and a lowered water table leaving the main *Dammam* aquifer, a trans-boundary resource, open to contamination from salt water.

Demand for clean water has increased over the past decade by over 4% per year and is reported to be three times the sustainable groundwater supplies. De-salinized sea water is expensive to produce and is estimate to account for 36% of the country's clean water supplies²³. While Bahrain's food security is dependent on imports, agriculture consumes about 39% of the total water budget while accounting for less than 1% of GDP. Bahrain has a wealth of biodiversity but these ecosystems are under increasing stress. With a topography that is mostly flat and low, Bahrain is particularly vulnerable to climate change and to adverse weather events.²⁴

Energy production and consumption accounts for approximately 85% of greenhouse gas (GhG) emissions, and energy consumption is projected to increase significantly in the mid-term. With very high levels of electricity consumption and greenhouse gas emissions²⁵ from energy production, energy efficiency and renewable energy technologies are a priority for economic growth.

The 2030 Agenda for Sustainable Development has the objective to ensure the lasting protection of the planet and its natural resources, support inclusive and sustained economic growth, and enhance human

²⁴ Using a moderate 0.3-meter increase in mean sea levels, it estimated that 11% of Bahrain's total land area would be lost by 2050, including 18 Km² of industrial areas that account for a substantial portion of economic productivity. Bahrain's Second National Communication under the UNFCCC, *ibid.*, 12.

²⁵ Average annual per capita electricity consumption of 12.8MWh/cap, is one of the highest in the world and expected to increase. *Ibid.*, 7.

well-being. It has the resilience of societies and ecosystems at its core and aims to promote multi-sectoral, integrated approaches that harness the potential, assets, and capacities of institutions and communities to reduce risks and vulnerabilities. It will take an integrated approach, based on the 2030 and employ tools and safeguards to anticipate and prevent negative environmental impacts.

4. Enable young people to participate fully in the social and economic life of the country

Young people ages 15 to 24 account for about 40% of the population²⁶. How they develop, and the support and opportunities afforded to them will play a major factor in Bahrain's future development. The challenges facing young people include: unemployment and under-employment, the ageing of the Bahrain population and growing pressures on health and social security, and climate change with the potential to radically alter economic and social conditions for the small island state. There is a challenge to adopt curricula in schools and universities that match changing economic activities. Effective education and skilling, with an increasing focus on STEM careers, is needed to remove obstacles for young people, especially the scarcity of decent work opportunities, and help them to seek out market-driven opportunities for employment, entrepreneurship, and productivity. The new National Youth Strategy 2017-2021 will consider youth engagement and an action plan to implement the strategy.

5. Strengthen country data systems and programme monitoring, aligned with the SDGs

Sound economic and social policies and effective strategic planning and performance management depend upon reliable, up-to-date data and information. Important gaps remain in terms of the availability and quality of data, including a need to strengthen capacities to produce high quality SDG statistics, for example: the inequality-adjusted HDI (IHDI), the multi-dimensional poverty index (MPI) which helps to reveal deprivations beyond income poverty, and the global [Education for All](#) indicators, linked to SDG4. Support is also required to ensure the national statistical system is more responsive to the information needs of policymakers and other users. Particular attention is needed to produce data disaggregated by gender, income groups, employment status, education status, and to more systematic dissemination and communication.

For all partnership results, the UN will work with the GoB, especially the Central Informatics Organisation, to strengthen the quality and availability of data for effective policy-making and programme implementation. Support can also be provided to effectively monitor the implementation of the PoA at policy and programme levels aligned with indicators for the Sustainable Development Goals.

6. Promote human rights and gender equality

Bahrain is a state party to all of the main UN human rights treaties. While the legislative and institutional framework for the observance of international human rights law is mostly in place, implementation requires greater consistency. UN partnership will help to develop and institutionalise new capacities to implement the recommendations of UN human rights mechanisms.

