## O'zbekiston kulolchilik maktablari

**Kulolchilik** xalq amaliy san'ati turlaridan bo'lib, hunarmandchilikning loydan, gildan turli buyumlar, idishlar, qurilish materiallari tayyorlaydigan sohasiga kiradi. Kulolchilikda asosiy xom ashyo tabiiy tuproq bo'lib, loy qancha ko'p pishitilsa, sopolning sifati shuncha yaxshi bo'ladi. Kulolchilikning bezak san'ati bo'lgan koshinkorlik san'ati Markaziy Osiyoning me'morchiligida keng rivojlandi.

Samarqandda kulolchilik neolit davridan buyon mavjud bo'lsa-da, uning eng rivojlangan davrlari eramizning IX–XII asrlarga to'g'ri keladi. Sanoat rivojlangan davrga kelib bu soha ancha susaydi, so'nggi o'n yilliklarda uning ayrim ko'rinishlari hatto yo'qolib ketish xavfi ostida qoldi. Ana shunday paytda kulollar sulolasini davom ettirib kelayotgan hunarmand oilalar o'z maktabini tashkil etdi.

Kulolchilikda ishlatiladigan tuproq jahonning hamma yerlarida mavjudligi deyarli hamma xalqlarda kulolchilikning keng tarqalishini ta'minladi.

Kulolchilik – O'zbekiston xalq amaliy san'atining eng qadimiy, g'oyat qiziqarli turlaridan biri. Mamlakatimiz hududida kulolchilikning ko'plab asosiy maktab va markazlari mavjud. Rishton, Buxoro, G'urumsaroy, Toshkent, Xorazm, Samarqand va Qashqadaryo kulolchilik maktablarini sanash mumkin. Ushbu kulolchilik maktablari bir biridan yaratilgan mahsulotlarni tayyorlanish uslubi, naqsh-gullari, rangi va pardozi bilan biri-biridan farqlanadi.

Arxeologik materiallar kulolchilik mahsulotlarining asrlar davomida takomillashib borganini ko'rsatadi. Davr kulolchilik mahsulotlariga, uning turi va bezaklariga katta o'zgarishlar kiritdi. O'tmishda tayyorlangan shamdon, xum singari sopol idishlarga ehtiyoj qolmadi. Guldon, tovoq, lagan kabi sopol idishlar va buyumlarga ehtiyoj katta. Me'morlikda ham kulolchilik mahsulotlari keng qo'llanilmoqda.

Buxoro-Samarqand kulolchilik maktabi buyumlarining jarangdor nafisligida qo'rg'oshinli sir va sarg'ish-yashil, jigarrang bo'yoqlar muhim o'rin tutadi. "Afrosiyob sopoli" an'alariga asoslanib tayyorlanilgan buyumlar bezagida o'simliksimon naqshlar yetakchilik qiladi, hayvonlar tasvirlari kam ishlatiladi. Ular, asosan G'ijduvon kulolchiligida qo'llaniladi. G'ijduvon, Shaxrisabz ustalari mo'yqalamda ishlasalar, Urgut, Denov ustalari chizma naqshlarni ko'p qo'llaydilar. Buxoro-Samarqand kulolchilik maktabi boshqa maktablardan sopol xushtak o'yinchoqlar ishlanadigan markazining borligi bilan ajralib turadi. Ustoz kulol an'alarini ularning o'g'illari va shogirdlari davom ettirmoqda, ularning ijodlarida an'anaviylikni saqlagan holda o'ziga xos mahorat ham kuzatiladi, bu ranglarda, shakl mujassamotida, yechimning mukammalligi va o'lchamlarning barqarorligida namoyon bo'ladi.

## Ceramic schools of Uzbekistan

Pottery is a type of folk applied art, a branch of handicrafts that produces various items, dishes, building materials from clay. In pottery, the main raw material is natural soil, and good quality of the ceramic will be based on good baked clay. The decorative art of pottery is widely used in Central Asian architecture.

In spite of pottery is existed in Samarkand since the Neolithic period, its most developed periods date back to the IX-XII centuries AD. With the advent of industry, the industry has fallen considerably, and in recent decades some of its forms have even become extinct. In that time that artisan families, continuing the dynasty of potters, established their own school.

Pottery's soil presented in all parts of the world has led to the spread of pottery in almost all nations.

Pottery is one of the oldest and most interesting forms of folk applied art in Uzbekistan. There are many basic schools and centers of pottery in Uzbekistan such as Rishton, Bukhara, Gurumsaray, Tashkent, Khorazm, Samarkand and Kashkadarya ceramic schools. These schools differ from each other in the style of making products, patterns, flowers, colors and decorations.

Archaeological evidences show that pottery has evolved over the centuries. The period brought great changes in pottery, its type and decoration. There is no need for potteries such as candlesticks and jars made in the past. There is a great need for pottery products such as vases, plates, bowls. Ceramics are also widely used in architecture.

Lead glaze and yellow-green and brown paints play an important role in the resonant elegance of the Bukhara-Samarkand school of ceramics. Plant-based designs based on the "Afrosiyob ceramic" traditions are dominated by floral patterns, animal images are rarely used. They are mainly used in Gijduvan pottery. While the masters of Gijduvan and Shakhrisabz work with brushes, the masters of Urgut and Denau often use drawing patterns. The Bukhara-Samarkand Schools of Ceramic differ from other schools with having Centre of production of the ceramic toy whistles. Master ceramists traditions are continued by their sons and apprentices, whose work preserves the traditional mastery, which is reflected in the colors, sculpture, perfection of solution and stability of the dimensions.
