CONFEMEN - ISU partnership

- The implementation of the Rosetta project in 3 French speaker countries (Senegal, Guinea and Burundi) was the result of a partnership between CONFEMEN and UIS.
- A partnership that have been started in 2018 with the joint publication of a blog related to SDG4 and the discussion of implementation of the project.
- At CONFEMEN, this partnership is implemented through PASEC.

CONFEMEN - ISU partnership

Key role of CONFEMEN in this partnership with UIS.

- Share with UIS some of PASEC item to include in the ROSETA booklets,
- Facilitate the PASEC countries participation in this assessment,
- Being the link between UIS and PASEC participating countries,
- Coordinate all assessments activities in the 3 PASEC countries

Test content

**CONTENTS OF
BOOKLET/ITEMS**

- **PASEC2019 booklets**

**ITEMS
DOMAINS**

All items

Technical coordination of the project

- **Monitoring supporting of project implementation by countries :**
 - Training of PASEC National team and support for the training of test administrators
 - Checking the availability of all the elements necessary for the launch of the data collection, and launching of the collection
 - Remote supervision of data collection in schools

Technical coordination of the project

- Supervision of the data entry
- Data entry management
- Data cleaning
- Psychometric analysis management

PASEC data sent to the IEA team

Technical coordination of the project

- Several progress meetings were held between the PASEC team, the IEA and the countries.
- This experience has shown that our methodologies are convergent.
- It would be important for the project to be extended to more countries and schools for robustness of results.