The Constitution guarantees equality between women and men without breaching the provisions of Islamic canon law (Shari'a) (Article 5). Bahrain is a signatory to CEDAW, with reservations on several articles insofar as they are seen as non-compliant with Shari'a law. With regard to gender equality and women's empowerment, Bahrain had a gender development index (GDI) value in 2016 of 0.970 indicating very low disparity between women and men for the measured indicators: long and healthy life, knowledge, and a decent standard of living²⁷. Recent achievements include a new law on violence against family members (No. 17 for 2015) and a new family law (No. 19 for 2017) that unifies personal status laws and improves the legal status of women. The related gender inequality index (GII) score of

²⁶ 2014 Population statistics, Bahrain Open Data Portal, <http://www.data.gov.bh/>

²⁷ UNDP, [Gender Development Index](#) and [Gender Inequality Index](#), dtd. October 2016.

0.233 places Bahrain 47th out of 155 countries²⁸. According to the 2016 Global Gender Gap Index, Bahrain was ranked only 131/144, due mainly to fewer opportunities for economic participation for women²⁹.

The UN will continue to work with Government and other partners³⁰ to promote gender equality across all areas of its work and to contribute to stronger GoB capacity for gender analysis and gender-responsive programming. To increase the numbers of women in the workforce, the UN system agencies can support the GoB to develop and implement inclusive labour market policies and codes for more female-friendly workplaces³¹.

2.3 Resources

The budget³² provides the GoB, the UN system agencies, and country and international partners with an overview of the estimated available resources to support implementation of planned partnership results. Budgets are indicative and may be subject to changes by the GoB, governing bodies of UN system. It is important to note that the indicated financial support provided by GoB and UN system agencies is already committed and does not constitute a new request. Annex B contains proposed, unfunded initiatives that may be considered in future by the GoB, UN system agencies, and other partners.

2.4 Risks and assumptions

Major risks and assumptions for the SPF are:

Risks

- » Depressed oil prices into 2017 and 2018 may further aggravate fiscal and debt pressures, leading to a reduction in social spending and increased social tensions³³.
- » Natural hazards and disaster risks and their possible aggravation due to climate change or the unsustainable use of natural resources³⁴.
- » Increased geo-political instability in the region.

Assumptions

- » Debt ceiling discussions in Parliament are successfully resolved,
- » National budget allocations for social and economic programmes in the PoA are adhered to, and
- » Financial support from the GCC to Bahrain will continue over the period of the SPF.

²⁸ <http://hdr.undp.org/en/composite/GII>; UNDP, [Human Development Indicators](#), January 2016. Lagging indicators are (1) political representation of women, and (2) a relatively low rate of economic participation.

3. Management arrangements

In keeping with the principles and strategies, partnership is a key theme of this SPF. The management arrangements enable more effective coordination and implementation of UN support for the achievement of GoB strategic priorities, policies, and programmes in way that enhances joint work and reduces duplication.

The Strategic Partnership Framework (SPF) is nationally executed under the overall co-ordination of a **Steering Committee**. The Steering Committee provides strategic guidance during implementation, including monitoring and progress reporting. It will serve an advisory function and endorse strategic decisions with regard to implementation of the SPF.

The Steering Committee will be co-chaired by a representative of the Ministry of Foreign Affairs and the Resident Coordinator of the United Nations. It will comprise representatives of: The Office of the First Deputy Prime Minister, The Ministry of Cabinet Affairs, and The Ministry of Finance, and heads of selected UN system agencies. Representatives of line Ministries and other implementing partners may be invited by the co-chairs to attend Steering Committee meetings on an ad-hoc basis.

The Steering Committee will meet annually during the last quarter of the year to:

- » Review overall progress in implementation of the SPF and gauge the extent to which outputs and major service line activities are contributing to targeted policies and programmes of GoB;
- » Consider major constraints and lessons from implementation, as well as future risks and good practices and innovations that can be taken to scale;
- » Review and approve adjustments to the expected outputs and service lines supported by UN system agencies;
- » Hold a comprehensive annual review meeting; and
- » Ensure that guidance and decisions are communicated effectively to all partners.

The work of the SPF Steering Committee will be supported by a joint secretariat of the Government of Bahrain and the UN Resident Coordinator's office. The joint secretariat will provide concise, timely inputs for the annual review meeting, including consolidated progress reports from GoB line ministries and UN system agencies, with indicators and data from the Partnership Matrix (see Annex A).

