

## **REPOSITORY OF EDUCATION INDICATORS REPORTS**

### Frequently Asked Questions (FAQs)

#### **What type of information sources were used?**

Only official national sources from Ministries of Education or National Statistical Offices were used in the preparation of the repository. Any source associated with international organizations was excluded.

#### **Which documents were surveyed?**

Official documents from national agencies such as education yearbooks, administrative data, thematic reports or online viewers were collected.

#### **What data can be found in the documents?**

The documents include data on enrolment numbers by level, year and age, repeaters, teachers, teacher training/qualifications, and school infrastructure.

#### **What does it mean when there is more than one link for a given country and year?**

The interest is to know the different realities of a country's education system. In some cases, the figures are found in different documents, which is why there may be more than one link for the same country and year. In other cases, this is due to the compilation of sources published separately by different levels of government.
