

Ms Gabriela Schneider

Dr. Gabi Schneider is the Executive Director of the Namibian Uranium Institute. She obtained her PhD from Frankfurt University, Germany, in 1984. In 1985, she joined the Geological Survey of Namibia, where she served as Director from 1996 to 2016. Her professional experience covers economic and exploration geology, mineralogy, geo-conservation and geo-education, management and administration. She is a member of the Committee for the Implementation of the World Heritage Convention in Namibia, chairing the Commission's technical subcommittee. She served as a member of the Natural Science Programme Committee of the Namibian National Committee for UNESCO, member of the National Heritage Council of Namibia, chairing its Scientific Committee, Senior Advisor for UNESCO's Geopark Programme, councillor of IUGS, Senior Advisor for the UN International Year of Planet Earth, member of the Sustainable Development Council of Namibia, and as Vice Chairperson of the Environmental Investment Fund of Namibia.

She is the author of a number of books with a geo-heritage/geo-conservation background, is the co-author of many scientific papers in these fields, has contributed to the IGC publication on Africa's Top Geological Sites, and has been involved in the establishment of a geopark in Namibia.

Dr Schneider served as president of the Organisation of African Geological Surveys, and is a member of the Namibian Geoscience Council. She is an honorary life member of the Geological Society of Namibia, an honorary fellow of the Geological Society of London, and is registered with the Namibian Geoscience Council and the South Africa Council for Natural Science Professions.