The SPF will be made operational through the development of agency-specific work plans and project documents as necessary which describe the specific results to be achieved and will form an agreement between the UN system agencies and each implementing partner as necessary on the use of resources.

The UN system agencies will provide support to the development and implementation of activities within the SPF, which may include technical support, cash assistance, supplies, commodities and equipment, procurement services, transport, funds for advocacy, research and studies, consultancies, programme development, monitoring and evaluation, training activities and staff support. Part of the UN system agencies' support may be provided to Non-Governmental and Civil Society organizations as agreed within the framework of the individual work plans and project documents.

Additional support may include access to UN organization-managed global information systems, the network of the UN system agencies' country offices and specialized information systems, including rosters of consultants and providers of development services, and access to the support provided by the network of UN Specialized Agencies, Funds and Programmes. The UN system agencies shall appoint staff and consultants for programme development, programme support, technical assistance, as well as monitoring and evaluation activities.

Subject to annual reviews and progress in the implementation of the programme, the UN system agencies' funds are distributed by calendar year and in accordance with the UNDAF. These budgets will be reviewed and further detailed in the work plans (WPs) and project documents. By mutual consent between the Government and the UN system agencies, funds not earmarked by donors to the UN system agencies for specific activities may be re-allocated to other programmatically equally worthwhile activities.

Where there are joint partnership results between the GoB and two or more UN system agencies, the partners may establish a results group and Joint Work Plan to ensure efficient planning, coordination and the timely delivery of support.

4. Monitoring and reporting

An effective monitoring, reporting, and evaluation system enables the SPF partners to compare actual progress against expected results. The primary responsibility for assessing progress in SPF implementation and the contribution of partnership results to PoA policy and programme priorities rests with the SPF Steering Committee and UNCT on the basis of routine monitoring and reporting by GoB line ministries and UN system agencies. As noted above in section 2.1 particular attention will be given to develop the capacity of GoB Ministries and the Information and e-Government Authority (iGA) to produce disaggregated data, aligned with the SDGs³⁵, and to strengthen the dissemination and use of data and statistics for evidence-based policy formulation and planning. The main steps involved in monitoring, reporting, and evaluation of this SPF are:

- » **Routine progress monitoring and reviews** by UN system agencies and their implementing partners about the achievement of planned partnership results (outputs and service line results) and any constraints for consideration of the Steering Committee.
- » **Annual reviews** that are focused on assessing the *contribution* of SPF results toward targeted PoA policies and programmes, which are equivalent to outcomes. Indicators are aligned, as far as possible, with SDG indicators.
- » **Preparation of one annual progress report**³⁶, on the basis of routine monitoring and reports by GoB line ministries and UN system agencies and the outcomes of the annual review. The progress report will describe actual outputs and service line results achieved against those in the SPF partnership matrix and progress toward targeted PoA policies and programmes, using specified indicators. The Steering Committee may highlight a smaller set of *sentinel* indicators at policy level, for which there are demonstrated contributions from UN system agencies.

The SPF does not have a stand-alone set of outcomes. It demonstrates the contribution of UN system agencies to higher level GoB policy and programme priorities that are *equivalent* to outcomes. As such an SPF evaluation is not appropriate. Where done, programme and project evaluations by UN system agencies will be used for reporting.

5. Communications

Successful steering and implementation of this SPF requires effective communications about the partnership results achieved. The United Nations Information Centre in Manama (UNIC-Manama)³⁷ will,

³⁵ For example, by: Sex, income, education level, and disability status.

³⁶ The progress update will follow the UNDG Standard Operational Format and Guidelines for Reporting Progress on UNDAF.

³⁷ As confirmed to the RC by e-mail on 22 October 2017

in consultation with the RC Office, UN system participating agencies (and their communications focal points) and the government, prepare communication material on a **semi-annual basis on the progress updates** that tell compelling stories about the partnership framework and results achieved for the people of Bahrain based on inputs from different agencies. This will be in addition to routine progress reporting by UN system agencies and their partners.

