Educational, Scientific and
Cultural Organization

3rd Extraordinary Session of the Intergovernmental Council of IHP

22-24 February 2021 (12:30-15:30)

Priority Area 4.

Inclusive water management under conditions of global change

By 2029, most societies have managed to adapt to or mitigate water risks derived from, among others, climate change and the human factor, such as global pandemics, generating better participatory management practices and new opportunities for the future of our planet.

Sandra de Vries, representative of Region I

United Nations