6. Commitments by all parties

Joint leadership and ownership of this Strategic Partnership Framework by the GoB and the UN system agencies is essential to ensure the quality of the process and the full achievement of planned partnership results.

The commitments of UN system agencies with regard to principles, results and strategies, indicative resource requirements, and arrangements for management, monitoring, reporting, and evaluation are specified in sections 1 thru 5 (above).

The GoB commits to:

- » Co-Chair the SPF Steering Committee and support the review and reporting process.
- » Maintain and strengthen country development coordination structures, and promote the fullest possible links between these structures and those for management of the SPF.
- » Support the UN system agencies' efforts to raise funds required to meet the needs of this SPF and will cooperate with the UN system agencies including:
 - Encouraging potential donor Governments to make available to the UN system agencies the funds needed to implement unfunded components of the SPF;
 - Endorsing the UN system agencies' efforts to raise funds for the SPF from the private sector both internationally and in Bahrain; and
 - Permitting contributions from individuals, corporations and foundations in Bahrain to support this SPF which will be tax exempt for the Donor, to the maximum extent permissible under applicable law.
- » Honour its commitments in accordance with the basic agreements with the UN system agencies.

Whereas the Government of Bahrain (hereinafter referred to as "the Government") has entered into the following:

- » Without prejudice to these agreements, apply the provisions of the Conventions on the Privileges and Immunities of the United Nations agencies to the Agencies' property, funds, and assets and to its officials and consultants. In addition, the GoB will accord to the Agencies and their officials and to other persons performing services on behalf of the Agencies, the privileges, immunities and facilities as set out in the cooperation and assistance agreements between the Agencies and the GoB.
- » The GoB will be responsible for dealing with any claims, which may be brought by third parties against any of the UN system agencies and its officials, advisors and agents. None of the Agencies nor any of their respective officials, advisors or persons performing services on their behalf will be held responsible for any claims and liabilities resulting from operations under the SPF, except where it is mutually agreed by Government and the UN system agency that such claims and liabilities arise from gross negligence or misconduct of that Agency, or its officials, advisors or persons performing services.

See Annexes attached separately:

ANNEX A. Partnership matrix

ANNEX B. Proposed initiatives

ANNEX C. Indicative budget

Annex A. Partnership Matrix

This partnership matrix shows the contributions of UN system agencies to specific policy and programme priorities of the Government Program of Action¹ (PoA). The PoA provides six mid-term strategic priorities, each with a set of contributing policies and programmes, including a sub-set of 32 high priority target programmes in the GPF2.0². These policies and programmes are *equivalent to outcomes*. Planned partnership results between the GoB and UN system agencies fall in 5 out of 6 strategic priorities, clustered around **12 policies** and related programmes, and including **9 GPF2.0 programmes**. The contributions of UN Agencies to these policies and programmes are shown in two ways:

- (1) As **outputs**³ expected from UN Agency-supported country programmes and *projects for the full duration* of the SPF; and
- (2) As **service lines**⁴ of contributing UN Agencies, related to specific technical support and advisory services requested by the GoB, *annually*.

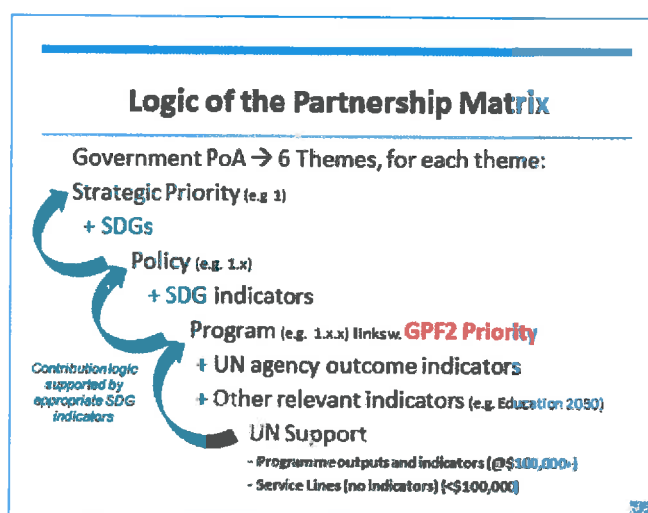

Partnership results that are aligned with the **Government Priorities Framework 2.0** are so indicated.

For continuity, the period of this SPF extends to 2022. Partnership results and strategies will be *updated* to respond to the priorities of the next Government Program 2019-2022, and biennium budget for the period 2019-2020.

Performance indicators at **both** the policy and programme levels have been aligned, wherever possible, with the indicator framework for the SDGs. UN Agencies also support to the GoB to monitor these indicators. This helps to demonstrate a clear theory of change between the support provided by UN Agencies and the SDG-related priorities of the GoB.

For cross-referencing and data compilation, indicators maintain reference numbers to the SDG indicator list and from UN system agency programme or project documents.

The logic of the partnership matrix is presented in the diagram:

Contents

This matrix is organised according to the themes and strategic priorities of the Government Program (GP), 2015-2018.

Theme 1. Sovereignty	2
Theme 2. Economy and finances	5
Theme 3. Human Development and Social Services	6
Theme 5. Environment and Urban Development	11
Theme 6. Government Performance	14

¹ Government of Bahrain, Government Program of Action, 2015-2018 – ‘Towards Justice, Security, and Welfare of Community’, Legislative Chapter IV, January 2015.

² The GPF 2.0 was prepared by the Office of the First Deputy Prime Minister. It contains 32 ‘high priority’ target programmes from the 600 programmes in the GoB Program of Action, 2015-2018.

³ An output is for the entire programme period. It is a development result that relates to the availability of new skills and abilities, products or services. The outputs of GoB-UN partnership can be measured and will make a direct, tangible contribution for the achievement of selected policies and programmes in the Government Program, 2015-2018.

⁴ A service line is a category of technical assistance that is of shorter duration and responds to a specific request from the GoB. The partnership of UN Agencies in Bahrain may involve a mix of both programme outputs and service line activities.

Theme 1. Sovereignty

SPF Partnership Matrix [2018-2022]															
Results	Partners, Timeframe, Indicators, Baselines, Targets	Means of Verification													
<p>Government Strategic Priority 1. Promote security and stability, the democratic system and foreign relations</p> <p>To contribute to this strategic priority, UN system support will increase country capacity to prevent, prepare for, detect, and respond to radiation emergencies and other health security threats. It will develop new capabilities to address existing and emerging challenges related to drugs and crime, and it will strengthen criminal justice institutions and procedures. UN system support will also expand public administration capacity for policy making, performance management, and innovation leading to enhanced trade and diplomatic partnerships in the region and beyond. <i>Specific SDGs and targets</i> to which these initiatives will contribute are:</p> <p>SDGs⁵: 1. End poverty in all its forms (1.5 Reduce vulnerability to climate-related extreme events and other shocks and disasters) 3. Ensure healthy lives (3.d Strengthen the capacity for early warning, risk reduction and management of national, global health risks) 16. Promote peaceful and inclusive societies, provide access to justice (16.4 reduce illicit financial flows, combat all forms of organized crime) 17. Strengthen and revitalize the global partnership for sustainable development (17.6 Enhance North-South, South-South and triangular regional and international cooperation; 17.16 Enhance global partnership for SD and access to knowledge, expertise, technology and financial resources)</p>															
<p>Policy 1.1</p> <p>Preservation of security and realization of stability</p> <p>Programs</p> <p>1.1.1 Develop the country's defence and security capabilities (Prevent and combat organised crime and illegal trafficking of banned substances)</p>															
<p>UN Service Lines:</p> <p>UNODC: Strengthen capabilities to address challenges related to drugs and crime, including emerging crimes, in accordance with international conventions, norms and standards</p> <p>Programs</p> <p>1.1.2 Enhance the readiness of government agencies to respond to hazards, emergencies and disasters</p>															
	<p>Partner(s)</p> <p>Ministry of Interior; Royal Academy of Police</p>	<p>Timeframe</p> <table border="1"> <thead> <tr> <th>2018</th> <th>2019</th> <th>2020</th> <th>2021</th> <th>2022</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>			2018	2019	2020	2021	2022						<p>Means of Verification</p> <p>Mol reports Media reports Project reports</p>
2018	2019	2020	2021	2022											
		<p>1.5.2 Direct disaster economic loss in relation to global gross domestic product (GDP) 13.1.2 Number of deaths, missing persons and persons affected by disaster per 100,000 people 16.4.1 Total value of inward and outward illicit financial flows (in current United States dollars)</p> <p>Continuous professional development programmes for law enforcement to address illicit trafficking and organized crime in accordance with international conventions, standards, norms and good practices Level of implementation of drug control strategy, focused on both drug supply reduction and drug demand reduction</p>													
		<p>1.5.3 Existence of national and local disaster risk reduction strategies 3.d.1 National health systems comply with International Health Regulations (IHR) and health emergency preparedness standards</p>													

⁵ Wherever possible, indicators for the strategic priorities, policies, and programmes of the PoA and related GPF2.0 priorities are aligned with the SDGs, targets, and indicators. For ease of reference, indicator numbers have been maintained from their source documents. See: <https://sustainabledevelopment.un.org/post2015/transformingourworld>, <http://unstats.un.org/sdgs/indicators/indicators-list/>

Theme 3. Human Development and Social Services

SPF Partnership Matrix [2018-2022]

Results	Partners, Timeframe, Indicators, Baselines, Targets	Means of Verification
<p>Government Strategic Priority 3. Empower Bahrainis to raise their contribution to the development process</p> <p>To contribute to this strategic priority, UN system support will strengthen education policy & planning and support the development of an effective, innovative TVET sector. It will improve services that address childhood obesity and enhance clinical nuclear medicine procedures. UN support will also support more effective housing policies that target the less privileged. Young people are critical for Bahrain's future growth and development. UN system support will provide means to help young people and their organisations become more engaged in national development, it will enhance country capacity to implement measures for gender equality and women's empowerment, and it will strengthen labour market policies and governance, including mechanisms for dispute resolution and occupational health and safety. <i>Specific SDGs and targets to which these initiatives will contribute are:</i></p> <p>SDGs⁸: 3. Ensure healthy lives and promote well-being for all at all ages (3.4 Reduce by one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and well-being)</p> <p>4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all (4.1 Ensure that all girls and boys complete free, equitable and quality primary and secondary with effective learning outcomes; 4.4 Increase number of youth with technical, vocational skills, for employment, decent jobs and entrepreneurship)</p> <p>5. Achieve gender equality and empower all women and girls</p> <p>8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all (8.5.2 Unemployment rate, by sex, age and persons with disabilities; 8.6 Reduce proportion of youth not in employment, education or training)</p>

This initiative supports children in contact with the justice system to be better protected by practical measures aimed at preventing and responding to violence against children	1.2.3, 3.4.1.3, 3.4.2	16.2	2018-2022
UN Women	Supreme Council for Women's Affairs (SCW)	Programme and technical support for GoB programme 3.4.8: Empower Bahraini women and raise their contribution to the development process. Proposed result: <i>GoB has increased capacity to implement SDG 5, and to meet regional and international commitments.</i> Major proposed initiatives include: A draft policy for gender responsive budgeting (GRB); a national strategy for implementation of CEDAW recommendations; Advocacy and awareness campaigns for SDG5; Inclusion of indicators to measure prevalence of VAW in CIO routine surveys; and Establishment of a global award for women's empowerment.	3.4.8	5	2018-2022

ANNEX C. Indicative Budget

Resource requirements

This indicative budget for the Strategic Partnership Framework (SPF) provides the GoB, the UN system agencies, and country and international partners with an overview of the *estimated* available resources to support implementation of planned results. Sources of funding from UN system agencies include regular or core resources and other or non-core resources that UN system agencies are able to mobilize on the strength of the planned partnership results. Budgets are indicative and may be subject to changes by the GoB, governing bodies of UN system agencies and by internal management decisions. Resources are exclusive of funding received in response to emergency appeals.

Implementation of the SPF will require an estimated total of USD \$16.301 million. This includes USD \$11.679 million from the Government of Bahrain and USD \$4.622 million from UN resources.

It is important to note that the indicated financial support provided by GoB and UN system agencies is **already committed** and does not constitute a new request. Annex B contains *proposed, un-funded* initiatives that may be considered in future by the GoB, UN system agencies, and other partners.

Table: Resource Requirements¹

Strategic Priorities and Policies		Indicative Budget (USD, '000)			Total
		GoB Resources ²	UN Regular Resources	UN Other Resources	
1. Sovereignty/ Justice and rights					
Policy 1.1	IAEA			90	90
	UNODC	*		532	532
	WHO			224	224
Policy 1.2	UNODC	*		786	786
	UNDP	1,720			1,720
Policy 1.3	UNDP	200			200
2. Economy and Finance					
Policy 2.1	UNDP	1,400			1,400
	UNIDO				
3. Human Development and Social Services					
Policy 3.1	UNESCO			78	78
Policy 3.2	IAEA			270	270
	WHO			290	290
Policy 3.3	UNDP	1,200			1,200
	UN Habitat			30	30
Policy 3.4	ILO			280	280
	UNDP	2,316			2,316
5. Environment and Urban Development					
Policy 5.1	UNDP	4,200			4,200
	IAEA			90	90
Policy 5.2	UN Environment	100		1,952	2,052
6. Government Performance					
Policy 6.1	UNDP	433			433
Policy 6.5	UNDP	110			110
TOTAL		\$ 11,679		\$ 4,622	\$ 16,301

* Cooperation with the GoB is based on memoranda of understanding that involve cost-sharing as implementation proceeds.

¹ These figures are indicative only. They are estimates as of October 2017 and will depend on the availability of GoB resources, regular and other resources from UN system agencies and contributions from donors.

² GoB resources are **already committed** as per approved programme documents with UN system agencies. A portion of these will be used for joint programming with other UN system agencies. GoB resources are from: Parliament; Ministry of Finance and line ministries; the Judiciary; Semi-independent institutions such as the Supreme Councils of Health (SCH), Environment (SCE), and for Women (SCW); and other institutions and bodies. Figures do not include *kind* contributions.

Resource mobilisation

The GoB and UN system agencies will jointly develop a resource mobilization strategy to address any funding gaps that emerge during implementation *and* for potential future cooperation initiatives that are agreed between the GoB and UN system agencies (see Annex B). The strategy will include both joint and individual UN Agency fundraising initiatives along with responsibilities and mechanisms for fundraising. This will include a private sector engagement strategy to raise financial and in-kind contributions.

Types of support

UN system agencies provide support to the development and implementation of activities within the Strategic Partnership Framework (SPF). This may include technical support, cash assistance, supplies, commodities and equipment, procurement services, transport, funds for advocacy, research and studies, consultancies, programme development, implementation, monitoring and evaluation, training activities, and staff support. Part of the UN system agencies' support may be provided to civil society organisations as agreed within the framework of UN system agency work plans.

Additional support may include access to UN Agency-managed global information systems, the network of the UN system agencies' country offices and specialized information systems, including rosters of consultants and providers of development services, and access to the support provided by the network of UN Specialised Agencies, Funds and Programmes. The UN system agencies shall appoint staff and consultants for programme development, programme support, technical assistance, as well as monitoring and evaluation activities.

Subject to annual reviews and progress in implementation, the funds of UN system agencies are distributed by calendar year³. These budgets will be reviewed and further detailed in UN system agency work plans. By mutual consent between the Government and the UN system agencies, funds not earmarked by donors to the UN system agencies for specific activities may be re-allocated to other programmatically equally worthwhile activities.

³ For cash assistance to implementing partners, some UN system agencies may apply the **Harmonized Approach to Cash Transfers (HACT)**. These are: UNDP, UNICEF, and UNFPA. Cash transfers, where appropriate, are based on the Work Plans agreed between the Implementing Partner and the UN Agency. For HACT procedures please refer to relevant UN Agency agreement.
